Planet Earth III Matt Brandon,Michael Gunton,Jonny Keeling,2023-10-19 The official tie-in to the third instalment in the legendary *Planet Earth* franchise Few places on Earth remain untouched by humans, creating challenges for the wildlife we share it with. We have entered a new age, and we must look at the splendour of the natural world through a different lens. From the depths of our oceans, to scorching deserts and the most remote jungles, *Planet Earth III* features spectacular places and surprising animal behaviours from all corners of our world. And for the first time, a human element is introduced to each landscape, highlighting how, in the age of the Anthropocene, today's planet has been forever changed by humanity and that wildlife now faces new challenges in our crowded, modern world. Featuring over 250 beautiful full-colour photographs, *Planet Earth III* reveals the wonders and trials of life on an increasingly fragile planet, bringing you closer than ever before to our world's most intriguing species, unseen landscapes and natural phenomena.

World of Wonders Aimee Nezhukumatathil, 2020-09-08 "A poet celebrates the wonders of nature in a collection of essays that could almost serve as a coming-of-age memoir." –Kirkus Reviews As a child, Nezhukumatathil called many places home: the grounds of a Kansas mental institution, where her Filipina mother was a doctor; the open skies and tall mountains of Arizona,

where she hiked with her Indian father; and the chillier climes of western New York and Ohio. But no matter where she was transplanted—no matter how awkward the fit or forbidding the landscape—she was able to turn to our world's fierce and funny creatures for guidance. "What the peacock can do," she tells us, "is remind you of a home you will run away from and run back to all your life." The axolotl teaches us to smile, even in the face of unkindness; the touch-me-not plant shows us how to shake off unwanted advances; the narwhal demonstrates how to survive in hostile environments. Even in the strange and the unlovely, Nezhukumatathil finds beauty and kinship. For it is this way with wonder: it requires that we are curious enough to look past the distractions in order to fully appreciate the world's gifts. Warm, lyrical, and gorgeously illustrated by Fumi Nakamura, *World of Wonders* is a book of sustenance and joy. Praise for *World of Wonders* Barnes & Noble 2020 Book of the Year An NPR Best Book of 2020 An Esquire Best Book of 2020 A Publishers Weekly "Big Indie Book of Fall 2020" A BuzzFeed Best Book of Fall 2020 "Hands-down one of the most beautiful books of the year." —NPR "A timely story about love, identity and belonging." —New York Times Book Review "A truly wonderful essay collection." —Roxane Gay, *The Audacity*

Wonders of the Universe Professor Brian Cox, Andrew Cohen, 2011-03-03 Recommended for viewing on a colour tablet. Professor Brian Cox is back with another insightful and mind-blowing exploration of space. This time he shows us our universe as we've never seen it before.

Seven Worlds One Planet Jonny Keeling, Scott Alexander, 2019-10-10 Welcome home. A place 200 million years in the making. Long ago, our planet had only one gigantic land mass. Then something monumental happened. That supercontinent ruptured and seven different worlds were born. Each of those worlds - or continents - evolved, and continues to evolve, its own way of life. From the jungle of the Congo or the majestic Himalayas to the densely populated wilds of Europe or the comparatively isolated Australasia, *Seven Worlds, One Planet* explores the natural wonders that give each of our continents its distinct character. Following the animals that have made these iconic environments their home, it discovers spectacular wildlife stories that reveal what makes each of these seven worlds unique. With a foreword by Sir David Attenborough and over 250 breathtaking images, including stills from the BBC Natural History Unit's spectacular footage, *Seven Worlds, One Planet* is a stunning exploration of the planet, and the worlds within it, that we call home.

Forces of Nature Professor Brian Cox, Andrew Cohen, 2017-03-09 Sunday Times Bestseller How did life on Earth begin? What is the nature of space and time? What are the chances that we will discover life on other worlds?

Earth Book, 2017-04

This is Planet Earth New Scientist, 2018-05-03 The ancient Greeks called it Gaia; the Romans Terra. We know it simply as Earth, the planet we call home. And what a planet it is. Formed around 4.6 billion years ago from the debris of the big bang and long-dead stars, at first it was nothing special, but somehow it evolved to become the most amazing place in the known Universe. The only living planet we know of, it also has a very unusual moon, a remarkably dynamic surface, a complex atmosphere and a deeply mysterious interior. *This is Planet Earth* is dedicated to the wonders of Planet Earth. Its past is long and dramatic and its future shrouded in mystery. Yet despite centuries of research, only now are we starting to understand Earth's

complexity. ABOUT THE SERIES New Scientist Instant Expert books are definitive and accessible entry points to the most important subjects in science; subjects that challenge, attract debate, invite controversy and engage the most enquiring minds. Designed for curious readers who want to know how things work and why, the Instant Expert series explores the topics that really matter and their impact on individuals, society, and the planet, translating the scientific complexities around us into language that's open to everyone, and putting new ideas and discoveries into perspective and context.

Earth from Space Michael Bright,Chloe Sarosh,2019-04-11 Disclaimer: book optimally viewed on a colour device. You don't know home until you leave it. With over 200 spectacular images, including astonishing satellite images and stills from the BBC Natural History Unit's footage, Earth from Space reveals our planet as you've never seen it before. For decades we competed to be the first to reach space, but it was when we looked back at Earth that we were truly awestruck. Now, for the first time, using advanced satellite images we can show the earth's surface, its mega structures, weather patterns and natural wonders in breathtaking detail. From the colours and patterns that make up our planet to the mass migrations and seismic changes that shape it, Earth from Space sheds new light on the planet we call home. It reveals the intimate stories behind the breathtaking images, following herds of elephants crossing the plains of Africa and turtles travelling on ocean currents that are invisible unless seen from space. The true colours of our blue planet are revealed, from the striped tulip fields of Holland to the green swirl of a plankton super bloom that attracts a marine feeding frenzy. Whether it's the world's largest beaver dam – so remote it was only discovered through satellite imagery – or newly formed islands born from volcanic eruptions, discover a new perspective on our ever-changing planet.

The Story of Planet Earth Renu Anand,2016-04-22 For thousands of years, humans have probed and pondered over our planetary home. How was the Earth formed? How old is it? How did it become a living world? Today, because of our expanded knowledge and the wonders of technology, we know a lot more about Earth than our ancestors. We know that it is an evolving planet, undergoing never-ending changes, perhaps at a pace unequalled in its recent, or even remote, past. The Story of Planet Earth gives a detailed, yet interesting, account of a lot more aspects related to the creation of Earth □ Earth's origin in light of the Big Bang explosion, arrival of water on its surface, formation of its atmosphere, evolution of life forms from unicellular organisms to giants like dinosaurs, changes from its core to crust and its current state in terms of unsettling global changes, a majority of which find their roots in our greed and thoughtlessness. The book goes beyond time, into the future, to see what may be in store for our forthcoming generations, if we don't care about this □home□ of ours.
