The Barber Boom Tom Chapman,2018-03-02 This book contains well over a hundred years of barber experience and advice from inspirational barbers from around the globe. The Author, Tom Chapman is a barber, educator, ambassador, spokesperson, and founder of The Lions Barber Collective charity. He has been a part of the barbering world for over 15 years now, and intends to continue long into the future. He has travelled the world with his barbering career, has owned his own salon, and currently helps to guide aspiring barbers by running workshops and courses in his native Devon and beyond. Barbering is an industry like no other and over the past few years it has been subject to a huge resurgence. Never in its entire history has it been so popular, celebrated and respected. This book intends to find out why. Featuring interviews with well-respected barbers (including Alan Beak and The Bloody Butcher) and taking the readers all around the globe, The Barber Boom is an exploration into modern barbering culture through the eyes of those who helped craft it.

101 Things Your Barber/Stylist Hates (But May Never Tell You) Ronald Wilson,2015-07-08 Barbers and Hairstylist are people too. The only problem is the general public doesn't think so at times. This book is written to guide every customer on a personal, virtual tour through the head of barbers and hairstylists across the globe. From North Carolina to the coasts of sunny California, barbers and stylists are often blamed for everything under the sun pertaining to cutting and styling the hair of the American people. Things such as pushing a customer's hair line back, missing appointments that were not made, drying out a customer's scalp, giving someone's child a ringworm, making someone's hair fall or thin out, even down to "you are the reason I'm bald!" The list carries on, but I will spare myself the time and get down to other areas that need to be discussed.

(C)hair Science Dr. Salman Malik,2022-01-04 In the study of all sciences, chemistry is considered the central science. This is simply because it is essential to the study of all other sciences and (although not obvious), is fundamentally core to hairstyling and professional barbering. Without truly appreciating the chemistry, a barber or stylist will be deprived of the know-how behind the central component which drives the industry and their profession. Understanding hair chemistry is now more important than ever as it has served in some civilisations to represent power, beauty and even survival. (C)hair science is a book written by an ex-academic scientist (and bioengineer) turned-entrepreneur and pro-barber. The manuscript provides scientific content that professional barbers can use to better understand hair both on a macro and micro scale.
