Late Modernism and 'The English Intelligencer' Alex Latter,2015-06-18 Despite the brevity of its run and the diminutive size of its audience, The English Intelligencer is a key publication in the history of literary modernism in

the British Isles. Emerging in the mid-1960s from a dissatisfaction with the prevailing norms of 'Betjeman's England', the young writers associated with it were catalysed by the example of Donald Allen's The New American Poetry as they sought to establish a revitalised modernist poetics. Late Modernism and The English Intelligencer gives the first full account of the extraordinary history of this publication, bringing to light extensive new archival material to establish an authoritative contextualisation of its operation and its relationship with post-war British poetry. This material provides compelling new insights into the work of the Intelligencer poets themselves and, more broadly, the continued presence of an international poetic modernism as a vital force in Britain in the second half of the twentieth century.

This book includes: • Classroom-tested lesson ideas in English language arts, math, science and social studies mapped to ISTE and tech-related standards to support college- and career-readiness. • Lists of technology-embedded college- and career-readiness standards for each grade level, along with practical ideas and up-to-date resources (apps, software and websites) that can be used in meeting these standards. • Suggestions for addressing roadblocks to incorporating technology in the classroom. • Ways to incorporate staff development and parental support at the school level. Access to a companion website with information on the tools referenced in the text.
