LATINITATIS RATIONES Paolo Poccetti, 2016-12-05 This volume assembles 50 contributions presented at the XVII International Colloquium on Latin Linguistics. They embrace essential topics of Latin linguistics with different theoretical and methodological approaches: phonetics, syntax, etymology and semantics, pragmatics and textual analysis. It is a useful resource for the study of

comparative and general linguistics, not only for linguists but also for scholars of classical philology.

The Oxford Book of Italian Verse XIIIth Century-XIX Century, 1910

Simplification, Explication and Normalization Margherita Ippolito, 2014-09-18 The search for general laws and regularities in Translation Studies gained new momentum in the 1990s when Baker (1993) promoted the use of large electronic corpora as research tools for exploring the linguistic features that render the language of translation different from the language of non-translated texts. By comparing a corpus of translated and non-translated English texts, Baker and her research team put forward the hypothesis that translated texts are characterized by some "universal features", namely simplification, explication, normalization and levelling-out. The purpose of this study is to test whether simplification, explication and normalization apply to Italian translations of children's books. In order to achieve this aim, a comparable corpus of translated and non-translated works of classic fiction for children has been collected and analysed using Corpus Linguistics tools and methodologies. The results show that, in the translational subcorpus, simplification, explication and normalization processes do not prevail over the non-translational one. Therefore, it is suggested that the status of translated children's literature in the Italian literary "polysystem" (Even-Zohar, 1979, 1990) and, from a general viewpoint, all the cultural, historical and social conditions that influence translators' activities, determine translation choices that can also tend towards processes different from those proposed by Baker.
