The Monetary Elite Vs. Gold's Honest Discipline Vincent R. LoCascio, 2005-06
Many people believe that monetary gold inhibits the Fed from effectively managing money on behalf of the public interest. LoCascio presents evidence in support of an opposing view.

Management of Banking and Financial Services: Padmalatha Suresh, Justin Paul, *Management of Banking and Financial Services* focuses on the basic concepts of banking and financial services, and how these concepts are applied in the global banking environment as well as in India. In addition to presenting the big picture of the

Nigeria and the Nation-State John Campbell, 2020-12-02 Nigeria matters. It is Africa's largest economy, and it is projected to become the third most populous country in the world by 2050, but its democratic aspirations are challenged by rising insecurity. John Campbell traces the fractured colonial history and contemporary ethnic conflicts and political corruption that define Nigeria today. It was not—and never had been—a nation-state like those of Europe. It is still not quite a nation because Nigerians are not yet united by language, religion, culture, or a common national story. It is not quite a state because the government is weak and getting weaker, beset by Islamist terrorism, insurrection, intercommunal violence, and a countrywide crime wave. This deeply knowledgeable book is an antidote to those who would make the mistakes of Vietnam, Afghanistan, and Iraq—mistakes based on

misunderstanding—in Nigeria. Up to now, such mistakes have largely been avoided, but Nigeria will soon—and Campbell argues already does—require much greater attention by the West.

Disobedience, Slander, Seduction, and Assault Tanja Christiansen, 2010-01-01
Though the law and courts of nineteenth-century Peru were institutions created by and for the ruling elite, women of all classes used the system to negotiate the complexities of property rights, childrearing, and marriage, and often to defend their very definitions of honor. Drawing on the trial transcripts of Cajamarca, a northern Peruvian province, from more than a century ago, this book shares eye-opening details about life among this community, in which reputation could determine a woman's chances of survival. Exploring the processes of courtship, seduction, and familial duties revealed in these court records, historian Tanja Christiansen has unearthed a compelling panorama that includes marital strife, slander, disobedience, street brawls, and spousal abuse alongside documents that give evidence of affection and devotion. Her research also yields much new information about the protocols for conflict and cooperation among nineteenth-century Peruvian women from all social strata, and the prevalence of informal unions in an economy driven in large part by migratory male labor. Reviving a little-known aspect of Latin American history, Christiansen's book simultaneously brings to light an important microcosm of women's history during the nineteenth century.

Offshore Company Fundamentals David Offshorman,2021-05-18 Everything starts out small... The author of this book once heard this mysterious word offshore for the first time, too. And he, too, asked himself questions like: 'What does a registered agent do?', 'How much do nominee services cost?', 'Why do I need an apostille?', and 'Where is it better to open a bank account?'. It is this inexperienced reader that the book is intended for, and its title speaks for itself. 'Offshore Company Fundamentals' contains basic information that is necessary to anyone who, on hearing the word Panama, thinks of a broad hat, rather than of 'Panama Papers'. However, a sophisticated reader will also appreciate the survey of events and facts without which the topic can hardly be considered properly covered, although they do not exactly qualify as 'fundamental stuff': – Panama Papers and other offshore leaks – What data will be available in the era of worldwide exchange of information: sometimes the future looks back at you from your computer screen; – Cyprus deposit haircut 2013, an event that usually makes one lose faith in humanity, but in this case for some reason the only thing lost was money; – How to open a bank account in the new environment? – Learning to fly is easier; – International Consortium of Investigative Journalists (ICIJ), an organisation that is more like an elite Boy Scout task force digging up compromising material on the

powers that be if they are in any way associated with offshores; – Where is the nominee director heading? – Wherever he is heading, now you will not be going the same way; – Compliance Officer, a bogey that sophisticated businessmen use to scare children into good behaviour. The more recent popular questions also include: What are CFC rules? Will I need to comply with economic substance requirements? How does the automatic exchange of tax information work? Why set up a trust? Of course, the author could not but cover these highly relevant topics, too. Whether he has succeeded in this and other tasks is up to you to decide!

SUPERHUBS Sandra Navidi, 2017-01-24 ONE OF BLOOMBERG'S BEST BOOKS, 2016
FOREWORD BY NOURIEL ROUBINI \$UPERHUBS is a rare, behind-the-scenes look at how the world's most powerful titans, the -superhubs- pull the levers of our global financial system. Combining insider's knowledge with principles of network science, Sandra Navidi offers a startling new perspective on how superhubs build their powerful networks and how their decisions impact all our lives. \$UPERHUBS reveals what happens at the exclusive, invitation-only platforms - The World Economic Forum in Davos, the meetings of the International Monetary Fund, think-tank gatherings and exclusive galas. This is the most vivid portrait to date of the global elite: the bank CEOs, fund managers, billionaire financiers and politicians who, through their interlocking relationships and collective influence are transforming our increasingly fragile financial system, economy and society.

