*Teaching and Research in the Knowledge-Based Society* Futao Huang,Timo Aarrevaara,Ulrich Teichler,2022-06-22 This book addresses common themes relating to the teaching and research nexus in the knowledge-based society through historical, comparative and empirical perspectives. It analyzes traditions of academic systems and national initiatives, and other factors affecting the main characteristics of the teaching and research nexus in eleven case countries from Asia, Europe, North America and South America. The book identifies key challenges of the academy, and trends in relation to the teaching and research nexus. The focus of case countries is on the attitudes and activities of the academy, as reported in the international comparative survey "The Academic Profession in the Knowledge-Based Society" (APIKS) in 2017-18. The data compared with previous international comparative survey "The Changing Academic Profession" (CAP) in 2007-08 in most chapters to make time series changes. The book discusses the teaching and research nexus in the case countries similar to and different from those of reference countries drawing on findings from the international databanks of the two international comparative surveys and previous research.

**Handbook of Behavior Therapy in Education** S.N. Elliott,F. Gresham,J.C. Witt,2013-11-11 What do we know about behavioral analysis and intervention in educational settings? Given that educational institutions were among the first to embrace the new technology of behavior change in the late 1950s and early 1960s, it is apparent that we have had the opportunity to learn a great deal. The evolution of the field of behavior therapy has witnessed a change in the behavior therapist from an adolescent fascination with repeatedly demonstrating the effectiveness of the new technology to a mature recognition of the complex implications of the behavioral paradigm for individuals, systems, and society. Many facts now taken for granted were considered impossibilities a mere two decades ago. In her 1986 presidential address to Division 25 of the American Psychological Association, Beth Sulzer-Azaroff reviewed a number of changes in attitude in education that were strongly influenced by behavior therapy. Most educators now agree that (a) everyone can learn, (b) complex skills can be taught, (c) precise, general, and durable performance can be taught, and (d) barriers to learning can be overcome. In addition, we would add that behavior therapy is being applied to increasingly more complex human problems, such as social skill deficits, internalizing disorders, and dysfunctional systems and organizations.
