Independent Agencies in the United States Professor Marshall J. Breger, Professor Gary J. Edles, 2015-04-01 It is essential for anyone involved in law, politics, and government to comprehend the workings of the federal independent regulatory agencies of the United States. Occasionally referred to as the headless fourth branch of government, these agencies do not fit neatly within any of the three constitutional branches. Their members are appointed for terms that typically exceed those of the President, and cannot be removed from office in the absence of some sort of malfeasance or misconduct. They wield enormous power over the private sector. *Independent Agencies in the United States* provides a full-length study of the structure and workings of federal independent regulatory agencies in the US, focusing on traditional multi-member agencies, such as the Securities and Exchange Commission, the Federal Communications Commission, the National Labor Relations Board, and the Federal Trade Commission. It recognizes that the changing kaleidoscope of modern life has led Congress to create innovative and idiosyncratic administrative structures including government corporations, government sponsored enterprises governance, public-private partnerships, systems for contracting out, self-regulation and incorporation by reference of private standards. In the process, Breger and Edles analyze the general conflict between political accountability and agency independence. They provide a unique comparative review of the internal operations of US agencies and offer contrasts between US, EU, and certain UK independent agencies. Included is a first-of-its-kind appendix describing the powers and procedures of the

more than 35 independent US federal agencies, with each supplemented by a selective bibliography.

Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Annual Report India. Ministry of Power, 2014

Departmental annual report 2010-11 Great Britain: Parliament: House of Commons: Foreign Affairs Committee, 2012-04-13 Despite the impressive performance of the Foreign and Commonwealth Office in representing the UK's interests across the globe with what is, in Governmental terms, a particularly small budget, the Foreign Affairs Committee believes that the FCO is under-funded. This situation has been exacerbated by the Spending Review 2010 and the lack of detail provided by the FCO and the BBC World Service as to exactly how the spending reductions target will be met is disappointing. There are concerns about the steps taken by the FCO to adjust to its reduced budget: reductions in the deployment of UK-based staff overseas and the optimistic planned programme of property sales will have a

detrimental impact on the ability of the UK to protect its interests overseas. The establishment of the European External Action Service (EEAS) will place a further strain on the FCO's resources. The Committee welcomes the appointment of Lord Williams of Baglan to the post of International Trustee with responsibility for the BBC World Service, but reiterates its belief that a formal concordat governing the World Service's budget and output should be drawn up setting out the World Service's independence from budgetary pressures elsewhere in the BBC. The budget cuts faced by the British Council will lead to the Council becoming a substantially different organisation by the end of the Spending Review period. The greater emphasis that the British Council will place on commercial activity risks a diminution of the UK's influence and soft power.

Business Improvement Districts and the Contradictions of Placemaking Susanna F. Schaller, 2019-07-15 The livable city, the creative city, and more recently the pop-up city have become pervasive monikers that identify a new type of urbanism that has sprung up globally, produced and managed by the business improvement district and known colloquially by its acronym, BID. With this case study, Susanna F. Schaller draws on more than fifteen years of research to present a direct, focused engagement with both the planning history that shaped Washington, D.C.'s landscape and the intricacies of everyday life, politics, and planning practice as they relate to BIDs. Schaller offers a critical unpacking of the BID ethos, which draws on the language of economic liberalism (individual choice, civic engagement, localism, and grassroots development), to portray itself as color blind, democratic, and equitable. Schaller reveals the contradictions embedded in the BID model. For the last thirty years, BID advocates have engaged in effective and persuasive

storytelling; as a result, many policy makers and planners perpetuate the BID narrative without examining the institution and the inequities it has wrought. Schaller sheds light on these oversights, thus fostering a critical discussion of BIDs and their collective influence on future urban landscapes.

Ethnic China Xiaobing Li, Patrick Fuliang Shan, 2015-10-16 There are some serious concerns and critical questions about the on-going minority protesting in China, such as Tibetan monks' self-immolations,

Muslims' suicide bombings, and Uyghur large-scale demonstrations. Why are minorities such as the Uyghur dissatisfied, when China is rising as a world power? What kind of struggle must they go through to maintain their identity, heritage, and rights? How does the government deal with this ethnic dissatisfaction and minority riots? And what is ethnic China's future in the 21st century? Ethnic China examines these issues from the perspective of Chinese-American scholars from fields such as economics, political science, criminal justice, law, anthropology, sociology, and education. The contributors introduce and explore the theory and practice of policy patterns, political systems, and social institutions by identifying key issues in Chinese government, society, and ethnic community contained within the larger framework of the international sphere. Their endeavors move beyond the existing scholarship and seek to spark new debates and proposed solutions while reflecting on established schools of history, religion, linguistics, and gender studies.

Bitter Waters Patrick Dearen, 2016-03-09 Rising at 11,750 feet in the Sangre de Cristo range and snaking 926 miles through New Mexico and Texas to the Rio Grande, the Pecos River is one of the

most storied waterways in the American West. It is also one of the most troubled. In 1942, the National Resources Planning Board observed that the Pecos River basin “probably presents a greater aggregation of problems associated with land and water use than any other irrigated basin in the Western U.S.” In the twenty-first century, the river’s problems have only multiplied. *Bitter Waters*, the first book-length study of the entire Pecos, traces the river’s environmental history from the arrival of the first Europeans in the sixteenth century to today. Running clear at its source and turning salty in its middle reach, the Pecos River has served as both a magnet of veneration and an object of scorn. Patrick Dearen, who has written about the Pecos since the 1980s, draws on more than 150 interviews and a wealth of primary sources to trace the river’s natural evolution and man’s interaction with it. Irrigation projects, dams, invasive saltcedar, forest proliferation, fires, floods, flow decline, usage conflicts, water quality deterioration—Dearen offers a thorough and clearly written account of what each factor has meant to the river and its prospects. As fine-grained in detail as it is sweeping in breadth, the picture *Bitter Waters* presents is sobering but not without hope, as it also extends to potential solutions to the Pecos River’s problems and the current efforts to undo decades of damage. Combining the research skills of an accomplished historian, the investigative techniques of a veteran journalist, and the engaging style of an award-winning novelist, this powerful and accessible work of environmental history may well mark a turning point in the Pecos’s fortunes.

Divergences in Private Law Andrew Robertson, Michael Tilbury, 2016-01-28 This book is a study of doctrinal and methodological divergence in the common law of obligations. It explores particular departures from the common law mainstream and

the causes and effects of those departures. Some divergences can be justified on the basis of a need to adapt the common law of contract, torts, equity and restitution to local circumstances, or to bring them into conformity with local values. More commonly, however, doctrinal or methodological divergence simply reflects different approaches to common problems, or different views as to what justice or policy requires in particular circumstances. In some instances divergent methodologies lead to substantially the same results, while in others particular causes of action, defences, immunities or remedies recognised in one jurisdiction but not another undoubtedly produce different outcomes. Such cases raise interesting questions as to whether ultimate appellate courts should be slow to abandon principles that remain well accepted throughout the common law world, or cautious about taking a uniquely divergent path. The chapters in this book were originally presented at the Seventh Biennial Conference on the Law of Obligations held in Hong Kong in July 2014. A separate collection, entitled *The Common Law of Obligations: Divergence and Unity* (ISBN: 9781782256564), is also being published.
