A Safer Place for Patients Great Britain: National Audit Office,2005-11-03 The Department of Health estimates that one in ten patients admitted to NHS hospitals will be unintentionally harmed (a rate similar to other developed countries), due to incidents such as an injury from a fall, medication errors, equipment related incidents, record documentation errors and hospital acquired infections. About half of such incidents could have been avoided, if lessons from previous incidents had been learned. This NAO report examines the progress being made in the NHS to improve the patient safety culture, to encourage incident reporting and to learn lessons for the future. The report finds that most trusts have developed a predominantly open and fair reporting culture at the local level, driven largely by the Department of Health's clinical governance initiative and more effective risk management systems. However, a 'blame culture' still exists in some trusts, and there have been delays in establishing an effective national reporting system. There is scope for improving strategies for sharing good practice and for monitoring that lessons are learned.

Seeing the Unseen Guoli Chen,Jianggan Li,2022-09-15 Meet the overnight tech success stories of China’s globalizing business landscape In the last few years, we have seen a meteoric rise of Chinese tech companies across the world. Alibaba stock price movements unnerved investors globally, venture capitalists searched for the next Meituan or Pinduoduo in Southeast Asia and Latin America, and of course, Tik Tok, the most popular content platform in the world today, originated from China. The founders of such companies are typically credited with the “tenacity to rough it out,” the “courage to venture into the unknown,” and the “vision to take their companies to new heights.” However, the same can be said about Silicon Valley founders, or any successful entrepreneur. So, what gives Chinese founders and their companies the advantage in becoming multi-billion global enterprises? How does their leadership set strategies? How do they motivate their people? How do they move so fast and defend their turf in China’s hyper-competitive tech market? When they expand overseas, how do they determine what they keep and what they need to let go of? And most importantly, what do these things mean to you as a competitor, investor, regulator, or even as an executive or customer of such companies? Seeing the Unseen: Behind Chinese Tech Giants’ Global Venturing answers these questions and delves into the fascinating world of Chinese logic that shapes how tech leaders make and implement decisions, many of which are seldom seen outside China. In this book, you will gain an accurate, concise understanding of Chinese tech companies' reflections as they scale. You will understand the different generations of Chinese tech giants from Alibaba, Tencent, Baidu and Huawei to Pinduoduo, Meituan, ByteDance, Xiaomi and more. In this Seeing the Unseen, the analysis behind the success and lessons learned is summarized into a unique framework that touches on People, Organization, and Product and Leadership (POP-Leadership). The book covers: How Chinese history, folklore and Mao Zadong’s political strategies have shaped the strategies of Chinese tech leaders, even today The mindsets of Chinese tech and internet companies and how they have evolved over the last two decades The unique business culture and leadership styles that steered these companies through uncertain and ultra-competitive periods How Chinese companies structure their organizations and products and how they remain agile as they scale The limitations of Chinese POP-Leadership, and what these companies must shed to keep up with international players in global markets How Chinese POP-Leadership is now becoming international, and how international players are leveraging these learnings How the worldwide expansion of Chinese companies will alter the business landscape in the coming decades Chinese firms undertaking overseas ventures can challenge our thinking on global strategy and implementation. This book gives you a better understanding of these emergent players in the global arena.
