Ecosystem and Species Habitat Modeling for Conservation and Restoration Shalini Dhyani, Dibyendu Adhikari, Rajarshi Dasgupta, Rakesh Kadaverugu, 2023-05-02 This edited book is focused on SDG 15. This volume covers aspects of species and ecosystem modeling in understanding the complexity of ecological systems, restoration, protected area management, and species conservation. The book follows a systematic and situation-sensitive approach to discuss ecosystem and species modeling tools, approaches, science, case studies, opportunities, and gaps for enhancing conservation efforts, ensuring ecosystem resilience, and addressing sustainability issues. The book emphasizes on science, innovations, case studies, and strategic relevance as main pillars of using ecosystem and species modeling tools and implementing the outcomes and results. In addition, clear conceptual frameworks, elaborated methodologies, and their applications are included to support policy planning and interventions to reduce and reverse human encroachment in human-dominated natural ecosystems, their degradation, and loss of important species and ecosystem services. Essential information with a special focus on advances and opportunities in advancing the implementation of results and outputs of the modeling tools, challenges and constraints for addressing loss of ecosystem services, designing and implementing sustainable landscape restoration, environmental risk assessment, and finally understanding policy implications and concerns for mainstreaming modeling results in conservation planning and decision-making is included in the book. Further topics include ultimate translational value of modeling tools and efforts across transitional ecosystems and species habitat to provide better evidence to influence the nature-based solutions (NbS) and ecosystem health assessment using Red List of Ecosystems (RLE). The emerging roles of integrative socio-ecological as well as techno-cultural factors in promoting the relevance of ecosystem and species modeling is one of the key features of this book. This edited volume is of interest and useful to researchers, students, scholars, policy makers, forest managers, consultants, and policy makers in the fields of protected area management, forest department, conservation, modeling, climate change, and sustainability science, and also authors engaged in IPBES, IPCC, and several other assessments.

**Ancient and Traditional Foods, Plants, Herbs and Spices used in Diabetes** Rajkumar Rajendram, Victor R. Preedy, Vinood B. Patel, 2023-09-11 The use of different foods, herbs, and spices to treat or prevent disease has been recorded for thousands of years. Egyptian papyrus, hieroglyphics and ancient texts from the Middle East have described the cultivation and preparations of herbs and botanicals to “cure the sick.” There are even older records from China and India. Some ancient scripts describe the use of medicinal plants which have never been seen within European cultures. Indeed, all ancient civilizations have pictorial records of different foods, herbs, and spices being used for medical purposes. However, there are fundamental issues pertaining to the scientific evidence for the use of these agents or their extracts in modern medicine. These issues are explored in *Ancient and Traditional Foods, Plants, Herbs and Spices Used in Diabetes*. Features · Investigates alternative healthcare paradigms that use traditional dietary foods, plant-derived materials, and extracts to treat diabetes · Describes scientific studies using modern day biomedical techniques · Provides information on diets, specific agents, extracts and resources. · Many chapters focus on plant-derived material, providing a historical background, uses, toxicity, and cautionary notes and summary points. There have been considerable advances in scientific techniques over the last few decades. These have been used to examine the composition and applications of traditional cures. Modern science has also seen the investigation of herbs, spices and botanicals beyond their traditional usage. Diabetes is one of the most common diseases worldwide, with over 400 million people with the illness. With chapter contributions by an international panel of contributors, this book is useful for researchers in the area of functional foods. Diabetologists, nutritionists, endocrinologists, healthcare workers, and pharmacologists will also find this book extremely valuable.

The Biology of Sole José A. Munoz-Cueto, Evaristo Mañanós-Sánchez, F. Javier Sánchez-Vázquez, 2019-05-13 This book reviews up-to-date knowledge on the biology of sole (*Solea senegalensis* and *S. solea*). These flatfish species are increasingly important in Europe both from the ecological and production point of view. This book is divided into two sections: A. general fisheries, aquaculture and engineering overviews; B. physiological, developmental, rhythmic, welfare and genetic aspects which will be of immense interest for the aquaculture industry. Experts, from both academia and research institutes, provide their expertise on sole biology.

Carbon Nanotubes for Targeted Drug Delivery Md Saquib Hasnain, Amit Kumar Nayak, 2019-11-08 This book provides a detailed introduction to carbon nanotubes (CNTs) for targeted drug delivery. After a brief overview of the classification, preparation, and characterization of carbon nanotubes, it focuses on their use in targeted drug delivery. It presents CNTs for brain targeting, ocular targeting, cancer targeting, and lymphatic targeting, as well as antibody therapy. The book also includes chapters on carbon nanotubes for controlled drug delivery, transdermal drug delivery, solubility enhancement, vaccine delivery, gene delivery, and as quantum dots. Last but not least, it addresses the absorption and transportation of CNTs, toxicity and regulatory considerations, as well as clinical trials and the market status of CNTs. The book offers a comprehensive, self-contained reference guide, with all topics covered concisely and with the help of figures, tables and flowcharts.

