Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Roll Models Richard Holicky, 2004 I thought life was pretty much over. Paul Herman I was afraid

people wouldn't see me for who I still was. Cathy Green I didn't need this to be a better person. Susan Douglas I wasn't sure I wanted to live "this way." Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your salvation or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your

disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? A wonderful roadmap with many alternate routes to living and thriving with SCI. Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center Avoids the trap of providing a "one size fits all mentality" and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading. Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences. Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies. Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades. A Framework for Assessing Effects of the Food System National Research Council, Institute of Medicine, Board on Agriculture and Natural Resources, Food and Nutrition Board, Committee on a Framework for Assessing the Health, Environmental, and Social Effects of the Food System, 2015-06-17 How we produce and consume food has a bigger impact on Americans' well-being than any other human activity. The food industry is the largest sector of our economy; food touches everything from our health to the environment, climate change, economic inequality, and

the federal budget. From the earliest developments of agriculture, a major goal has been to attain sufficient foods that provide the energy and the nutrients needed for a healthy, active life. Over time, food production, processing, marketing, and consumption have evolved and become highly complex. The challenges of improving the food system in the 21st century will require systemic approaches that take full account of social, economic, ecological, and evolutionary factors. Policy or business interventions involving a segment of the food system often have consequences beyond the original issue the intervention was meant to address. A Framework for Assessing Effects of the Food System develops an analytical framework for assessing effects associated with the ways in which food is grown, processed, distributed, marketed, retailed, and consumed in the United States. The framework will allow users to recognize effects across the full food system, consider all domains and dimensions of effects, account for systems dynamics and complexities, and choose appropriate methods for analysis. This report provides example applications of the framework based on complex questions that are currently under debate: consumption of a healthy and safe diet, food security, animal welfare, and preserving the environment and its resources. A Framework for Assessing Effects of the Food System describes the U.S. food system and provides a brief history of its evolution into the current system. This report identifies some of the real and potential implications of the current system in terms of its health, environmental, and socioeconomic effects along with a sense for the complexities of the system, potential metrics, and some of the data needs that are required to assess the effects. The overview of the food system and the framework described in this report will be an essential resource for decision makers, researchers, and others to examine the possible impacts of alternative policies or agricultural or food processing practices.

Sheldon, Beth S. Simon, Karen Clark Salinas, Natalie Rodriguez Jansorn, Frances L. Van Voorhis, Cecelia S. Martin, Brenda G. Thomas, Marsha D. Greenfeld, Darcy J. Hutchins, Kenyatta J. Williams, 2018-07-19 Strengthen programs of family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, the fourth edition of the bestseller *School, Family, and Community Partnerships: Your Handbook for Action*, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement from preschools, and elementary, middle, and high schools Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen and continually improve their programs of family and community engagement.

The Wine Bible Karen MacNeil, 2015-10-13 No one can describe a wine like Karen MacNeil.

Comprehensive, entertaining, authoritative, and endlessly interesting, *The Wine Bible* is a lively course from an expert teacher, grounding the reader deeply in the fundamentals—vine-yards and varietals, climate and terroir, the nine attributes of a wine’s greatness—while layering on tips, informative asides, anecdotes, definitions, photographs, maps, labels, and recommended bottles. Discover how to taste with focus and build a wine-tasting memory. The reason behind Champagne’s bubbles. Italy, the place the ancient Greeks called the land of wine. An oak barrel’s effect on flavor. Sherry, the world’s most misunderstood and underappreciated wine. How to match wine with food—and mood. Plus everything else you need to know to buy, store, serve, and enjoy the world’s most captivating beverage.

Urbanization, Biodiversity and Ecosystem Services: Challenges and Opportunities

Thomas Elmqvist, Michail Fragkias, Julie Goodness, Burak Güneralp, Peter J. Marcotullio, Robert I. McDonald, Susan Parnell, Maria Schewenius, Marte Sendstad, Karen C. Seto, Cathy

Wilkinson, 2013-09-21 Urbanization is a global phenomenon and the book emphasizes that this is not just a social-technological process. It is also a social-ecological process where cities are places for nature, and where cities also are dependent on, and have impacts on, the biosphere at different scales from local to global. The book is a global assessment and delivers four main conclusions: Urban areas are expanding faster than urban populations. Half the increase in urban land across the world over the next 20 years will occur in Asia, with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat

island effect and by altering precipitation patterns, which together will have significant impacts on net primary production, ecosystem health, and biodiversity Urban expansion will heavily draw on natural resources, including water, on a global scale, and will often consume prime agricultural land, with knock-on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted, which will constrain the protection of biodiversity and management of ecosystem services

