Corruption as an Empty Signifier Lucy Koechlin, 2013-05-23 Corruption as an Empty Signifier critically explores the ways in which corruption in Africa has been equated with African politics and political order, and offers a novel approach to understanding corruption as a potentially emancipatory discourse of political transformation.

Nathan Zuntz Hanns-Christian Gunga, 2009-02-27 This book focuses on the life and work of Nathan Zuntz (1847-1920), a German physiologist, who made significant contributions to high altitude physiology and aviation medicine. He achieved fame for his invention of the Zuntz-Geppert respiratory apparatus in 1886 and the first treadmill (Laufband) in 1889. He also invented an X-ray apparatus to observe cardiac changes during exercise and constructed a climate chamber to study exercise under varying and sometimes extreme climates. * Focuses on Zuntz's contribution to high altitude physiology and aviation medicine

Beta maritima enrico biancardi, Leonard W. Panella, Robert T. Lewellen, 2011-12-07 Along the undisturbed shores, especially of the Mediterranean Sea and the European North Atlantic Ocean, is a quite widespread plant called Beta maritima by botanists, or more commonly sea beet. Nothing, for the inexperienced observer's eye, distinguishes it from surrounding wild vegetation. Despite its inconspicuous and nearly invisible flowers, the plant has had and will have invaluable economic and scientific importance. Indeed, according to Linnè, it is considered the progenitor of the beet crops possibly born from Beta maritima in some foreign country. Recent molecular research confirmed this lineage. Selection applied after domestication has created many cultivated types with different destinations. The wild plant always has been harvested and used both for food and as a medicinal herb. Sea beet crosses easily with the cultivated types. This facilitates the transmission of genetic traits lost during domestication, which selection processes aimed only at features immediately useful to farmers and consumers may have depleted. Indeed, as with several crop wild relatives, Beta maritima has been successfully used to improve cultivated beet's genetic resistances against many diseases and pests. In fact, sugar beet cultivation currently would be impossible in many countries without the recovery of traits preserved in the wild germplasm. Dr. Enrico Biancardi graduated from Bologna University. From 1977 until 2009, he was involved in sugar beet breeding activity by the Istituto Sperimentale per le Colture Industriali (ISCI) formerly Stazione Sperimentale di Bieticoltura (Rovigo, Italy), where he released rhizomania and cercospora resistant germplasm and collected seeds of Mediterranean sea beet populations as a genetic resource for breeding and ex situ conservation. Retired since 2009, he still collaborates with several working breeders, in particular, at the USDA Agricultural Research Stations, at the Chinese Academy of Agricultural Science (CAAS), and at the Athens University (AUA). He has edited books, books chapters and authored more than 150 papers. Dr. Lee Panella is a plant breeder and geneticist with the USDA-ARS at Fort Collins, Colorado. He earned his B.S. in Crop and Soil Science from Michigan State University, an M.S. in Plant Breeding from Texas A&M University, and a Ph.D. in genetics from the University of California at Davis. His research focus is developing disease resistant germplasm using sugar beet wild relatives. He is chairman of the USDA-ARS Sugar Beet Crop Germplasm Committee and has collected and worked extensively with sea beet. Dr. Robert T. Lewellen was raised on a ranch in Eastern Oregon and obtained a B.S. in Crop Science from Oregon State University followed by a Ph.D. from Montana State University in Genetics. From 1966 to 2008 he was a research geneticist for the USDA-ARS at Salinas, California, where he studied the genetics of sugar beet and as a plant breeder, often used sea beet as a genetic source to produce many pest and disease resistant sugar beet germplasm and parental lines, while authoring more than 100 publications.

Access to Knowledge in the Age of Intellectual Property Gaëlle

Krikorian, Amy Kapczynski, 2010 A movement emerges to challenge the tightening of intellectual property law around the world. At the end of the twentieth century, intellectual property rights collided with everyday life. Expansive copyright laws and digital rights management technologies sought to shut down new forms of copying and remixing made possible by the Internet. International laws expanding patent rights threatened the lives of millions of people around the world living with HIV/AIDS by limiting their access to cheap generic medicines. For decades, governments have tightened the grip of intellectual property law at the bidding of information industries; but recently, groups have emerged around the world to challenge this wave of enclosure with a new counter-politics of access to knowledge or A2K. They include software programmers who took to the streets to defeat software patents in Europe, AIDS activists who forced multinational pharmaceutical companies to permit copies of their medicines to be sold in poor countries, subsistence farmers defending their rights to food security or access to agricultural biotechnology, and college students who created a new free culture movement to defend the digital commons. Access to Knowledge in the Age of Intellectual Property maps this emerging field of activism as a series of historical moments, strategies, and concepts. It gathers some of the most important thinkers and advocates in the field to make the stakes and strategies at play in this new domain visible and the terms of intellectual property law intelligible in their political implications around the world. A Creative Commons edition of this work will be freely available online.

Klima - der Weltuntergang findet nicht statt Gerd Ganteför, 2012 Panikmache oder sicheres Weltende? Was vom Klimawandel wirklich zu halten ist Kaum ein Thema erregt die Gemüter so wie die Frage, ob der Klimawandel uns alle ins Verderben stürzt oder wir nur einer Angst fördernden Kampagne hysterischer Umweltaktivisten aufsitzen. Die Diskussionen werden heiß geführt und münden oft in extreme Positionen und widersprüchliche Szenarien. Und eines ist bei alldem selten zu finden: verlässliche Orientierung. Genau diese bietet Gerd Ganteför mit seinem Buch. Orientierung durch Wissen Gerd Ganteför überprüft die gängigen Argumente, Mythen und Legend.

