Mobile Confederates from Shiloh to Spanish Fort

Arthur E. Green, 2012 The 21st Alabama Volunteers CSA was created in October 1861 and remained in the vicinity of Mobile, Alabama, for most of the war. It was staffed primarily by local Mobile area men supplemented with some additional men from South Alabama counties. The 21st Regiment included existing companies such as the French Guards, the Spanish Guards, the British Guards and the Mobile Cadets. It served gallantly at Shiloh in April 1862 and suffered heavily in that conflict.

Lieutenant George Dixon was a member of the 21st who was wounded at Shiloh; he later died with his crew in command of the submarine Hunley at Charleston after sinking the first enemy warship by submarine warfare. The 21st manned and defended the forts at the mouth of Mobile Bay, Fort Gaines, Fort Morgan and Fort Powell at Grant's Pass as well as forts at Oven Bluff and Choctaw Bluff on the Alabama and Tombigbee Rivers north of Mobile. The 21st suffered the siege and defeat at Spanish Fort in April 1865. The abstracted compiled service records of almost 3,000 men who served are contained in this roster. Entries are arranged alphabetically by surname. A brief history of the 21st Alabama Infantry Volunteers, an appendix and a bibliography add to the value of this work.

The Pictorial Field Book of the Civil War in the United States of America Benson John Lossing, 1877

Pictorial History of the Civil War V3 Benson Lossing, 2010-08-09 Supreme Court Justice Oliver Wendell Holmes claimed that historian Benson J. Lossing did more than any other man to make history interesting and popular. Lossing wrote his comprehensive three-volume history of the Civil War at a time when the facts were still fresh. Originally published in 1868, Volume Three covers the period from midsummer 1863 to the war's end in the spring of 1865. Lossing accompanies his

narratives of marches, battles, and sieges with maps and plans, includes biographical sketches of the prominent people from both sides of the conflict, and illustrates his history with hundreds of drawings and engravings by the author and others.

Green Heterogeneous Wireless Networks Muhammad Ismail, Muhammad Zeeshan Shakir, Khalid A. Qaraqe, Erchin Serpedin, 2016-08-12 This book focuses on the emerging research topic green

(energy efficient) wireless networks which has drawn huge attention recently from both academia and industry. This topic is highly motivated due to important environmental, financial, and quality-of-experience (QoE) considerations. Specifically, the high energy consumption of the wireless networks manifests in approximately 2% of all CO₂ emissions worldwide. This book presents the authors' visions and solutions for deployment of energy efficient (green) heterogeneous wireless communication networks. The book consists of three major parts. The first part provides an introduction to the green networks concept, the second part targets the green multi-homing resource allocation problem, and the third chapter presents a novel deployment of device-to-device (D2D) communications and its successful integration in Heterogeneous Networks (HetNets). The book is novel in that it specifically targets green networking in a heterogeneous wireless medium, which represents the current and future wireless communication medium faced by the existing and next generation communication networks. The book focuses on multi-homing resource allocation, exploiting network cooperation, and integrating different and new network technologies (radio frequency and VLC), expanding the network coverage and integrating new device centric communication paradigms such as D2D Communications. Whilst the book discusses a significant research topic supported with advanced mathematical analysis, the resulting algorithms and solutions are explained and summarized in a way that is easy to follow and grasp. This book is

suitable for networking and telecommunications engineers, researchers in industry and academia, as well as students and instructors.
