Handbook of Applied Journalism Leon Barkho,
Public Diplomacy in Vietnam Vu Lam,2022-08-12

This book explores how Vietnam's leadership conceptualises and conducts public diplomacy (PD) and offers a comparative analysis with regional powers. Drawing on social constructivism as its theoretical framework it investigates the rationale behind an authoritarian regime's implementation of public diplomacy to contribute to a better understanding of the broader framework of foreign-domestic policy. This theoretical and practical exploration of Vietnam's PD in cases of cultural diplomacy, South China Sea diplomacy and online activism situates it in the general academic and theoretical discussion on soft power. Key variables to the conceptualisation and conduct of Vietnam's PD, namely national interest, national identity and changing information technologies, especially the Internet and social media, are also thoroughly investigated. With crosscutting themes ranging from politics and international relations to communication studies, it will appeal to students and scholars of identity politics, populism and nationalism.

Laws on Corporate Social Responsibility and the Developmental Trend in Vietnam Nguyen Binh An, Phan Thong Anh, 2023-01-20 This book examines the law and its development trends in the area of corporate social responsibility (CSR) in Vietnam. It is an important reference in implementing the requirements of CPTPP and EVFTA in Vietnam, and it is also very important in improving the legal framework in Vietnam to comply with international standards, especially in the areas of labor, environment and consumer protection, and in raising awareness of CSR among Vietnamese companies. Many articles in this book analyze and assess the legal status of CSR, thus providing a number of constructive suggestions for improving the relevant laws in Vietnam. Corporate social responsibility is not only the contribution of corporate philanthropy to society, but also the compliance of companies with international standards and national laws in the fields of labor, environment, investment, labor security, social security, etc. Against the backdrop of Vietnam's growing international integration, the requirement of corporate social responsibility has been, and continues to be, paramount in business activities. It is not only a need at the enterprise level, but is also related to the internationalization of international standards and the improvement of national laws on CSR.

Knowledge Transformation and Innovation in Global Society Hoa Van Thi Tran,
Military Modernisation in Southeast Asia after the

Cold War Shang-Su Wu, 2024-04-01 Southeast Asian countries represent a wide range of approaches to military modernisation due to their great diversity in politics, economies, geography and other factors. Bounded by the Pacific and Indian Oceans and located between China and India is the setting for the geostrategic impacts of military modernisation in Southeast Asian countries. Differing from previous research focused on military acquisition, this book additionally covers retention of assets and carefully examines the ageing issues that affect readiness and capabilities. In doing so, it provides a comprehensive view of military modernisation. This book also compares each country's situation in the region in terms of military strength and security challenges to elaborate on the geostrategic impacts of military modernisation. The ten cases of military modernisation in the post-Cold War context provide rich content for readers to explore the evolution of military modernisation in developing countries after 1991. This book sheds light on security studies of Southeast Asia and is a useful resource for academic researchers, policy-makers and defence practitioners.

Victorious Insurgencies Anthony James Joes, 2010-10-20 In 2001 the Human Genome Project announced that it had successfully mapped the entire genetic content of human DNA. Scientists, politicians, theologians, and pundits speculated about what would follow, conjuring everything from nightmare scenarios of state-controlled eugenics to the hope of engineering disease-resistant newborns. As with debates surrounding stem-cell research, the seemingly endless possibilities of genetic engineering will continue to influence public opinion and policy into the foreseeable future. Beyond Biotechnology: The Barren Promise of Genetic Engineering distinguishes between the hype and reality of this

technology and explains the nuanced and delicate relationship between science and nature. Authors Craig Holdrege and Steve Talbott evaluate the current state of genetic science and examine its potential applications, particularly in agriculture and medicine, as well as the possible dangers. The authors show how the popular view of genetics does not include an understanding of the ways in which genes actually work together in organisms. Simplistic and reductionist views of genes lead to unrealistic expectations and, ultimately, disappointment in the results that genetic engineering actually delivers. The authors explore new developments in genetics, from the discovery of non-Darwinian adaptive mutations in bacteria to evidence that suggests that organisms are far more than mere collections of genetically driven mechanisms. While examining these issues, the authors also answer vital questions that get to the essence of genetic interaction with human biology: Does DNA manage an organism any more than the organism manages its DNA? Should genetically engineered products be labeled as such? Do the methods of the genetic engineer resemble the centuries-old practices of animal husbandry? Written for lay readers, *Beyond Biotechnology* is an accessible introduction to the complicated issues of genetic engineering and its potential applications. In the unexplored space between nature and laboratory, a new science is waiting to emerge. Technology-based social and environmental solutions will remain tenuous and at risk of reversal as long as our culture is alienated from the plants and animals on which all life depends.