Women, Consumption and Paradox Timothy de Waal Malefyt, Maryann McCabe, 2020-04-23 Women are the world's most powerful consumers, yet they are largely marketed to erroneously through misconceptions and patriarchal views that distort the reality of women's lives, bodies, and work. This book examines the contradictions and mismatches between women's everyday experiences and market representations. It considers how women themselves exhibit paradoxical behaviour in both resisting and supporting conflicting messages. The volume emphasizes paradox as a form of agency and negotiation through which women develop dialogical meanings. The contributions highlight the ways in which women transform inconsistencies and contradictions in advertising and marketing, global consumption practices, and material consumption into positive practices for living. The rich range of ethnographic accounts, drawn from countries including the United States, Brazil, Mexico, Denmark, Japan, and China, provide readers with a valuable perspective on consumer behaviour.

Governments and Markets in East Asia Jungug Choi, 2007-01-24 Governments and Markets in East Asia examines the relationship between economic performance, elite co-operation, and political regime stability in the context of the Asian crisis, and argues that economic crisis is not the cause of greater political harmony or discord, but rather that it serves as a catalyst that may encourage elites to cooperate or conflict depending upon the particular circumstances at the time of crisis. This book maintains that the political

consequences of the Asian crisis varied according to the type of elite that existed in each stricken society. Including a comprehensive comparative study of five countries' experiences during the economic crisis: Indonesia, Thailand, Malaysia, South Korea and the Philippines, this book investigates the pre-crisis political context and elite configuration of these five countries, and considers what lessons can be drawn from their experiences. Constituting an impressive body of descriptive and theoretical material on the Asian crisis, this book looks towards the implications of economic crisis for elite behaviour and political stability.

Gentlemen Bankers Susie J. Pak, 2013-06-01 This account of the Morgan family's social and economic circles and Wall Street's unspoken rules "greatly enriches our understanding of the entire era." –The Wall Street Journal Gentlemen Bankers investigates the social and economic circles of one of America's most renowned and influential financiers to uncover how the Morgan family's power and prestige stemmed from its unique position within a network of local and international relationships. At the turn of the twentieth century, private banking was a personal enterprise in which business relationships were a statement of identity and reputation. In an era when ethnic and religious differences were pronounced and anti-Semitism was prevalent, Anglo-American and German-Jewish elite bankers lived in their respective cordoned communities, seldom interacting with one another outside

the business realm. Ironically, the tacit agreement to maintain separate social spheres made it easier to cooperate in purely financial matters on Wall Street. But as Susie Pak demonstrates, the Morgans' exceptional relationship with the German-Jewish investment bank Kuhn, Loeb & Co., their strongest competitor and also an important collaborator, was entangled in ways that went far beyond the pursuit of mutual profitability. Delving into the archives of many Morgan partners and legacies, *Gentlemen Bankers* draws on never-before published letters and testimony to tell a closely focused story of how economic and political interests intersected with personal rivalries and friendships among the Wall Street aristocracy during the first half of the twentieth century.

Swiss Bank Accounts Michael A. Jones, 1990-01-01 This book provides readers with all they need to know to select the right bank, open an account, conduct transactions, & comply with all tax & legal requirements. Jones describes the various types of Swiss accounts, the unique offerings that differentiate the more prominent banks, & regulations that affect foreign investment. Coverage even includes the changes in Swiss banking policies brought on by the recent insider trading scandals and the Iran-Contra affair.

Plastic Money Alya Guseva, Akos Rona-Tas, 2014-02-26 In the United States, we now take our ability to pay with plastic for granted. In other parts of the world, however, the establishment of a credit-card economy has not been easy. In countries without a history of economic stability, how can banks decide

who should be given a credit card? How do markets convince people to use cards, make their transactions visible to authorities, assume the potential risk of fraud, and pay to use their own money? Why should merchants agree to pay extra if customers use cards instead of cash? In *Plastic Money*, Akos Rona-Tas and Alya Guseva tell the story of how banks overcame these and other quandaries as they constructed markets for credit cards in eight postcommunist countries. We know how markets work once they are built, but this book develops a unique framework for understanding how markets are engineered from the ground up—by selecting key players, ensuring cooperation, and providing conditions for the valuation of a product. Drawing on extensive interviews and fieldwork, the authors chronicle how banks overcame these hurdles and generated a desire for their new product in the midst of a transition from communism to capitalism.

The Last Amateur Stephen L. Dyson, 2014-08-12 The authoritative biography of a nineteenth-century polymath. This fascinating biography tells the story of William J. Stillman (1828–1901), a nineteenth-century polymath. Born and raised in Schenectady, New York, Stillman attended Union College and began his career as a Hudson River School painter after an apprenticeship with Frederic Edwin Church. In the 1850s, he was editor of *The Crayon*, the most important journal of art criticism in antebellum America. Later, after a stint as an explorer-promoter of the Adirondacks, he became the American consul in Rome during the Civil War. When his diplomatic career brought him to Crete, he developed an interest in archaeology and later produced photographs of the Acropolis, for which he is best known today. In yet another career switch, Stillman became a journalist, serving as a correspondent for *The Times* of London in Rome and the Balkans. In 1871, he

married his second wife, Marie Spartali, a Pre-Raphaelite painter, and continued to write about history and art until his death. One of the later products of the American Enlightenment, he lived a life that intersected with many strands of American and European culture. Stillman can indeed be called "the last amateur." Stephen L. Dyson is Park Professor of Classics at the University at Buffalo, State University of New York. He is the author of several books, including *Rome: A Living Portrait of an Ancient City*.
