Excavating Memory Maria Theresia Starzmann, John R. Roby, 2016-02-25 In this compelling study, Maria Theresia Starzmann and John Roby bring together an international cast of experts who move beyond the traditional framework of the constructed past to look at not only how the past is remembered but also who remembers it. They convincingly argue that memory is a complex process, shaped by remembering and forgetting, inscription and erasure, presence and absence. Collective memory influences which stories are told over others, ultimately shaping narratives about identity, family, and culture. This interdisciplinary volume--melding anthropology, archaeology, sociology, history, philosophy, literature, and archival studies--explores such diverse arenas as archaeological objects, human remains, colonial landscapes, public protests, national memorials, art installations, testimonies, and even digital space as places of memory. Examining important sites of memory, including the Victory Memorial to Soviet Army, Blair Mountain, Spanish penitentiaries, African shrines, and the U.S.-Mexico borderlands, the contributors highlight the myriad ways communities reinforce or reinterpret their pasts.

Inverse and Risking Methods in Hydrocarbon Exploration Ian Lerche, 2005 This book looks at how modern developments have enhanced the utility of basin analysis in hydrocarbon exploration. A major factor is modern computing power, which enables complex Monte Carlo-type calculations to be rapidly carried out; a second is the transfer of concepts from the economic arena to the theatre of hydrocarbon production, for example setting risking procedures to cope with data uncertainties. In addition now there are available powerful methods for handling the determination of parameters in the highly non-linear world of equations describing various facets of basin analysis. Th.

Who Owns Culture? Susan Scafidi,2005 It is not uncommon for white suburban youths to perform rap music, for New York fashion designers to ransack the world's closets for inspiration, or for Euro-American authors to adopt the voice of a geisha or shaman. But who really owns these art forms? Is it the community in which they were originally generated, or the culture that has absorbed them? While claims of authenticity or quality may prompt some consumers to seek cultural products at their source, the communities of origin are generally unable to exclude copyists through legal action. Like other works of unincorporated group authorship, cultural products lack protection under our system of intellectual property law. But is this legal vacuum an injustice, the lifeblood of American culture, a historical oversight, a result of administrative incapacity, or all of the above? *Who Owns Culture?* offers the first comprehensive analysis of cultural authorship and appropriation within American law. From indigenous art to Linux, Susan Scafidi takes the reader on a tour of the no-man's-land between law and culture, pausing to ask: What

prompts us to offer legal protection to works of literature, but not folklore? What does it mean for a creation to belong to a community, especially a diffuse or fractured one? And is our national culture the product of Yankee ingenuity or cultural kleptomania? Providing new insights to communal authorship, cultural appropriation, intellectual property law, and the formation of American culture, this innovative and accessible guide greatly enriches future legal understanding of cultural production.