Rent Seeking and Development Christine Ngoc Ngo, 2020-03-25 Rent seeking continues to be a topic of much discussion and debate within the political economy. This new study challenges previous assumptions and sets

out a new analysis of the dynamics of rent and rent seeking in development, using Vietnam as a case study. This book provides an alternative approach to the study of economic development and illuminates new perspectives in a contemporary context. It argues that not only has there been an incomplete understanding of Vietnam's industrial development over the last three decades, but that neoclassical economics do not adequately address many of the issues endangering Vietnam's development. A significant observation of the Vietnamese experience is the analytical view that rents can be developmental and growth enhancing if the configuration of rent management incentivizes industrial upgrade and conditions firm performance. Underlining the need to reexamine how economic actors and the state collaborate through formal and informal institutions, this study fills a gap in the scholarship of the political economy of rent and rent seeking and how rents might be used for developmental purposes.

South Korea's New Southern Policy Lam Peng

Er, 2023-04-17 This book examines the first regional strategy of South Korea toward Southeast Asia and India. At issue is how a middle power (a G20 country with the tenth largest economy in the world) seeks to play a larger and more comprehensive role in regions beyond the Korean peninsula. Hitherto, South Korean foreign policy has focused on nuclearizing North Korea, alliance maintenance with the United States, tricky relations with its most important economic partner China, and difficult ties with Japan marred by historical and territorial disputes. The Moon Administration has sought to diversify South Korean foreign policy by elevating ASEAN and India to the same strategic level as the United States, China, Russia, and Japan. To be sure, the latter countries continue to be most significant to

the Korean peninsula. However, this book offers different country and regional perspectives on Seoul's first regional grand strategy to play a role commensurate with its status as a middle power.

America's Vietnam War and Its French Connection Frank Cain, 2016-12-08 That America was drawn into the Vietnam War by the French has been recognized, but rarely explored. This book analyzes the years from 1945 with the French military reconquest of Vietnam until 1963 with the execution of the French-endorsed dictator, Ngo Dinh Diem, demonstrating how the US should not have followed the French into Vietnam. It shows how the Korean War triggered the flow of American military hardware and finances to underpin France's war against the Marxist-oriented Vietnam Republic led by Ho Chi Minh.

Britain in Vietnam Peter Neville, 2007-08-07 This book is a study of the circumstances leading to British intervention in Vietnam in 1945, and the course and consequences of this intervention. The first part of the work links French colonialism with the native communist insurgency, while examining British and Foreign Office attitudes towards French Indochina. The study then looks at the key Anglo-American wartime relationship concerning Indochina and its impact. The second half of the book focuses on the local problems faced by the British in Southern Indochina, and whether commanding general Douglas Gracey was guilty (as critics have suggested) of collusion with French colonialism. It also examines the wider problems linked to available military resources, and the controversial issues of the role of the OSS and the use of Japanese troops to preserve law and order. Finally, the book makes a groundbreaking link between British intervention and the outbreak of the French-Vietminh war in 1946. Britain in Vietnam will be of interest to students of British foreign

policy, military history and South-East Asian history in general.

Constitutional Change in the Contemporary Socialist World Ngoc Son Bui, 2020-07-23 After the collapse of the Soviet bloc, there are only five socialist or communist countries left in the world – China, Cuba, Laos, North Korea, and Vietnam – which constitute about one-quarter of the world's population. Yet, there is little scholarship on their constitutions. These countries have seen varying socioeconomic changes in the decades since 1991, which have led in turn to constitutional changes. This book will investigate, from a comparative and interdisciplinary perspective, how and why the constitutional systems in these five countries have changed in the last three decades. The book then breaks the constitutional changes down into four questions: what are the substantive contents of constitutional change, what are the functions, what are the mechanisms, and what are the driving forces? These questions form a framework to process the changes the five countries have gone through, such as making new constitutions, amending current ones, introducing more rights, allowing citizens to engage in changes, enacting legislation, and defining the constitutional authority of the three state branches and their relationship with the Communist Party. While all five countries have adapted their constitutional systems, the degree, mechanisms, and influential factors are not identical and present considerable variations. This book examines and explores these differences and how they developed. *Constitutional Change in the Contemporary Socialist World* offers a comprehensive and holistic view of an understudied and overlooked area of constitutional law, essential for anyone studying or working in law, politics, or policy.

