Why We Play Roberte Hamayon, 2016 Play is one of humanity's straightforward yet deceitful ideas: though the notion is unanimously agreed upon to be universal, used for man and animal alike, nothing defines what all its manifestations share, from childish playtime to on stage drama, from sporting events to market speculation. Within the author's anthropological field of work (Mongolia and Siberia), playing holds a core position: national holidays are called Games, echoing in that way the circus games in Ancient Rome and today's Olympics. These games convey ethical values and local identity. Roberte Hamayon bases her analysis of the playing spectrum on their scrutiny. Starting from fighting and dancing, encompassing learning, interaction, emotion and strategy, this study heads towards luck and belief as well as the ambiguity of the relation to fiction and reality. It closes by indicating two features of play: its margin and its metaphorical structure. Ultimately revealing its consistency and coherence, the author displays play as a modality of action of its own. Playing is no 'doing' in the ordinary sense once wrote Johan Huizinga. Isn't playing doing something

else, elsewhere and otherwise ?

**Our Landscape Heritage** Vincent Frank Zelazny, New Brunswick. Department of Natural Resources, New Brunswick. Ecosystem Classification Working Group, 2007 Our Landscape Heritage provides an overview of the history and ecological makeup of the landscapes of New Brunswick to help ecological seekers starting out with basic knowledge about geology, soils, climate, and vegetation, to better understand why plants and animals are today distributed as they are. Part I outlines the rationale and history of ecological land classification (ELC) in New Brunswick, and presents basic scientific concepts and facts that help the reader to interpret the information that follows. Part II, Portrait of New Brunswick Ecoregions and Ecodistricts presents a detailed look at the variety and distribution of ecosystems across the geographic expanse of New Brunswick. Each of the seven chapters of Part II provides a high level description of the ecoregion, followed by detailed descriptions of each ecodistrict within the ecoregion.--Includes text from document.

**Handbook of Poisonous and Injurious Plants** Lewis S. Nelson, Michael J. Balick, 2020-05-18 This third edition of the Handbook of Poisonous and Injurious Plants is designed to assist the clinician in the initial response to the needs of a child or adult exposed to a poisonous or injurious plant. It highlights common and important plants that lead to the adverse effects upon exposure, and it describes the mechanisms of action of the implicated toxin, clinical manifestations, and specific therapeutics, as available, for each. This truly comprehensive resource is botanically rigorous with insights from both the pharmacognosy and medical literature. At the same time, it is also for those who are interested in growing and enjoying the plants in their environment, filling in a not-often-discussed botanical and horticultural niche that goes beyond their beautiful physical appearance.

Plants contain many useful chemicals that humans have used for millennia as botanical curatives. This book will help the reader understand the fine balance between a medication and a poison, why plants contain these natural substances, and their impact on the human body. With its thorough references and full-color photos of hundreds of potentially toxic and injurious plants inside and outside the home, this book is useful for identifying and addressing concerns about cultivated species and those found in the wild. This book will be of interest to botanists, horticulturists, clinicians, and naturalists as well as hikers, gardeners, and all those who simply enjoy the wonders of nature and the great outdoors.

**The Landscape of Lexicography** Alina Villalva, Geoffrey Williams, 2019-08-01 This book consists of a series of papers that look at three different aspects of the landscape as seen in dictionaries from across Europe. Multilingual diachronic case studies into lexicographical descriptions of flora, landscape features and colours concentrate on three supposedly simple words: daisies (*Bellis perenis* L.), hills and the colour red. The work is part of the ongoing LandLex initiative, originally developed as part of the COST ENeL - European Network for e-Lexicography - action. The group brings together researchers in lexicography and lexicology from across Europe and is dedicated to studying multilingual and diachronic issues in language. It aims to valorise the

wealth of European language diversity as found in dictionaries by developing and testing new digital annotation tools and a historical morphological dictionary prototype. Funded by the Horizon 2020 Framework Programme of the European Union

The Voyages of Jacques Cartier Ramsay Cook, 2017-05-24 Jacques Cartier's voyages of 1534, 1535, and 1541 constitute the first record of European impressions of the St Lawrence region of northeastern North America and its peoples. The Voyages are rich in details about almost every aspect of the region's environment and the people who inhabited it. As Ramsay Cook points out in his introduction, Cartier was more than an explorer; he was also Canada's first ethnographer. His accounts provide a wealth of information about the native people of the region and their relations with each other. Indirectly, he also reveals much about himself and about sixteenth-century European attitudes and beliefs. These memoirs recount not only the French experience with the Iroquois, but also the Iroquois' discovery of the French. In addition to Cartier's Voyages, a slightly

amended version of H.P. Biggar's 1924 text, the volume includes a series of letters relating to Cartier and the Sieur de Roberval, who was in command of cartier on the last voyage. Many of these letters appear for the first time in English. Ramsay Cook's introduction, 'Donnacona Discovers Europe,' rereads the documents in the light of recent scholarship as well as from contemporary perspectives in order to understand better the viewpoints of Cartier and the native people with whom he came into contact.

*The Sweetpotato* Gad Loebenstein,George Thottappilly,2009-03-21 In the last four decades of the twentieth century the use of sweetpotato was diversified beyond their classification as subsistence, food security, and famine-relief crop. In developing countries they serve both as human food and for feeding livestock. In Western countries they appeal to health conscious consumers because of their nutritional aspects. The sweetpotato is very high in nutritive value, and merits wider use on this account alone. The book has 2 parts. A general one giving up-to-date information on the history, botany, cultivars, genetic engineering, propagation, diseases and pests, nutritional data and marketing; and a second part presenting data on sweetpotato growing practices in different areas of the world. The information should be useful to researchers, practitioners and crop administrators in different countries.

**The Hurdy-Gurdy in Eighteenth-Century France** Robert A. Green,2016-10-31 The hurdy-

gurdy, or vielle, has been part of European musical life since the eleventh century. In eighteenth-century France, improvements in its sound and appearance led to its use in chamber ensembles. This new and expanded edition of *The Hurdy-Gurdy in Eighteenth-Century France* offers the definitive introduction to the classic stringed instrument. Robert A. Green discusses the techniques of playing the hurdy-gurdy and the interpretation of its music, based on existing methods and on his own experience as a performer. The list of extant music includes new pieces discovered within the last decade and provides new historical context for the instrument and its role in eighteenth-century French culture.