Programming Languages and Systems Helmut Seidl, 2012-03-22 This book constitutes the refereed proceedings of the 21st European Symposium on Programming, ESOP 2012, held in Tallinn, Estonia, as part of ETAPS 2012, in March/April 2012. The 28 full papers, presented together with one full length invited talk, were carefully reviewed and selected from 92 submissions. Papers were invited on all aspects of programming language research, including: programming paradigms and styles, methods and tools to write and specify programs and languages, methods and tools for reasoning about programs, methods and tools for implementation, and concurrency and distribution.

**Proteomics of Peroxisomes** Luis A. del Río, Michael Schrader, 2018-10-30 This new edited volume in the Springer Subcellular Biochemistry Series presents a comprehensive, state-of-the-art overview of the proteomics of peroxisomes derived from mammalian, *Drosophila*, fungal, and plant origin, and contains contributions from leading experts in the field. The development of sensitive proteomics and mass spectrometry technologies, combined with bioinformatics approaches now allow the identification of low-abundance and transient peroxisomal proteins and permits to identify the complete proteome of peroxisomes, with the consequent increase of our knowledge of the metabolic and regulatory networks of these important cellular organelles. The book lines-up with these developments and is organized in four sections including: (i) mass spectrometry-based organelle proteomics; (ii) prediction of peroxisomal proteomes; (iii) analysis of peroxisome proteome interaction networks; and (iv) peroxisomes in relation to other subcellular compartments. The editor Luis A. del Río is Professor ad honorem of the Spanish National Research Council (CSIC) in the Group of Antioxidants, Free Radicals and Nitric Oxide in Biotechnology, Food and Agriculture, Department of Biochemistry and Cell & Molecular Biology of Plants, at the Estación Experimental del Zaidín, Granada, Spain. Del Río's research group focuses on the metabolism of reactive oxygen species (ROS), reactive nitrogen species (RNS) and antioxidants in plant peroxisomes, and the ROS- and RNS-dependent role of peroxisomes in plant cell signalling. The editor Michael Schrader is Professor of Cell Biology & Cytopathology in the Department of Biosciences at the University of Exeter, UK. Using mammalian peroxisomes as model organelles, Prof. Schrader and his team aim to unravel the molecular machinery and signalling pathways that mediate and regulate the formation, dynamics and abundance of these medically relevant cellular compartments.

**Map for 'Drug and Food' in Cancer Nutrition** Dr. Ugur Gogus,2017-06-24 We have to improve the strength of chemotherapeutic drugs in cancer treatments. On the other hand, these agents have many serious side effects. Although there has been no diet for the patients with cancer, media and authorities still continue to define a cliché nutrition program consisting of green leafy vegetables, fish meat, fruits, and olive oil. This cliché nutrition may help to protect the healthy consumers against cancer, but the nutrition program or diet changes when it comes to the consumers with cancer. Such a nutrition program can only be designed by evaluating and analyzing the antagonisms and synergisms of the anticancer drug administered and the active food compounds in each food. Only after these detailed evaluations could a nutrition program, which is specific for only the administered anticancer drug, can be designed. The book, which addressed more than three thousand studies in cancer nutrition and screened from Science Direct, CrossRef, Google, and PubMed databases, is a first step to meet this important demand of oncologists, nurses, dietitians, food scientists, and patients with cancer while it is the most detailed review in cancer nutrition currently.

**Art i societat** Fernando Castro,Joan A. Llinares,J.F. Yvars, Romà De la Calle,Carles Cortés Orts,Miquel Cruz,Enric Balaguer,Vicent Manuel Vidal,2019-02-12 El volum que els lectors tenen davant els seus ulls constitueix la, ara com ara, cinquena publicació de la Càtedra d'Art Contemporani Antoni Miró de la Universitat d'Alacant i arreplega les ponències que es van debatre en el curs d'estiu denominat «Art i societat. L'obra i el gest en Antoni Miró» que va tenir lloc al juliol de 2015 en la Universitat d'Alacant. Dirigit per Enric Balaguer i Joan A. Llinares tenia diferents objectius. En primer lloc, transmetre coneixements sobre l'evolució del concepte i la funció social de l'art; però també sobre la significació de l'estètica i l'ètica en els nostres dies. Els seus autors ens conviden, amb un profund coneixement de causa, a revisar actituds i a prendre decisions. A partir de consideracions «intempestives», com proclama Fernando Castro; o utilitzant les «esguards» sempre límpides i rotundes d'Antoni Miró, com defensa Romà de la Calle o l'encreuament entre poesia i pintura que, mitjançant Miquel Martí i Pol i a Antoni Miró ens proposa Miquel Cruz. Que l'art resulta imprescindible en una societat malmesa que anem descomponent a poc a poc ens ho recorda Josep Francesc Yvars, d'ací el necessari i imprescindible contrapunt que suposa l'actitud compromesa d'Antoni Miró que posen en relleu els treballs de Carles Cortés i Enric Balaguer. El llibre es tanca amb l'acte-recuperació d'un text-proposta redactat en 1972 per Vicent M. Vidal en el qual, evocant les figures de Jorge Oteiza, Pablo Serrano i el propi Antoni Miró, reflexiona sobre la incorporació—«enigmàtica», diu ell— d'obres d'art en gran format als espais urbans.

