Ghana Philip Briggs, 2019-08-05 This 8th edition of Bradt's Ghana remains the only dedicated guidebook on the market and the most comprehensive source of travel information on the first country in sub-Saharan Africa to gain independence and the world's second-largest producer of chocolate. Covering everything from Ghana's 550km of Atlantic coastline to its remote and sparsely populated northern border with Burkina Faso, this new edition has been thoroughly updated and is an ideal companion no matter what your interests are. Written by Philip Briggs, arguably the world's most experienced guidebook writer, it covers everything from inexpensive opportunities to see wildlife to cultural and historical aspects such as the slave trading posts. Background, practical and health information are complemented by a dedicated, illustrated chapter on wildlife, 63 maps and 18 chapters split across five regional sections, from Accra and surrounds to the coast, through eastern and central Ghana, right up to the north. The popular Cape Coast and the Ashanti regions are both covered, as is the increasingly high-profile Chale Wote Street Art festival. Friendly, safe and inexpensive, Ghana is an ideal destination for first-time visitors to Africa. It is rich in little-visited national parks, forest reserves, cultural sites and scenic waterfalls and blessed with bleached white beaches and the lush rainforest of the Atlantic coastline. Bradt's Ghana is accompanied by a dedicated, updated website run by the author himself and caters for everyone from birdwatchers to bar-hoppers. Whether you want to cruise the world's largest man-made reservoir, Lake Volta, on a pokey old steamer, hike with elephants in Mole National Park, or party all night in Accra's glittering Osu district, Bradt's Ghana is an indispensable companion.

Costa Blanca Mountain Adventures Mark Eddy, 2022-09-15 There are few destinations in Europe where you can enjoy typical 'summer' outdoor pursuits in the middle of winter. However, Spain's Costa Blanca is one such place and the range and quality of activities on offer is outstanding. This multi-activity guide presents a handpicked selection of 60 ridge routes, via ferratas, canyons, sport-climbing crags, trad-climbing crags, hikes, trail runs and road-cycling routes to inspire keen adventurers to explore the region's striking ridges, peaks, crags and barrancos (canyons). A broad spectrum of activities is covered - although since many of the routes involve climbing skills and rope-work, the guide is particularly well suited to climbers interested in a multi-activity holiday - and there are plenty of mid-grade options. Although quieter in winter, Costa Blanca is well served for accommodation and facilities, with easy access from Alicante. The guide includes plenty of useful information to help you plan your holiday and directions to help you locate the start-point for each activity. All of the activities are clearly graded and include route description and mapping and - for the climbing routes and via ferratas - photo topos illustrating the line of the route. Handy tables summarise the key information, making it easy to choose an activity to suit. With inspiring colour photography to whet your appetite, Costa Blanca Mountain Adventures is the

perfect companion to discovering the adventures that await in this bounteous region.

Building from Tradition Elizabeth M. Golden,2017-12-22 Building from Tradition examines the recent resurgence of interest in the handmade building and the use of local and renewable materials in contemporary construction. In the past, raw materials were shaped to provide shelter and to accommodate the cultural, social, and economic needs of individuals and communities. This is still true today as architects, engineers, and builders turn once again to local resources and methods, not simply for constructing buildings, but also as a strategy for supporting social engagement, sustainable development, and cultural continuity. Building from Tradition features global case studies that allow readers to understand how building practices—developed and refined by previous generations—continue to be adapted to suit a broad range of cultural and environmental contexts. The book provides: • a survey of historical and technical information about geologic and plant-based materials such as: stone, earth, reed and grass, wood, and bamboo; • 24 detailed case studies examining the disadvantages and benefits to using traditional materials and methods and how they are currently being integrated with contemporary construction practices.
