**Construction Law, Costs and Contemporary Developments: Drawing the Threads Together** Julian Bailey,2018-11-15 Lord Justice Jackson's retirement in March 2018 concluded a career of almost 20 years on the bench. His judicial career has seen a remarkable transformation of construction law, construction law litigation and the litigation landscape more generally. Drawing the Threads Together is a Festschrift which considers many of the important developments in these areas during the Jackson era. The Festschrift discusses most of the leading construction cases decided by Lord Justice Jackson, with subject matter including statutory adjudication, fitness for purpose obligations, consideration, delays and extensions of time, liquidated damages, time bar provisions, the prevention principle, neighbour rights, limitation clauses, negligence, good faith, bonds and guarantees and concurrent duties of care. It also includes a discussion of the background to the Jackson Review of Civil Litigation Costs (2009-2010) and its impact on litigation, as well as considering the development of the Technology and Construction Court during and subsequent to Mr Justice Jackson's tenure as judge in charge of that court.

*Contracts for Construction and Engineering Projects* Donald Charrett,2021-12-22 Contracts for Construction and Engineering Projects provides unique and invaluable guidance on the role of contracts in construction and engineering projects. The work explores various aspects of the intersection of contracts and construction projects involving the work of engineers and other professionals engaged in construction, whether as project managers, designers, constructors, contract administrators, schedulers, claims consultants, forensic engineers or expert witnesses. Compiling papers written and edited by the author, refined and expanded with additional chapters in this new edition, this book draws together a lifetime of lessons learned in these fields and covers the topics a practising professional might encounter in construction and engineering projects, developed in bite-sized chunks. The chapters are divided into five key parts: 1. The engineer and the contract 2. The project and the contract 3. Avoidance and resolution of disputes 4. Forensic engineers and expert witnesses, and 5. International construction contracts. The inclusion of numerous case studies to illustrate the importance of getting the contract right before it is entered into – and the consequences that may ensue if this is not done – makes this book essential reading for professionals practising in any area of design, construction, contract administration, preparation of claims or expert evidence, as well as construction lawyers who interact with construction professionals.

*Building Contract Claims* David Chappell,Vincent Powell-Smith,John H. M. Sims,2008-04-15 Many building contract claims are ill-founded, often because the basic principles are misunderstood. This highly regarded book examines the legal basis of claims for additional payment, and what can and cannot be claimed under the main forms of contract. It includes chapters dealing with direct loss and expense, liquidated damages, extension of time, concurrency, acceleration, time at large, common law and contractual claims, global claims, heads of claim and their substantiation. The new fourth edition has been substantially restructured and updated. Nearly 100 additional cases have been added as well as four new contracts: the JCT Construction Management and Major Project contracts, the JCT Standard Form of Domestic Subcontract, and the Engineering and Construction Contract (the NEC Form). The book continues to use the JCT Standard Form (JCT 98) as the basis of the text, with important differences highlighted in the other forms. Seventeen forms are dealt with and they have all been updated since the last edition of this book. Understanding it is a core part of any construction student's degree and a vital part of the working life of professionals in the construction industry. It is ideal reading for both the student of construction and the professional seeking to update their knowledge.

Powell ]Smith and Furmston's Building Contract Casebook Michael Furmston,2012-01-11 Powell-Smith and Furmston's Building Contract Casebook The interaction between general principles and the provisions of the standard building and construction contracts is a central feature of construction law. The major part of the law is laid down in decided cases and construction professionals should be familiar with these cases, but the information is scattered throughout a large number of law reports. The fifth edition of Powell-Smith and Furmston's Building Contract Casebook is designed to help construction professionals become familiar with those key cases. It brings together a wide range of cases on the main aspects of the law of construction contracts, states the principle established by each case and gives a summary of the facts and the decision. For the majority of cases, verbatim extracts from the judgment are included. The casebook presents the leading cases on each topic, together with many lesser-known but important decisions. A number of useful decisions from the Commonwealth are also included. Throughout, the author's approach is practical rather than academic.
