Sustainable Industrial Engineering along Product-Service Life Cycle/Supply Chain João Carlos de Oliveira Matias,Susana Garrido Azevedo,Carina Pimentel,2021-08-25 Sustainable industrial engineering addresses the sustainability issue from economic, environmental, and social points of view. Its application fields are the whole value chain and lifecycle of products/services, from the development to the end-of-life stages. This book aims to address many of the challenges faced by industrial organizations and supply chains to become more sustainable through reinventing their processes and practices, by continuously incorporating sustainability guidelines and practices in their decisions, such as circular economy, collaboration with suppliers and customers, using information technologies and systems, tracking their products' life-cycle, using optimization methods to reduce resource use, and to apply new management paradigms to help mitigate many of the

wastes that exist across organizations and supply chains. This book will be of interest to the fast-growing body of academics studying and researching sustainability, as well as to industry managers involved in sustainability management.

The English Spa, 1560–1815 Phyllis May Hembry, 1990 Beginning in the reign of Queen Elizabeth I, members of the English nobility and gentry made a practice of taking relaxation at the country's inland spas. Opioid Food Peptides Mohammad Raies Ul Haq, 2020-07-15 This book compiles the latest research on food-derived opioid peptides, particularly those derived from milk. It describes in detail the structure, classification and, more importantly, physiological functions of these peptides. Presenting an interesting overview of the opioid receptors and receptor ligands, it examines the absorption, transport and degradation of these opioid peptides. Further, it highlights the production of β -casomorphins from only one variant of β -casein and its biological activities, and explores the generation of ab-lactorphin from bovine ab-lactalbumin and β b-lactorphin. The book also includes a section on the use of advanced biochemical and pharmacological techniques to analyze opioid peptides, discussing the extraction of protein from food sources, protein purification followed by SGID, filtration of peptides and analysis using analytical HPLC. Lastly, it offers insights into the significance of these peptides in the pharmaceutical industry and their potential role as therapeutic agents. This timely book is useful for researchers and students in the field of food sciences, dairy science,

agriculture and pharmacology. It is also of interest to industry experts.

Islamic Republic of Mauritania International Monetary Fund. Middle East and Central Asia Dept., 2018-12-13 Program implementation has been satisfactory. Macroeconomic stability has been maintained, external debt has been stabilized, and several reforms have been launched to modernize economic institutions and the policy framework. Growth is expected to accelerate this year to 31/2 percent, supported by FDI and public investment. While the outlook is positive owing to sustained growth in non-extractive sectors, the international environment is less favorable than during the first review. Higher oil import prices and lower commodity export prices weigh on the external and fiscal positions; the economy remains dependent on commodity exports; and debt vulnerabilities and poverty remain high. Downside risks related to global economic developments and regional security are elevated. On the upside, development of the offshore gas field could generate large revenues from 2022 despite short-term costs.
