However, for non native speakers, this inevitably becomes a problem; specifically for the complex Bangla language which is not easily integrated into the world of technology. Professionals, students, and researchers interested in expanding the fields of computing, information and knowledge management, and communication technologies in the non-English realm will benefit from this comprehensive collection of research.

Book History Through Postcolonial Eyes Robert Fraser,2008-08-18 This surprising study draws together the disparate fields of postcolonial theory and book history in a challenging and illuminating way. Robert Fraser proposes that we now look beyond the traditional methods of the Anglo-European bibliographic paradigm, and learn to appreciate instead the diversity of shapes that verbal expression has assumed across different societies. This change of attitude will encourage students and researchers to question developmentally conceived models of communication, and move instead to a re-formulation of just what is meant by a book, an author, a text. Fraser illustrates his combined approach with comparative case studies of print, script and speech cultures in South Asia and Africa, before panning out to examine conflicts and paradoxes arising in parallel contexts. The re-orientation of approach and the freshness of view offered by this volume will foster understanding and creative collaboration between scholars of different outlooks, while offering a radical critique to those identified in its concluding section as purveyors of global literary power.
