**The Decade of the Multilatinas** Javier Santiso, 2013-04-25 Latin American multinationals (multilatinas) have been central in the rise of emerging markets in the last few decades. Their development comprises part of the global shift of wealth and power between nations. The rise of firms in a broad range of sectors - including construction, oil, telecommunications and the aeronautical industry - as important regional and global players is spreading: companies in Brazil, Mexico, Colombia, Chile and many others are part of this increasing phenomenon. This book analyses the trends, the countries and the firms involved, and explores the implications for the US, China, Spain and the rest of Europe. In particular, Javier Santiso examines how Spain might profit from positioning itself as a unique hub between Europe and Latin America. The Decade of the Multilatinas includes a wide range of statistical data which will be useful to scholars, policymakers and commentators on Latin America in particular, and international business and emerging markets more generally.

**Annual Competitiveness Analysis And Impact Estimation Of Exchange Rates On Exports From Sub-national Economies Of Indonesia** Khee Giap Tan, Nursyahida Binte Ahmad, S Shalini Sivakrishnan, Doris Wan Yin Liew, 2019-11-12 Indonesia is one of the largest economies in the world and is one of the major players in the global economy. The diversity in Indonesia's socio-economic structure from province to province and region to region warrants an in-depth inquisition at the sub-national level. This book forms part of the series of Asia Competitiveness Institute (ACI) annual flagship study on the competitiveness of the 34 provinces in Indonesia. Using over 100 indicators, the study covers four environments in (1) Macroeconomic Stability, (2) Government and Institutional Setting, (3) Financial, Businesses and Manpower Conditions and (4) Quality of Life and Infrastructure Development, and 12 sub-environments. This book also provides insights to the comparative strengths and weaknesses of the sub-national economies and conducts a 'What-ifs' policy simulation to craft targeted policy recommendations for each province. This sixth edition will continue to elucidate the competitiveness landscape of each province's competitiveness. Additionally, this edition will also feature commentaries by the local academics on the recent developments in the 34 provinces of Indonesia. In view of the importance of international trade to the Indonesia's economy, this book also features the study of impact estimation of exchange rates on exports in Indonesia.

**State-Owned Enterprises in the Global Economy** Maciej Bałtowski, Grzegorz Kwiatkowski, 2022-06-01 State-owned enterprises (SOEs) combine economic activities resulting from their position on the market with non-economic functions determined by the state owner. In many of the world's major economies, SOEs play an important role, and in some, such as China, India, Russia and Brazil, they are outright dominant. At the same time, the existence of SOEs is largely ignored by economic theory and the current figures on SOEs on a global scale available in the literature are questionable in terms of their methodological validity and thus they do not allow for a proper cross-country analysis. This book fills this research gap. It focuses on the scope and importance of SOEs in a broad group of the largest economies, primarily on a variety of quantitative estimates. It contains the results of an extensive and unique empirical study of 37 of the world's largest economies over the period from 2009 to 2018. The findings showed that the average share of SOEs – measured by operating revenues and total assets – in the group of the largest 100 enterprises (Top 100) of a given country is nearly 30%, while in the Top 20 group it is even slightly higher. The authors present an econometric analysis showing the relationship between the scope of SOEs and the various economic and non-economic characteristics of the studied set of countries. The book also contains an in-depth discussion of selected key issues, such as the functions of SOEs in various types of economies, the role of SOEs in capital markets and the phenomenon of SOEs with foreign capital. This work is addressed to both academic economists, dealing with macroeconomics and economic policy, as well as researchers and analysts from various international organizations and think-tanks.

**Indonesia Rising** Anthony Reid, 2012 There are reasons for thinking that this is at last Indonesia's moment on the world stage. Having successfully negotiated its difficult transition to democracy after 1998, Indonesia has held three popular elections with a low level of violence by the standards of southern Asia. Recently its economic growth rate has been high (above 6 per cent a year) and rising, where China's has been dropping and the developed world has been in crisis. Indonesia's admission in 2009 to the G20 club of the world's most influential states seemed to confirm a status implied by its size, as the world's fourth-largest country by population, and the largest with a Muslim majority. Some international pundits have been declaring that Indonesia is the new star to watch, and that its long-awaited moment in the sun may at last have arrived.

