Basic Desert, Reactive Attitudes and Free Will Maureen Sie, Derk Pereboom, 2017-10-02 Basic Desert, Reactive Attitudes and Free Will addresses the issue of whether we can make sense of the widespread conviction that we are morally responsible beings. It focuses on the claim that we deserve to be blamed and punished for our immoral actions, and how this claim can be justified given the philosophical and scientific reasons to believe that we lack the sort of free will required for this sort of desert. Contributions to the book distinguish between, and explore, two clusters of questions. The first asks what it is to deserve to be harmed or benefitted. What are the bases for desert – actions, good character, bad character, the omission of good character traits? The second cluster explores the disagreement between compatibilists and incompatibilists surrounding the nature of desert. Do we deserve to be harmed, benefitted, or judged, even if we lack the ability to act differently, and if we do not, what effect does this have on our everyday actions? Taken in full, this book sheds light on the notion of desert implicated in our practice of holding each other morally responsible. This book was originally published as a special issue of Philosophical Explorations.

What We Owe the Future William MacAskill, 2022-08-16 An Instant New York Times Bestseller “This book will change your sense of how grand the sweep of human history could be, where you fit into it, and how much you could do to change it for the better. It's as simple, and as ambitious, as that.” –Ezra Klein An Oxford philosopher makes the case for “longtermism” – that positively influencing the long-term future is a key moral priority of our time. The fate of the world is in our hands. Humanity's written history spans only five thousand years. Our yet-unwritten future could last for millions more – or it could end tomorrow. Astonishing numbers of people could lead lives of great happiness or unimaginable suffering, or never live at all, depending on what we choose to do today. In *What We Owe The Future*, philosopher William MacAskill argues for longtermism, that idea that positively influencing the distant future is a key moral priority of our time. From this perspective, it's not enough to reverse climate change or avert the next pandemic. We must ensure that civilization would rebound if it collapsed; counter the end of moral progress; and prepare for a planet where the smartest beings are digital, not human. If we make wise choices today, our grandchildren's grandchildren will thrive, knowing we did everything we could to give them a world full of justice, hope and beauty.

Artisan Sourdough Made Simple Emilie Raffa, 2017-10-24 The easy way to bake bread at home—all you need is FLOUR, WATER and SALT to get started! Begin your sourdough journey with the bestselling beginner's book on sourdough

baking—100,000 copies sold! Many bakers speak of their sourdough starter as if it has a magical life of its own, so it can be intimidating to those new to the sourdough world; fortunately with *Artisan Sourdough Made Simple*, Emilie Raffa removes the fear and proves that baking with sourdough is easy, and can fit into even a working parent's schedule! Any new baker is inevitably hit with question after question. Emilie has the answers. As a professionally trained chef and avid home baker, she uses her experience to guide readers through the science and art of sourdough. With step-by-step master recipe guides, readers learn how to create and care for their own starters, plus they get more than 60 unique recipes to bake a variety of breads that suit their every need. Featured recipes include: – Roasted Garlic and Rosemary Bread – Cinnamon Raisin Swirl – Blistered Asiago Rolls with Sweet Apples and Rosemary – Multigrain Sandwich Bread – No-Knead Tomato Basil Focaccia – Raspberry Gingersnap Twist – Sunday Morning Bagels – and so many more! With the continuing popularity of the whole foods movement, home cooks are returning to the ancient practice of bread baking, and sourdough is rising to the forefront. Through fermentation, sourdough bread is easier on digestion—often enough for people who are sensitive to gluten—and healthier. *Artisan Sourdough Made Simple* gives everyone the knowledge and confidence to join the fun, from their first rustic loaf to beyond. This book has 65 recipes and 65 full-page photographs.

Basic Sculptural Modeling Hella Loewe, 2006-01-01 In this well-illustrated book Hella Loewe describes her research and practice of working with modelling in the early years of a Steiner-Waldorf school. She describes meeting a class of mixed nationalities with social and behavioral challenges, and how she was able to temper this class through specific modelling techniques. Are the children coming into our classrooms today requiring more will-centered activities? Loewe believes this is so and challenges teachers to take a new look at the traditional Waldorf modelling curriculum through her re-examination of Rudolf Steiner's indications. Contents include: Modeling with Clay in the First Grade Step-by-Step Guide for Grades One through Three Practical Experiences About the Effects of Modeling with Clay Excerpts by Rudolf Steiner Regarding Sculptural Modeling
