Extreme Air Sports Erin K. Butler, 2017-08-01
Extreme air sports--such as base jumping, skydiving, bungee jumping, and gliding--can be a rush. Jump overboard and explore the world from the eyes of an extreme athlete.

Birdmen, Batmen, and Skyflyers Michael

Abrams, 2007-12-18 The Wright Brothers were wimps. Or so you might think after reading this account of their unsung but even more daring rivals--the men and women who strapped wings to their backs and took to the sky. If only for a few seconds. People have been dying to fly, quite literally, since the dawn of history. They've made wings of feather and bone, leather and wood, canvas and taffeta, and thrown themselves off the highest places they could find. Theirs is the world's first and still most dangerous extreme sport, and its full history has never been told. *Birdmen, Batmen, and Skyflyers* is a thrilling, hilarious, and often touching chronicle of these obsessive inventors and eccentric daredevils. It traces the story of winged flight from its doomed early pioneers to their glorious high-tech descendants, who've at last conquered gravity (sometimes, anyway). Michael Abrams gives us a brilliant

bird's-eye view of what it's like to fly with wings. And then, inevitably, to fall. In the Immortal Words of Great Birdmen... "Someday I think that everyone will have wings and be able to soar from the housetops. But there must be a lot more experimenting before that can happen." –Clem Sohn, the world's first batman, who plummeted to his death at the Paris Air Show in 1937 "The trouble was that he went only halfway up the radio tower. If he had gone clear to the top it would have been different." –Amadeo Catao Lopes in 1946, explaining the broken legs of the man who tried his wings "One day, a jump will be the last. The jump of death. But that idea does not hold me back." –Rudolf Richard Boehlen, who died of jump-related injuries in 1953 "It turned out that almost everyone from the thirties and forties had died. That just made me want to do it more." –Garth Taggart, stunt jumper for The Gypsy Moths, filmed in 1968 "You have to be the first one. The second one is the first loser." –Felix Baumgartner, who in 2003 became the first birdman to cross the English Channel

Memoirs From the Edge: Exploring the Line Between Life and Death Jeb Corliss, 2022-04-28 Jeb Corliss is one of the most iconic BASE jumpers and wingsuit pilots of our time, and his autobiography is an odyssey into madness. Corliss breaks and rebuilds himself time and again, learning what only pain and daring can teach. The tales he brings back offer insight into the darkness that exists within the mind as well as his own unique way of coping. Many grapple with mental illness in one way or another, and Corliss gives a glaringly

honest view of his struggle while traversing the world's most dangerous sports.

Learning to Fly Steph Davis, 2013-04-02 WITH A NEW EPILOGUE BY THE AUTHOR World-class free climber Steph Davis delivers a “thrilling and infectiously interesting” (San Francisco Book Review) memoir about rediscovering herself through love, loss, and the joy of letting go. The paperback includes a new epilogue in which Davis shares how her husband Mario's tragic accident has affected her relationship to climbing and flying. Steph Davis is a superstar in the climbing community and has ascended some of the world's most challenging and awe-inspiring peaks. But after her first husband makes a controversial climb in a national park, the media fallout escalates rapidly and in one fell swoop leaves her without a partner, a career, a source of income...or a purpose. In the company of only her beloved dog, Fletch, Davis sets off on a search for a new identity and discovers skydiving. Falling out of an airplane is completely antithetical to the climber's control she'd practiced for so long, but she perseveres, turning each daring jump into an opportunity to fly, first as a skydiver, then as a base jumper. As she opens herself to falling, she also finds the strength to open herself to love again, even in the wake of heartbreak. And before too long, she meets someone who shares her passion for living life to the limit. With gorgeous black-and-white photos throughout, *Learning to Fly* is Davis's fascinating account of her transformation. From her early tentative skydives, to zipping into her first

wingsuit, to surviving devastating accidents against the background of breathtaking cliffs, to soaring beyond her past limits, she discovers new hope and joy in letting go.