**Bear Markets and Beyond** Dhruvi Shah, 2020-10-08 \*WINNER\* 'SHORT BUSINESS BOOK OF THE YEAR' – THE BUSINESS BOOK AWARDS 2021 Unicorns, narwhals, yaks, cows and civets - what have all these creatures got to do with your hard-

earned cash? Well, far more than you would think at first glance. They are all beasts that appear in the global economic ecosystem. They pop up as warnings, messages, signals and useful analogies in order to help us navigate what can sometimes be a confusing, closed-off world. In this book, BBC journalists Dhruti Shah and Dominic Bailey guide you through the confusing world of business jargon with a bold, graphic bestiary. As well as more familiar terms such as piggy bank, loan sharks and rat race, there are alligator spreads - which occur when an investor will never be able to make a profit on their transactions, or a lobster trap, which is a type of strategy a company will deploy in order to prevent a hostile takeover. There is even the memorable honorific of 'vampire squid' given to Goldman Sachs.

**Leveraging Cultural Diversity in Emerging Markets** Marcus Goncalves,Finn Majlergaard,2015-12-02 Leveraging cultural diversity is an important element for competing in the global market. Understanding the overall macroeconomic landscape of emerging and frontier markets enables corporations and international business professionals to fully realize the potential for strategic globalization. Most transnational and multinational corporations have made substantial progress in their globalization efforts by establishing operations in several countries and offshoring certain processes to countries with capabilities and growth potential. However, while these recent globalization efforts have their roots in cost arbitrage, successful companies must understand that globalization can be a means for shoring up competitive advantage to diversify intellectual capabilities and growth and improve quality enhancement opportunities. This book looks at how one can move forward from the current situation. Most people still see cultural differences as a barrier to success. The authors demonstrate how one can, instead, leverage from the cultural diversity and create better, more competitive companies, better leaders, and hopefully a safer and more sustainable world.

**Decoding Customer Value at the Bottom of the Pyramid** Ritu Srivastava,2019-11-25 Mature businesses across all advanced countries are struggling to find new markets. Indian market has been estimated huge in size, approximately \$1.2 trillion in purchasing power parity for the households earning an annual income of less than \$4,000. This comes to almost 880 million of Indian population of which 22 percent is urban India and 78 percent rural India. Referred to as bottom of the pyramid/low income/subsistence markets, while these markets offer immense business opportunities they also pose challenges. The needs of this segment have to be addressed by the corporate world but it might need a new approach with new business frameworks for implementation. The companies must understand what constitutes value for this segment, how it is different from other segments and how firms can offer value through their market offerings; accordingly what could be the successful business models. Decoding Customer Value at the Bottom of the Pyramid: An Urban India Perspective answers these questions through a practical, rigorous and research oriented way. Most important to this end is the study and practice of international business and foreign trade.

**The Rise Of The New Economic Powers And The Changing Global Landscape** Haico Ebbers,2022-12-19 This book explores the catching-up process of a group of large emerging markets: the New Economic Powers. This process is extremely robust and should be considered as the defining trend of our age, resulting in a pivotal change in world economics and politics. The outcome is that the West cannot dominate the world as it did in the previous 200 years. Today's world is pluralistic, and the larger emerging markets are becoming increasingly influential. That is the new reality, which at times caused, and will cause, further discomfort and uncertainty in the West. In the eight chapters, the viewpoints on globalization of nine New Economic Powers are discussed. Each chapter is an essential element in understanding the process of globalization and the role the New Economic Powers play in it. Essentially, their views are guided by a fundamental different look about the role of the market and the government in society, compared to what we see in the West. The New Economic Powers understand the power of the market to create prosperity, but at the same time emphasize the need for government interference. This delicate balance is particularly visible with respect to their international trade and investment policies, which bring them in conflict with Western countries and multilateral institutions such as the WTO and the IMF. The book helps the reader to understand the fundamental choices made by policymakers in the New Economic Powers.