The Jossey-Bass Handbook of Nonprofit Leadership and Management David O. Renz, 2016-08-15 The go-to nonprofit handbook, updated and expanded for today's leader The Jossey-Bass Handbook of Nonprofit Leadership and Management is the bestselling professional reference and leading text on the functions, processes, and strategies that are integral to the effective leadership and management of nonprofit and nongovernmental organizations. Now in its fourth edition, this handbook presents the most current research, theory, and practice in the field of nonprofit leadership and management. This practical, relevant guide is invaluable to the effective practice of nonprofit leadership and management, with expanded attention to accountability, transparency, and organizational effectiveness. It also extensively covers the practice of social entrepreneurship, presented via an integrative perspective that helps the reader make practical sense of how to bring it all together. Nonprofit organizations present unique opportunities and challenges for meeting the needs of societies and their communities, yet nonprofit management is more complex and challenging than ever. This Handbook provides a framework to help you lead and manage efficiently and effectively in this new environment. Building on solid current scholarship, the

handbook provides candid, practical guidance from nationally-recognized leaders who share their insights on: The relationship between board performance and organizational effectiveness Managing internal and external stakeholder relationships Financial viability and sustainability and how to enhance both for the long term Strategies to successfully attract, retain, and mobilize the very best of staff and volunteers The fourth edition of the handbook also includes content relevant to associations and membership organizations. The content of the handbook is supplemented and enriched by an extensive set of online supplements and tools, including reading lists, web references, checklists, PowerPoint slides, discussion guides, and sample exams. Running your nonprofit or nongovernmental organization effectively in today's complex and challenging environment demands more knowledge and skill than ever, deployed in a thoughtful and pragmatic way. Grounded in the most useful modern scholarship and theory, and explained from the perspective of effective practice, *The Jossey-Bass Handbook of Nonprofit Leadership and Management* is a pivotal resource for successful nonprofit leaders in these turbulent times.

Worlds of Literacy Mary Hamilton, David Barton, Roz Ivanič, 1994 The idea behind this book is that in complex societies like our own there are different worlds of literacy that exist side by side. People belong to different cultural groups: we lead different lives, we read and write different things in different ways and for different purposes. The idea that literacy is embedded in social context, that there are different literacies, is now accepted. This book presents a range of case studies describing some of these worlds of literacy and is carefully organised by theme, so as to bring out both the differences and connections between them. It will be a source book for students on courses of literacy studies. The case studies span the whole age range, but the book focuses particularly on the variety of uses of literacy in adult life, both inside and outside of formal education. The authors

argue that in order to understand literacy and help people learn to read and write, we must look beyond school to the everyday uses of written communication. The contributors come from diverse backgrounds: they include students and teachers in adult basic education, higher education and schools; others are community publishers and researchers, several of whom are internationally known. They share a commitment to plain, accessible language. The book is extensively illustrated and 'sign-posted' to enable readers to move easily between case studies and themes. This makes it a book to dip into which can also be enjoyed by anyone concerned with the role of written communication in education and society as a whole. The themes that are dealt with include different voices, literacy and identity, the role of literacy in making choices and change, collaborative writing and creating new forms of written expression; gender and literacy, bilingual literacy, spoken and written language, children and adult learners, public and private uses of literacy, and bureaucratic literacy.

International Business and Tourism Tim Coles, C. Michael Hall, 2008-02-13 Whether it's bungee jumping in Queenstown or visiting the Guinness factory in Dublin, where we travel - and what we do when we get there - has changed significantly in the past twenty years. This innovative textbook explores what is possibly the most unrecognized of international service industries, placing tourism in the context of contemporary globalization and trade-in services. It provides new perspectives on tourism as a form of international business, and the implications for firms, the state and individuals. Split into four separate sections, with introductions outlining the key themes in each, it examines

important topics such as: the role of governance and regulation in tourism services the effects of increased global mobility on tourism entrepreneurship how tourism businesses are becoming internationalized why other business sectors are increasingly interested in tourism. Case studies are used throughout to highlight important issues, from developments in the aviation industry to the rise of working holidays. This book gets to the core of a crucial service industry, and is essential reading for any researcher or student of tourism or international business.