White Gold: The Commercialisation of Rice Farming in the Lower Mekong Basin Rob Cramb,2020-01-03 This open access book is about understanding the processes involved in the transformation of smallholder rice farming in the Lower Mekong Basin from a low-yielding subsistence activity to one producing the surpluses needed for national self-sufficiency and a high-value export industry. For centuries, farmers in the Basin have regarded rice as “white gold”, reflecting its centrality to their food security and well-being. In the past four decades, rice has also become a commercial crop of great importance to Mekong farmers, augmenting but not replacing its role in securing their subsistence. This book is based on collaborative research to (a) compare the current situation and trajectories of rice farmers within and between different regions of the Lower Mekong, (b) explore the value chains linking rice farmers with new technologies and input and output markets within and across national borders, and (c) understand the changing role of government policies in facilitating the ongoing evolution of commercial rice farming. An introductory section places the research in geographical and historical context. Four major sections deal in turn with studies of rice farming, value chains, and policies in Northeast Thailand, Central Laos, Southeastern Cambodia, and the Mekong Delta. The final section examines the implications for rice policy in the region as a whole.

America and Guerrilla Warfare Anthony James Joes, 2021-05-11 From South Carolina to South Vietnam, America's two hundred-year involvement in guerrilla warfare has been extensive and varied. *America and Guerrilla Warfare* analyzes conflicts in which Americans have participated in the role of, on the side of, or in opposition to guerrilla forces, providing a broad comparative and historical perspective on these types of engagements. Anthony James Joes examines nine case studies, ranging from the role of Francis Marion, the Swamp Fox, in driving Cornwallis to Yorktown and eventual surrender to the U.S. support of Afghan rebels that hastened the collapse of the Soviet Empire. He analyzes the origins of each conflict, traces American involvement, and seeks patterns and deviations. Studying numerous campaigns, including ones staged by Confederate units during the Civil War, Joes reveals the combination of elements that can lead a nation to success in guerrilla warfare or doom it to failure. In a controversial interpretation, he suggests that valuable lessons were forgotten or ignored in Southeast Asia. The American experience in Vietnam was a debacle but, according to Joes, profoundly atypical of the country's overall experience with guerrilla warfare. He examines several twentieth-century conflicts that should have better prepared the country for Vietnam: the Philippines after 1898, Nicaragua in the 1920s, Greece in the late 1940s, and the Philippines again during the Huk War of 1946-1954. Later, during the long Salvadoran conflict of the 1980s, American leaders seemed to recall what they had learned from their experiences with this type of warfare. Guerrilla insurgencies did not end with the Cold War. As America faces recurring crises in the Balkans, sub-Saharan Africa, the Middle East, and possibly Asia, a comprehensive analysis of past guerrilla

engagements is essential for today's policymakers.

Living Next to the Giant Le Hong Hiep, 2017-03-09

This book examines how the interaction between political and economic factors under Doi Moi has shaped Vietnam's China policy and bilateral relations since the late 1980s. After providing a historical background, the book examines the conflicting effects that Doi Moi has generated on bilateral relations. It demonstrates that Vietnam's economic considerations following the adoption of Doi Moi contributed decidedly to the Sino-Vietnamese normalization in 1991 as well as the continuous improvements in bilateral ties ever since. At the same time, Vietnam's economic activities in the South China Sea and China's responses have intensified bilateral rivalry and put their ties under considerable strains. The book goes on to argue that Doi Moi has indeed brought Vietnam newfound opportunities to develop a multi-level omni-directional hedging strategy against China. Finally, the book concludes by looking at the prospects of democratization in both countries and assessing the future trajectory of their relations under such circumstances. As the most comprehensive and up-to-date survey of Vietnam's relations with China over the past thirty years, the book is a useful reference source for academics, policymakers, students, and anyone interested in contemporary Vietnam foreign policy in general and Vietnam-China relations in particular.

Vietnam Báo Chí Marc Phillip Yablonka, 2018-12-01

A military journalist shines a light on the unsung heroism and contributions of enlisted combat reporters in the Vietnam War in these revealing interviews. Vietnam Báo Chí brings together interviews with thirty-five combat correspondents who reported on the Vietnam War. These brave men and women wrote the stories, captured the images, and filmed the television coverage of their fellow servicepeople on

battlefields from the Mekong Delta to the DMZ and from the Tet Offensive in 1968 to the fall of Saigon in 1975. Here you will meet Marine Dale Dye, who would go on to play an integral role in the making of the film *Platoon*; Green Beret Jim Morris, whose books, including *War Story*, recount the combat operations of Special Forces units in the Central Highlands; John Del Vecchio, whose classic work of fiction, *The 13th Valley*, mirrors his own existence as a combat correspondent with the 101st Airborne Division; and US Navy Frogman Chip Maury, renowned for his free-fall and underwater photography in Vietnam. Yablonka's extensive experience as a military journalist brought him into contact with many of these combat correspondents, giving him a unique insight into their professions and lives. This book honors these brave chroniclers in uniform who brought the Vietnam War home to us. "[This] valuable collection of profiles . . . shines light on the all-but-forgotten role of American military báo chí (press in Vietnamese).
