Annual Analysis of Competitiveness, Simulation Studies and Development Perspective for 34 Greater China Economies: 2000-2010 Khee Giap Tan, Randong Yuan, Sangiita Wei Cher Yoong, Mu Yang, 2013-12-31 China is emerging as one of the economic giants of the world, and is gaining international influence and global leadership that commensurate with its rise. China's performance will have far-reaching consequences on whether the economic awakening of the country, which began more than three decades ago, can become a good model to be emulated by other developing economies. This book is a collection of policy papers and data-sets for the 34 Greater China economies. With a comprehensive approach to competitiveness, the research by Asia Competitiveness Institute (ACI) at Lee Kuan Yew School of Public Policy, National University of Singapore, takes into account different factors that collectively shape the ability of a nation to achieve substantial and inclusive economic development over a sustained period of time. ACI's methodology goes beyond rankings as it conducts policy simulations on how each economy can improve its competitiveness. These policy simulations are a compelling value-added proposition as they enable policymakers, industry leaders and administrators to identify relative challenges and opportunities, and to prioritise areas in crafting public policies and development strategies. Producer Services in China Anthony G. O. Yeh, Fiona F. Yang, 2013 This groundbreaking volume is one of the first to address questions related to the development of producer services in China. The contributions explore a wide range of associated topics including the characteristics of the growth of producer services and how this is related to China's economic and urban transition, the distribution of these services amongst Chinese cities, as well as drawing comparison between producer service development in China and Western counterparts. The text also discusses the dynamics of the development of these services in China and how the political-economic embeddedness of China has shaped the development of producer services. Finally, the consequences of this growth and how the economy and urban space have changed in response is explored, as well as the challenges Chinese cities face in moving towards a service economy, and how this can inform future public policies.

The Concrete Dragon Thomas J. Campanella, 2012-03-20 China is the most rapidly urbanizing nation in the world, with an urban population that may well reach one billion within a generation. Over the past 25 years, surging economic growth has propelled a construction boom unlike anything the world has ever seen, radically transforming both city and countryside in its wake. The speed and scale of China's urban revolution challenges nearly all our expectations about architecture, urbanism and city planning. China's ambition to be a major player on the global stage is written on the skylines of every major city. This is a nation on the rise, and it is building for the record books. China is now home to some of the world's tallest skyscrapers and

biggest shopping malls; the longest bridges and largest airport; the most expansive theme parks and gated communities and even the world's largest skateboard park. And by 2020 China's national network of expressways will exceed in length even the American interstate highway system. China's construction industry, employing a workforce equal to the population of California, has been erecting billions of square feet of housing and office space every year. But such extensive development has also meant demolition on a scale unprecedented in the peacetime history of the world. Nearly all of Beijing's centuries-old cityscape has been bulldozed in recent years, and redevelopment in Shanghai has displaced more families than 30 years of urban renewal in the United States. China's cities are also rapidly sprawling across the landscape, churning precious farmland into a landscape of superblock housing estates and single-family subdivisions laced with highways and big-box malls. In a mere generation, China's cities have undergone a metamorphosis that took 150 years to complete in the United States. The Concrete Dragon: China's Urban Revolution and What it Means for the World sheds light on this extraordinary chapter in world urban history. The book surveys the driving forces behind the great Chinese building boom, traces the historical precedents and global flows of ideas and information that are fusing to create a bold new Chinese cityscape, and considers the social and environmental impacts of China's urban future. The Concrete Dragon provides a critical overview of contemporary Chinese urbanization in light of both China's past as well as earlier episodes of rapid urban development elsewhere in the world--especially that of the United States, a nation that itself once set global records for the speed and scale of its urban ambitions.

Blood Brotherhood James Mullaney, Warren Murphy, Richard Sapir, 2023-09-01 Fiends from an ancient Chinese death cult bring forth a deadly virus that defies time and science. Their evil plan is to divide, conquer, and destroy the House of Sinanju once and for all...even if that means the death of every person on the planet. Talk about overkill! This won't be an easy task for Remo and Chiun, who have faced the ancient vampires before, and barely lived to tell the tale. Remo is hurt; while he clings to life, Chiun must face the terrifying, ghostly Leader, and his legions of acolytes, alone. But this fight may be too much for one man — even if that one man is the Master of Sinanju. Will Remo and Chiun be able to reunite in time to stop the Chinese plague in its tracks? Or will it be something that even CURE can't cure, and the Destroyer can't destroy? As the number of infected people continues to swell, the end of days keeps coming closer and closer...

