Seth Kubersky

The Bed Bug Book Ralph H. Maestre,2011-02-23 Explains how to prevent bedbugs, identify them, and exterminate them, in a book that includes tips for travelers, advice on buying secondhand goods, and provides environmentally friendly methods and solutions.

The Bedbug: Its Relation to Public Health, Its Habits and Life History, and Methods of Control United States. Public Health Service,Maurice Crowther Hall,1937

Worried?: Science investigates some of life's common concerns Eric Chudler,Lise A. Johnson,2019-02-26 How scientific reasoning explains our most common daily fears—from germs to natural disasters and everything in between. Quick--what do you worry about most? Your cell phone giving you cancer? The public bathroom you're using being dirty? GMOs in your food? An asteroid strike? Something else? In this witty and evidenced-based book, Lise Johnson and Eric Chudler get to the root of our worries, all the while using science to help tame the anxiety beast. News media, social media, and every mom blog in the world are continuously flagging new things for you to worry about. From obsessing over Lyme disease-infested ticks to worrying about amusement park safety, no-one is immune to the pervasive effects of anxiety brought on by normal, everyday activity. Each topic in this wide-ranging book is subjected to scientific scrutiny, and assigned a place on the "worry index," with the authors concluding the only things worth worrying about are those those that can cause significant harm, are likely to happen, and are (somewhat) preventable. Whether you are a constant worrier or a stick-your-head-in-the-sand-and-hope-for-the best sort of person, you'll find something to love in this witty and informative book.

Made in Brooklyn Amanda Waselewski,2018-06-29 Made in

Brooklyn is a belated critique of the Maker Movement: from its origins in the nineteenth century to its impact on labor and its entanglement in the neoliberal economic model of the tech industry. Part history, part ethnography, *Made in Brooklyn* provides a unified analysis of how the tech industry has infiltrated artistic practice and urban space.

Unnatural Selection Emily Monosson, 2016-03-29 Gonorrhea. Bed bugs. Weeds. Salamanders. People. All are evolving, some surprisingly rapidly, in response to our chemical age. In *Unnatural Selection*, Emily Monosson shows how our drugs, pesticides, and pollution are exerting intense selection pressure on all manner of species. And we humans might not like the result. Monosson reveals that the very code of life is more fluid than once imagined. When our powerful chemicals put the pressure on to evolve or die, beneficial traits can sweep rapidly through a population. Species with explosive population growth--the bugs, bacteria, and weeds--tend to thrive, while bigger, slower-to-reproduce creatures, like ourselves, are more likely to succumb. *Unnatural Selection* is eye-opening and more than a little disquieting. But it also suggests how we might lessen our impact: manage pests without creating super bugs; protect individuals from disease without inviting epidemics; and benefit from technology

without threatening the health of our children.

Fire Sale Philip McKernan, 2010-10-12 The ads are everywhere. US real estate at rock-bottom prices. Posh homes in gated communities devalued 50% from a year ago. US real estate agents with nowhere to go in their own backyard are targeting Canada and other countries to attract buyers to the land of the foreclosed and the home of the bushwhacked. As the US housing market remains in crisis and foreign currencies increase in strength relative to the US dollar, foreign investment into real estate in America is reaching new highs, particularly in the sunbelt states. The opportunity to invest in these properties, either as an investment property or a vacation home, is made even more attractive in light of the record number of distressed properties (AKA foreclosures) on the market or in the pipeline due to high levels of unemployment in the US, high consumer debt, and ongoing fallout from the subprime crisis. But what does opportunity really look like? What due diligence must an investor do to buy with confidence? What are the pitfalls? The legal and tax considerations? While the property and price may look good on paper, how can you ensure that your investment is a sound one? Philip McKernan and his crack team of experts teach you everything you need to know about investing in distressed properties in the United States, including

sourcing distressed properties; building the right team of real estate agent, finance expert, lawyer, and accountant; understanding the tax and legal issues; and having an exit strategy. Make sure you're getting the best deals possible and avoiding any nasty surprises. Be prepared and aware, with *Fire Sale: How to Buy US Foreclosures*.