Prosperity without Growth Tim Jackson, 2016-12-08 What can prosperity possibly mean in a world of environmental and social limits? The publication of *Prosperity without Growth* was a landmark in the sustainability debate. Tim Jackson's piercing challenge to conventional economics openly questioned the most highly prized goal of politicians and economists alike: the continued pursuit of exponential economic growth. Its findings provoked controversy, inspired debate and led to a new wave of research building on its arguments and conclusions. This substantially revised and re-written edition updates those arguments and considerably expands upon them. Jackson demonstrates that building a 'post-growth' economy is a precise, definable and meaningful task. Starting from clear first principles, he sets out the dimensions of that task: the nature of enterprise; the quality of our working lives; the structure of investment; and the role of the money supply. He shows how the economy of tomorrow may be transformed in ways that protect employment, facilitate social investment, reduce inequality and deliver both ecological and financial stability. Seven years after it was first published, *Prosperity without Growth* is no longer a radical narrative whispered by a marginal fringe, but an essential vision of social progress in a post-crisis world. Fulfilling that vision is simply the most urgent task of our times.

Flames of Discontent Gary Kaunonen, 2017-12-20 On June 2, 1916, forty mostly immigrant

mineworkers at the St. James Mine in Aurora, Minnesota, walked off the job. This seemingly small labor disturbance would mushroom into one of the region's, if not the nation's, most contentious and significant battles between organized labor and management in the early twentieth century. *Flames of Discontent* tells the story of this pivotal moment and what it meant for workers and immigrants, mining and labor relations in Minnesota and beyond. Drawing on previously untapped accounts from immigrant press newspapers, company letters, personal journals, and oral histories, historian Gary Kaunonen gives voice to the strike's organizers and working-class participants. In depth and in dramatic detail, his book describes the events leading up to the strike, and the violence that made it one of the most contentious in Minnesota history. Against the background of the physical and cultural landscape of Minnesota's Iron Range, Kaunonen's history brings the lives of working-class Finnish immigrants into sharp relief, documenting the conditions and circumstances behind the emergence of leftist politics and union organization in their ranks. At the same time, it shows how the region's South Slavic immigrants went from "scabs" during a 1907 strike to full-fledged striking members of the labor revolt of 1916. A look at the media of the time reveals how the three main contenders for working-class allegiances—mine owners, Progressive reformers, and a revolutionary union—communicated with their mostly immigrant audience. Meanwhile, documents from mining company officials provide a strong argument for corruption reaching as far as the state's then governor, Joseph A. A. Burnquist, whose strike-busting was undertaken in the interests of billion dollar corporations. Ultimately, anti-syndicalist laws were put in place to thwart the growing influence of organizations that sought to represent immigrant workers. *Flames of Discontent* raises the voices of those workers, and of history, against an injustice that reverberates to this day.

Obsessed by a Dream Aashild Sørheim, 2019-01-01 This Open Access biography chronicles the

life and achievements of the Norwegian engineer and physicist Rolf Widerøe. Readers who meet him in the pages of this book will wonder why he isn't better known. The first of Widerøe's many pioneering contributions in the field of accelerator physics was the betatron. He later went on to build the first radiation therapy machine, an advance that would eventually revolutionize cancer treatment. Hospitals worldwide installed his machine, and today's modern radiation treatment equipment is based on his inventions. Widerøe's story also includes a fair share of drama, particularly during World War II when both Germans and the Allies vied for his collaboration. Widerøe held leading positions in multinational industry groups and was one of the consultants for building the world's largest nuclear laboratory, CERN, in Switzerland. He gained over 200 patents, received several honorary doctorates and a number of international awards. The author, a professional writer and maker of TV documentaries, has gained access to hitherto restricted archives in several countries, which provided a wealth of new material and insights, in particular in relation to the war years. She tells here a gripping and illuminating story.

Wild Animals in Captivity H. Hediger, 2013-09-17 Wild Animals in Captivity covers some of the mistaken notions concerning the conditions of animals in captivity, most of which are the result of an anthropomorphic approach to the subject. This book is composed of 12 chapters and starts with an overview of the historical development of zoological gardens. The succeeding chapters deal with the territorial requirements and sociological factors in the wild life. These topics are followed by discussions of the wild animal's transition behavior from freedom to captivity; the physiological and psychological aspects of animal captivity; and the motive and situation of animal escapes. Other chapters emphasize the physical and biological environment of animals in captivity. The final chapters examine the problems related to feeding patterns, and nutrition of captive animals. These

chapters also explore the relationship between human and animal, their capacity to be tamed and trained. This book will prove useful to zoologists.