Retail Market Study 2016 Marc-Christian Riebe, 2016-03-01 The Retail Market Study 2016 of The Location Group is the one and only study of its kind. With 155 of the most notable international cities of the fashion and retail world on more than 1,000 pages. Over 1,300 retailers, 1,030 shopping streets and 550 shopping malls were analyzed. So far the study reached more than 300,000 readers worldwide.

Beijing Qian Guo, 2020-03-17 This comprehensive volume examines contemporary life and history in Beijing, covering such topics as culture, politics, economics, crime, security, the environment, and more. While it is not China's most populated city, Beijing serves an important role as the political and cultural capital of the country. This volume examines Beijing's long history, contemporary society, and current challenges the city faces as we move further into the 21st century. Geared toward high school readers, undergraduates, and general readers interested in learning about Beijing, this volume consists of 12 narrative chapters focused on geography, history, and culture. Coverage includes location, people, history, politics, economy, environment and sustainability, local crime and violence, security issues, natural hazards and emergency management, culture and lifestyle, popular culture, and the future. Life in the City sidebars feature interviews and memories transcribed by people who are from, lived in, or traveled through Beijing, while other sidebars offer cultural fun facts and travel tips. This volume is the perfect read for anyone looking to get a better idea of what life is like in Beijing and how its culture has arrived at this point.

Project Finance B Rajesh Kumar,2022-05-03 Large projects are defining moments for companies and countries. When large projects succeed, they can dramatically improve the social and economic conditions in a region. This book focuses on major aspects of the world’s largest infrastructural, industrial and public service projects through the lens of structuring, valuing, managing risk and financing projects. The book analyses and discuss large projects in government, private and public and private partnership. The author sheds light into the attributes of project finance which have unique structural elements. The book focuses on case studies related to 50 mega projects which includes infrastructural projects, energy related projects, industrial projects, roads, ports and bridges among others. This book covers both the theoretical aspects of financing of mega projects and the practical applications by including case studies of the world’s largest projects in terms of value.

Aeromobilities Saulo Cwerner,Sven Kesselring,John Urry,2009-01-13 Aeromobilities is a collection of essays that tackle in many different ways the growing importance of aviation and air travel in our hypermobile, globalized world. Providing a multidisciplinary focus on issues ranging from global airports to the production of airspace, from airline work to helicopters, and from movement in airports to software systems, Aeromobilities seeks to enhance our understanding of space, time and mobility in the age of mass air travel. From Sao Paulo to Sydney, Aeromobilities draws on local experiences of airspaces to generate theory and research that are global in scope. It is the first book of its kind, bringing together a wide range of theoretical and methodological approaches to aviation and air travel in the social sciences and humanities, while emphasizing the central role of aeromobilities in contemporary social relations. In a world where virtually every aspect of social life is touched upon, in one way or another, by the complex global network of airline flows, with its large passenger aircraft and iconic international airports, Aeromobilities provides innovative analyses of some of the most fundamental and influential mobility networks of our time.

Development of Regional Airports M. N. Postorino,2010 This book gives an overview of the main aspects of the potential development of regional airports particularly the economic aspects, the role of low-cost companies, demand modelling, the airport, airline and access mode choices, and the relationships between capacity constraints on hubs and the growth of regional airports.

Air Cargo in Mainland China and Hong Kong Anming Zhang,George W.L. Hui,Lawrence C. Leung,Waiman Cheung,2017-09-29 Air traffic and the aviation industry have grown rapidly on the Chinese mainland in the two and a half decades since China's open door policy. Accession to the WTO will further stimulate trade and foreign direct investment (FDI), intensifying the demand for air cargo services. It will also open up the Chinese economy to

foreign participation in the transportation and logistics sectors, making these sectors more competitive and efficient. This book provides a systematic and comprehensive study of China's air cargo industry as well as its policy evolution. It covers the sources and destinations of air cargo in mainland China and Hong Kong: whence it comes and where it goes to. The major hubs of the transportation network - Beijing, Shanghai, Hong Kong, and Guangzhou - are discussed one by one. The virtual aspects of the network at these hubs in terms of IT applications, preparedness, and needs are examined and compared. Though the subject matter of this book is air cargo, there is considerable coverage of the aviation industry and policy on the mainland and Hong Kong. Changes have been happening so fast there are few books and publications that cover them systematically and comprehensively. Readership includes business executives in airfreight companies, airports and airlines, logistics specialists, aviation university lecturers and students.