Above All Else Dan Brodsky-Chenfeld, 2011-09-15 World famous competitive skydiver and coach Dan Brodsky-Chenfeld presents proven tools and techniques for success and explains how they can be used in everyday life. Dan survived a plane crash from which sixteen of the twenty-two people on board were killed. He was left critically injured and woke up from a six-week-long coma with a broken neck, broken skull, severe head trauma, a collapsed lung, and other serious internal injuries. Against all odds, Dan recovered and went on to become one of the greatest competitive skydiver in the world. With the love and support of friends and family, Dan was able not only to resurrect his life but return to skydiving to achieve greater heights than he could have ever imagined. His techniques and methods for excelling are applicable to all people, no matter their goals. Dan uses his experiences to teach the lessons he's learned—as a competitor, coach, business owner, father, and husband—to help others achieve their dreams, overcome obstacles, and reach their peak performance.

Extreme Sports Medicine Francesco Feletti, 2016-09-19 This technically oriented book on medicine as applied to extreme sports offers broad coverage of the field extending well beyond the usual focus on major trauma and acute injuries. In addition to the injuries and diseases associated with individual extreme sports, this

book also addresses the topics of psychology, dermatology, ophthalmology, infectious diseases, physiology, nutrition, training, injury prevention strategies, rehabilitation, doping, treatment in hostile environments, and legal aspects.

Innovative and less frequently considered topics are also discussed, such as recent advances in protective equipment and materials, the effects of exposure on whole-body vibration, and cold exposure risk management. More than 60 of the most authoritative experts from across the world have contributed to this book, drawing on their personal experiences and including practical examples whenever relevant. Both subject matter and illustrations have been selected with the utmost care, the latter including photographs of world-class athletes. The book's multidisciplinary approach to the subject ensures that it will be relevant to a wide readership.

Air Sports Ellen Labrecque, 2011-07-01 Introduces air sports, including BASE jumping, hot air ballooning, and wingsuit flying.

Base 66 Jevto Dedijer, 2004-11 BASE 66 is the true, nerve-wracking account of three young skydivers and their quest for membership in the most select extreme sports club on earth: The BASE club. In order to become a full-fledged member, Jevto Dedijer, Bernard Poirier, and Scott Elder had to parachute from the top of a building, an antenna tower, a bridge and a cliff, and survive to tell the story--a feat only some 800 adrenaline addicted people have succeeded in doing. In BASE 66, Jevto Dedijer tells the tale of his hunger for the ultimate adrenaline rush. He and his

companions shared several near death experiences while traveling across Europe with their parachutes and beer in Bernard's dented Renault 4. They were pioneers in a sport so dangerous that several of their fellow BASE jumpers died in action. BASE 66 is a fascinating story about life and death, terror and joy, and intimate friendship. It is an account of extraordinary people taking a step beyond the edge. Yuri Kuznetsov--BASE 416 Everyone will enjoy reading Jevto's thrilling and humorous tale of his fascinating BASE odyssey and his discovery of a way of life that surpasses artificial boundaries and provides lifelong inspiration. Jean Boenish--BASE 3

High Infatuation Steph Davis, 2007-03-09 * A collection of vivid, intimate essays and prose poetry on the universal themes of life, love, friendship, personal empowerment, and more, told through a career in climbing * 40 percent of these pieces debut here for the first time * Davis has been profiled in publications including Outside, Men's Journal, W Magazine, and Sports Illustrated. Throughout her life, Steph Davis has chosen to take risks, to trust her impulses, to make decisions based on what feels right inside -- and never look back. Studying to be a concert pianist, she quit music the day she was introduced to rock climbing. Later, she abandoned the respectability of university life and pursuit of a law degree to become a dirtbag climber, living out of her grandmother's hand-me-down Oldsmobile sedan with Fletcher, a heeler mix dog. Today, through courage and perseverance, Davis is a high-profile athlete

whose sponsors have included Patagonia, Mammut, Clif Bar, Five Ten and Cascade Designs. In *High Infatuation*, Davis writes on the universal themes of life, love, friendship, personal empowerment, and more, told through a career in climbing. We wait with her in the tent through weeks of rain, wind, snow, and sleet, hoping for the weather to improve in the mountains of Patagonia, then race with her up a towering rock wall of Yosemite's El Capitan in a single day. More than adventure stories, these pieces reveal Davis' soul. They draw us into her struggles with safety, independence, ambition, and compassion. By following the journey of this remarkable woman, we learn what it means to live a truly adventurous life.