**Diabetic Neuropathy** Solomon Tesfaye,Christopher H. Gibbons,Rayaz Ahmed Malik,Aristidis Veves,2023-03-20 In this updated edition, leading medical specialists critically review for the general practitioner the latest techniques for the clinical management of diabetic neuropathy. The contributors focus on the practical aspects of diabetic neuropathy and describe in detail the treatments that are currently available or expected to become available in the near future. They also include concise discussions of the pathogenesis of diabetic neuropathy.

**Skills for Midwifery Practice Australian & New Zealand Edition** Sally-Ann De-Vitry Smith,Sara Bayes,2022-02-28 This text provides clear, easy-to-read guidance on more than 110 skills for midwifery students and midwives seeking to update their practice. Underpinned with the most recent evidence-based practice and research, the second edition walks the reader through general and basic skills in a sequential and logical manner, following a woman's journey through pregnancy, labour and birth, and postnatal care. With a focus on the performance of midwifery skills rather than on the theory of midwifery practice, Skills for Midwifery Practice Australia and New Zealand 2nd edition is an indispensable text to which students will return to again and again. Endorsed by the Australian College of Midwives Step-by-step instructions for each skill Images and diagrams to aid understanding A woman-centred approach and cultural considerations throughout Models of midwifery care (Continuity of Care and Lead Maternity Carer's Model) Australian/NZ specific guidelines, policies, statistics, terminology and medication administration guidelines

**Polyploidy** Yves Van de Peer,2023-02-01 This volume provides protocols on evidence for polyploidy and how it can be unveiled. Chapters guide readers through evolutionary experiments, measure effects of polyploidy, evidence for (remnants of) ancient WGDs, models of chromosome number evolution, population genomics approaches to study polyploidy, analysing genetic data from polyploid populations, Phylogenetic and phylogenomic methods, gene expression, gene regulation, unicellular alga (Chlamydomonas), and a fast-growing duckweed (Spirodela). Written in the format of the highly successful Methods in Molecular Biology series, each chapter includes an introduction to the topic, lists necessary materials and reagents, includes tips on troubleshooting and known pitfalls, and step-by-step, readily reproducible protocols. Authoritative and cutting-edge, Polyploidy: Method and Protocols aims to be of interest to experimental and computational (evolutionary) biologists, molecular biologists, and biotechnologists.

*Immunofluorescence in Clinical Immunology* Wulf B. Storch,2012-12-06 Immunofluorescence, a suitable laboratory method for the microscopic demonstration of antigens and antibodies in biological materials, useable, for example, to provide evidence for the pathogenesis of disease in histological or cytological preparations and for tumour cell differentiation. For this reason immunofluorescence has a decisive role as the method of choice for the diagnosis of auto-immune diseases. This primer on immunofluorescence techniques, which first appeared in 1979, is a richly illustrated handbook suitable for everyday practical work in the laboratory, useable as both an introduction to the subject as well as an atlas. In hardly any other area of medicine are there so many new findings to report. The second edition of this book is concerned not only with the detection methods which now form an essential and established part of diagnostic techniques, but also with the most recent research results such as the discovery of antibodies against Auerbach's plexus and against podocytes...

**Food and Fuel** Marcos Fava Neves,Mairun Junqueira Alves Pinto,Marco Antonio Conejero,Vinicius Gustavo Trombin,2011-09-25 This book is a contribution of the authors to the food - fuel debate. During 2007 and 2008 several factors led to the food inflation problem: growing population, income distribution, urbanization, biofuel, social programs, production scarcity etc.. Biofuel got most of the blame for food inflation but its responsibility was only limited. There are several possibilities of solving the food inflation problem that are discussed this book. It explores the example of Brazil's agricultural sector, where a quiet revolution occurred in the last 15 years. This development is leading to Brazil becoming one of the largest food exporters globally. This position will strengthen as an additional 100 million hectares becomes available for crop development. The second part of the book explores the basics of the sugar cane chain. Sugar cane occupies less than 2% of Brazilian arable land and supplies 50% of Brazilian car fuel. In 2010 Brazil produced 53% of the world's sugar. Sugar cane produces sugar, ethanol (used as car fuel), biogases that are used to co-generate electricity and other by-products. Biofuel is a booming industry. New technologies allow production of diesel and other fuels from cane. Sugar cane ethanol is the only renewable fuel that can currently compete with gasoline. Coca Cola just launched the plastic bottle with sugar cane plastic. This book helps us to understand Brazilian agribusiness and sugar cane economics from various perspectives e.g. international investments, sustainability, future trends and the strategic plan for the Brazilian industry.