Contemporary Logistics in China Ling Wang, Shao-ju Lee, Ping Chen, Xiao-mei Jiang, Bing-lian Liu, 2016-06-20 This book is the sixth volume in a series entitled "Contemporary Logistics in China," authored by researchers at the Logistics Center, Nankai University. In the spirit of the five preceding volumes, published annually in previous years, this book carries on the ideal of providing a systematic exposition on the development of logistics in China to the English-speaking community. Specifically, this volume captures China's logistics development at a crucial turning point. On the one hand, it echoes the new horizon advocated by the Government's One-Belt-One-Road Initiative for global cooperation; on the other, it resonates with the new blueprint of implementing the main contents of the 13th Five-year Plan on logistics development. Subjects covered include the macro-factors pertaining to logistics development, region-specific plans, industry-wide transformation, globally oriented moves, and current hot topics. Expositions and analyses on these subjects are based on the latest available sources and statistical data. As with the previous volumes, the ultimate aim of this book is to present a timely portrait of the rapid growth of China's logistics market and the status of its logistics industry's evolution. In so doing, this book offers an in-depth analysis of the critical issues and dilemmas amid the ongoing, dynamic and multi-faceted development, and presents a valuable reference source for interested readers in the academic and professional fields.

Airline Economics in Asia Xiaowen Fu, James Peoples, 2018-11-30 Covers low-cost carrier growth in Japan, competition against full service hub carriers in the Middle East, aviation market liberalization in Central Asia, high-speed-rail and airline competition in China, air transport and tourism in Asia and Australia, airline performance and outsourcing, airports development, and airport-airline cooperation.

Airport Finance and Investment in the Global Economy Anne Graham, Peter Morrell, 2016-10-04 While there are a multitude of publications on corporate finance and financial management, only a few address the complexity of air transport industry finance and scant attention has been given to airport financial management. This book deals exclusively with airport issues to rectify this. It does this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the industry. Airport Finance and Investment in the Global Economy bridges the gap between much academic research on airports published in recent years - lacking much managerial relevance - and real-world airport financial management. This is achieved by featuring expert analysis of contemporary issues specific to airport finance and funding strategies, illustrated by worked examples from a wide range of different countries to enhance understanding and create a global perspective. The book is designed to appeal to both practitioners and academics. Airport-specific topics include: performance measurement and benchmarking, valuation, tools for financial control and management, alternatives of financing, privatisation, competition and implications of economic regulation.

Beijing and Shanghai Emmanuelle Morgen, Deborah Kaufman, 2005 Presents information on accommodations, restaurants, cultural sites, shopping, and nightlife in Beijing and Shanghai.

Planning Asian Cities Stephen Hamnett, Dean Forbes, 2012-03-29 In *Planning Asian Cities: Risks and Resilience*, Stephen Hamnett and Dean Forbes have brought together some of the region's most distinguished urbanists to explore the planning history and recent development of Pacific Asia's major cities. They show how globalization, and the competition to achieve global city status, has had a profound effect on all these cities. Tokyo is an archetypal world city. Singapore, Hong Kong and Seoul have acquired world city characteristics. Taipei and Kuala Lumpur have been at the centre of expanding economies in which nationalism and global aspirations have been intertwined and expressed in the built environment. Beijing, Hong Kong and Shanghai have played key, sometimes competing, roles in China's rapid economic growth. Bangkok's amenity economy is currently threatened by political instability, while Jakarta and Manila are the core city-regions of less developed countries with sluggish economies and significant unrealized potential. But how resilient are these cities to the risks that they face? How can they manage continuing pressures for development and growth while reducing their vulnerability to a range of potential crises? How well prepared are they for climate change? How can they build social capital, so important to a city's recovery from shocks and disasters? What forms of governance and planning are appropriate for the vast mega-regions that are emerging? And, given the tradition of top-down, centralized, state-directed planning which drove the economic growth of many of these cities in the last century, what prospects are there of them becoming more inclusive and sensitive to the diverse needs of their populations and to the importance of culture, heritage and local places in creating liveable cities?