World Guide to Trade Associations ,2002 Volume I, Trade Associations contains entries for no fewer than 23,641 associations including every conceivable field of commercial, service and industrial activity, from the construction industry to demolition firms, from the chocolate and candy trade to dental equipment and dentures and from fire insurance to hoses. In contrast to other, similar reference works World Guide to Trade Associations also includes trade unions.

Intensivtierhaltung Barbara Wittmann, 2021-03-08 Intensivtierhaltung und die Art und Weise der Nahrungsmittelproduktion sind in den westlichen Industrienationen angesichts ökologischer, klimatischer und tierethischer Zusammenhänge in den letzten Jahren zunehmend in den Fokus gesellschaftlicher Aufmerksamkeit gerückt. Umgekehrt proportional zum Rückgang der Hofzahlen und Beschäftigten auf Bauernhöfen im ländlichen Raum ist der Beruf des Landwirts zu einer medial präsenten und kulturell aufgeladenen Projektionsfläche geworden. Barbara Wittmanns Untersuchung rückt die Landwirte und Landwirtinnen selbst in den Mittelpunkt und analysiert und kontextualisiert ihre Positionierungen zu Gesellschaft, ökonomischen, ökologischen sowie tierethischen Problemkomplexen. Sie zeigt, dass unser Bild von konventioneller Produktion sehr viel komplexer und weniger normativ gedacht werden muss.

The Secret Life of Flies Erica McAlister,2022-09 Dr. McAlister has captured her affection for the Diptera in *The Secret Life of Flies*, a short, rich book by turns informative and humorous, both a hymn of praise to her favorite creatures and a gleeful attempt to give readers the willies. -- New York Times An enjoyable and informative read. Highly recommended for anyone interested in biology and in particular those intrigued by entomology and zoology. -- Library Journal Stories and science about nature's most complex, crucial and highly adaptive insect. *The Secret Life of Flies* takes readers into the hidden world of snail killers, con artists, crazy sex and a great many silly names. It dispels common misconceptions about flies and reveals how truly extraordinary, exotic and important are these misunderstood creatures. There are 10 chapters: 1. The immature ones -- Squirmy wormy larvae can be just a bit unnerving. 2. The pollinators -- Those annoying No See Ums, or midge flies, are the only pollinator of the chocolate-producing cacao tree. 3. The detritivores -- These garbage eaters are often fluffy and thus water-repellent, good for a life spent in a sewer. 4. The vegetarians -- Entomological spelunkers, many of these flies prefer plant roots. 5. The fungivores -- The mushroom eaters include the dark-winged fungus gnats. 6. The predators -- Here are the most devious and imaginative methods of luring, capturing and eating prey. 7. The parasites -- Their methods of survival are often disgusting but the evolutionary genius is admirable. 8. The sanguivores -- Exactly why do we have blood-sucking disease-spreading mosquitos? 9. The coprophages -- The champions of dung, detritus and other unpleasant things. 10. The necrophages -- The body eaters without which we would be in a most disagreeable situation. In clear language, McAlister explains Diptera taxonomy and forensic entomology, and describes the potential of flies to transform their relationship with humans from one of disease vector to partner in environmental preservation. She has a wonderful knack for storytelling, deftly transforming what could be dry descriptions of biology, reproduction and morphology into entertainment. She takes readers to piles of poo in Ethiopia by way of underground caves, latrines and backyard gardens, and opens the drawers at the Natural History Museum to rhapsodize over her favorite flies.

The Tears of Re Gene Kritsky,2015-10-08 According to Egyptian mythology, when the ancient Egyptian sun god Re cried, his tears turned into honey bees upon touching the ground. For this reason, the honey bee was sacrosanct in ancient Egyptian culture. From the art depicting bees on temple walls to the

usage of beeswax as a healing ointment, the honey bee was a pervasive cultural motif in ancient Egypt because of its connection to the sun god Re. Gene Kritsky delivers a concise introduction of the relationship between the honey bee and ancient Egyptian culture, through the lenses of linguistics, archeology, religion, health, and economics. Kritsky delves into ancient Egypt's multifaceted society, and traces the importance of the honey bee in everything from death rituals to trade. In doing so, Kritsky brings new evidence to light of how advanced and fascinating the ancient Egyptians were. This richly illustrated work appeals to a broad range of interests. For archeology lovers, Kritsky delves into the archeological evidence of Egyptian beekeeping and discusses newly discovered tombs, as well as evidence of manmade hives. Linguists will be fascinated by Kritsky's discussion of the first documented written evidence of the honeybee hieroglyph. And anyone interested in ancient Egypt or ancient cultures in general will be intrigued by Kritsky's treatment of the first documented beekeepers. This book provides a unique social commentary of a community so far removed from modern humans chronologically speaking, and yet so fascinating because of the stunning advances their society made. Beekeeping is the latest evidence of how ahead of their times the Egyptians were, and the ensuing narrative is as captivating as every other aspect of ancient Egyptian culture.
