Simplified Design of Micropower and Battery Circuits John Lenk,1996 Simplified Design of Micropower and Battery Circuits provides a simplified, step-by-step approach to micropower and supply cell circuit design. No previous experience in design is required to use the techniques described, thus making the book well suited for the beginner, student, or experimenter as well as the design professional. Simplified Design of Micropower and Battery Circuits concentrates on the use of commercial micropower ICs by discussing selections of external components that modify the IC-package characteristics. The basic approach is to start design problems with approximations for trial-value components in experimental circuits, then to vary the component values until the desired results are produced. Although theory and mathematics are kept to a minimum, operation of all circuits is described in full. EDITOR'S CHOICE - Electronics (The Maplin Magazine), May 1996 John D. Lenk has been a technical author specializing in practical electronic design and troubleshooting guides for more than 40 years. The time has already lapsed when we thought we could greedily exploit the exhaustible natural resources of mother earth. Now we have come to know that the world is not a piece of commodity to squander her natural wealth without offsetting the cost of emission or discharge of waste. There is only one considerably serious concern that will markedly define the future consequence of this planet more than any other, is the threat of global warming"...Inter Govt Panel On Climate Change Climate change is no longer a dilemma or a riddle to solve. Science has proved it beyond reasonable doubt. It is happening here and now with all of us where we have already crossed multiple tipping points of no return. Climate change is very complex, yet the solution is very simple. "Just stop burning fossil fuels"...A K Singh "We had a 67 percent chance of limiting the global temperature rise to below 1.50 C till 2018. We emit 42 Gt of CO2 every year. Now we have left not more than 420 Gt of CO2 budget to squander at current emission level within roughly another 8 years"...IPCC page 108, chapter 2. "People are suffering. People are dying. Entire ecosystems are collapsing. We are in the beginning of mass extinction. And all you can talk about is money and fairy tales of eternal economic growth. How dare you" !....Greta Thunberg Sweden