BASE Jumping Jessica Cohn, 2013-01-01 BASE Jumping is the ultimate adrenaline rush. Leaping off a bridge or cliff with nothing but a parachute is thrilling, but a risk few are willing to take. Readers will dive headfirst into the world of BASE jumping through exciting and engaging text. Find out what surfaces BASE jumpers jump off of, and what risks they take for a thrill. Full-color photographs show the gravity-defying feats of BASE jumping while educating readers on the science of the sport. K2 Ed Viesturs, David Roberts, 2010-08-03 A

thrilling chronicle of the tragedy-ridden history of climbing the world's most difficult and unpredictable mountain, by the bestselling authors of *The Mountain and No Shortcuts to the Top* "Gripping . . . reveals a good deal about the rarefied noble-gonzo world of high-altitude mountaineering."—The New York Times Ed Viesturs, one of the world's premier high-altitude mountaineers, explores the remarkable history of K2 and of those who have attempted to conquer it. At the same time, he probes the mountain's most memorable sagas in order to illustrate lessons about the fundamental questions mountaineering raises—questions of risk, ambition, loyalty to one's teammates, self-sacrifice, and the price of glory. Viesturs knows the mountain firsthand. He and renowned alpinist Scott Fischer climbed it in 1992 and got caught in an avalanche that sent them sliding to almost certain death before Ed managed to get into a self-arrest position with his ice ax and stop both his fall and Scott's. Focusing on seven of the mountain's most dramatic campaigns, from his own troubled ascent to the 2008 tragedy, Viesturs crafts an edge-of-your-seat narrative that climbers and armchair travelers alike will find unforgettably compelling. With photographs from Viesturs's personal collection and from historical sources, this is the definitive account of the world's ultimate mountain, and of the lessons that can be gleaned from struggling toward its elusive summit.

Birdmen Lawrence Goldstone, 2014-05-06 From acclaimed historian Lawrence Goldstone comes a thrilling narrative of courage, determination, and competition: the story of the intense rivalry that fueled the rise of American aviation. The feud between this nation's great air pioneers, the Wright brothers and Glenn Curtiss, was a collision of unyielding and profoundly American personalities. On one side, a pair of tenacious siblings who together had solved the centuries-old riddle of powered, heavier-than-air flight. On the other, an audacious motorcycle racer whose innovative aircraft became synonymous in the public mind with death-defying stunts. For more than a decade, they battled each other in court, at air shows, and in the newspapers. The outcome of this contest of wills would shape the course of aviation history—and take a fearsome toll on the men involved. *Birdmen* sets the engrossing story of the Wrights' war with Curtiss against the thrilling backdrop of the early years of manned flight, and is rich with period detail and larger-than-life personalities: Thomas Scott Baldwin, or "Cap't Tom" as he styled himself, who invented the parachute and almost convinced the world that balloons were the future of aviation; John Moisant, the dapper daredevil who took to the

skies after three failed attempts to overthrow the government of El Salvador, then quickly emerged as a celebrity flyer; and Harriet Quimby, the statuesque silent-film beauty who became the first woman to fly across the English Channel. And then there is Lincoln Beachey, perhaps the greatest aviator who ever lived, who dazzled crowds with an array of trademark twists and dives—and best embodied the romance with death that fueled so many of aviation's earliest heroes. A dramatic story of unimaginable bravery in the air and brutal competition on the ground, *Birdmen* is at once a thrill ride through flight's wild early years and a surprising look at the personal clash that fueled America's race to the skies. Praise for *Birdmen* "A meticulously researched account of the first few hectic, tangled years of aviation and the curious characters who pursued it . . . a worthy companion to Richard Holmes's marvelous history of ballooning, *Falling Upwards*."—*Time* "The daredevil scientists and engineers who forged the field of aeronautics spring vividly to life in Lawrence Goldstone's history."—*Nature* "The history of the development of an integral part of the modern world and a fascinating portrayal of how a group of men and women achieved a dream that had captivated humanity for centuries."—*The Christian Science Monitor* "Captivating and wonderfully presented . . . a fine book about these rival pioneers."—*The Wall Street Journal* "[A] vivid story of invention, vendettas, derring-do, media hype and patent fights [with] modern resonance."—*Financial Times* "A powerful story that contrasts soaring hopes with the anchors of ego

and courtroom.”—Kirkus Reviews “A riveting narrative about the pioneering era of aeronautics in America and beyond . . . Goldstone raises questions of enduring importance regarding innovation and the indefinite exertion of control over ideas that go public.”—Publishers Weekly (starred review)
