George Lueddeke, PhD

**Being Global** Angel Cabrera, Gregory Unruh, 2012 Why do we need global leaders? The voyage of a pair of blue jeans, from inception to product release, offers a glimpse into the inexorably international--and complex--world of business today: The cotton may be picked from Peruvian or Ugandan fields, shipped to China for finishing, and then sent to Malaysia to be woven into yarn. The yarn goes to Thailand where the fabric is made, and the fabric is cut in Singapore before it is sent to Indonesia for sewing. Labels come from India. Zippers from Hong Kong. Thread from Malaysia. Buttons and rivets from Taiwan. The range of countries and systems involved in this production demonstrates that business in most industries (automotive and electronics, food and pharma) has become inescapably linked across borders. But it's more than mastering geography and culture that makes a leader today a different breed. You must master the complex mindset and competencies needed to lead in today's fully globalized world. No easy task. Enter Angel Cabrera and.

*Being Global* Ángel Cabrera, Gregory Unruh, 2012-03-27 What does it take to lead a global business? What makes being a global business leader today such a complex task? It's more than

mastering your knowledge of various geographies and cultures, though that is essential. But to succeed, you must also master the complex mind-set and competencies needed to lead in today's fully globalized world. Not an easy assignment. Enter Ángel Cabrera and Gregory Unruh. In *Being Global*, they pull from their extensive experience as well as research they conducted at the Thunderbird School of Global Management, which has been cited by the Financial Times, U.S. News and World Report, and The Economist for its authority on global business. In *Being Global*, Cabrera and Unruh define a new context for global leadership, vividly illustrating both the challenges and the opportunities facing today's executives. How can you be effective? What new skills must you learn in order to be successful? What do international teams do to stay connected while still producing results on a regional scale? *Being Global* is written for leaders at all levels of their careers—whether in big business or small, private sector or government—who aspire to think and act globally and who need some help getting there. Being a global citizen is just the starting point. Cabrera and Unruh provide the tools and guidance to help you develop even deeper leadership skills, to benefit both you and your organization.

*Being Local Worldwide* Jacques Bélanger, Christian

Berggren, Torsten Björkman, Christoph Kähler, 2018-08-06 Fortune

called Asea Brown Boveri, the giant multinational corporation

created in 1987, the most successful cross-border merger since

Royal Dutch linked up with Britain's Shell in 1907. The coming

together of two longtime national champions in the electrotechnical industry, Sweden's ASEA and Switzerland's Brown Boveri, marked the birth of a company with truly global aspirations, one whose apparent genius for combining strong central planning with local autonomy for its plants has made it a trendsetter. An international team of researchers assesses the dynamic interplay of the forces of convergence and diversity present in ABB. Together they examine the actual workings of this multinational—in order to learn to what degree the corporate strategies are achieved in its plants. Based on a multilevel organizational study, their book compares seven plants in six countries on three continents.

Connectography Parag Khanna, 2016-04-19 From the visionary bestselling author of *The Second World* and *How to Run the World* comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains, a world in which the most connected powers—and people—will win. Connectivity is the most revolutionary force of the twenty-first century. Mankind is reengineering the planet, investing up to ten trillion dollars per year in transportation, energy, and communications infrastructure linking the world's burgeoning megacities together. This has profound consequences for geopolitics, economics, demographics, the

environment, and social identity. Connectivity, not geography, is our destiny. In *Connectography*, visionary strategist Parag Mehta travels from Ukraine to Iran, Mongolia to North Korea, Pakistan to Nigeria, and across the Arctic Circle and the South China Sea to explain the rapid and unprecedented changes affecting every part of the planet. He shows how militaries are deployed to protect supply chains as much as borders, and how nations are less at war over territory than engaged in tugs-of-war over pipelines, railways, shipping lanes, and Internet cables. The new arms race is to connect to the most markets—a race China is now winning, having launched a wave of infrastructure investments to unite Eurasia around its new Silk Roads. The United States can only regain ground by fusing with its neighbors into a super-continental North American Union of shared resources and prosperity. *Connectography* offers a unique and hopeful vision for the future. Mehta argues that new energy discoveries and technologies have eliminated the need for resource wars; ambitious transport corridors and power grids are unscrambling Africa's fraught colonial borders; even the Arab world is evolving a more peaceful map as it builds resource and trade routes across its war-torn landscape. At the same time, thriving hubs such as Singapore and Dubai are

injecting dynamism into young and heavily populated regions, cyber-communities empower commerce across vast distances, and the world's ballooning financial assets are being wisely invested into building an inclusive global society. Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together. Praise for Connectography

"Incredible . . . With the world rapidly changing and urbanizing, [Khanna's] proposals might be the best way to confront a radically different future."—The Washington Post "Clear and coherent . . . a well-researched account of how companies are weaving ever more complicated supply chains that pull the world together even as they squeeze out inefficiencies. . . . [He] has succeeded in demonstrating that the forces of globalization are winning."—Adrian Woolridge, The Wall Street Journal "Bold . . . With an eye for vivid details, Khanna has . . . produced an engaging geopolitical travelogue."—Foreign Affairs "For those who fear that the world is becoming too inward-looking, Connectography is a refreshing, optimistic vision."—The Economist "Connectivity has become a basic human right, and gives everyone on the planet the opportunity to provide for their family and contribute to our shared future. Global Population Health and Well- Being in the 21st Century

George Lueddeke, PhD, 2015-11-05 “This is a remarkable, much-  
needed book that fills a significant gap in the health and social  
care literature in the early decades of the 21st century—public,  
global, clinical, ecological. It is powerful, ambitious, comprehensive,  
and sweeping at the same time that it is visionary, focused, and  
deep. Its power and passion are about the potential of population  
health and well-being optimally applied around the globe to help in  
creating a world that is healthier, safer, more just, and more  
sustainable.” —Barbara K. Rimer, DrPH, Alumni Distinguished  
Professor and Dean UNC Gillings School of Global Public Health,  
University of North Carolina at Chapel Hill (From the Foreword)  
Drawing on current research and the expertise of world-recognized  
leaders in public, global, clinical, and social health in both  
developed and developing nations, this book delivers an evidence-  
based examination of 21st-century challenges in global population

health and well-being. With special attention given to major initiatives of the United Nations, especially its Sustainable Development Goals (SDGs) 2016–2030, and the priorities of the World Health Organization (WHO) and the World Bank, Dr. Lueddeke articulates an imperative to adopt a “One World, One Health” view that recognizes the interdependence of humans, animals, plants, and the environment. The book/text promotes innovative and transformative paradigms for global public health practice, curricula, workforce training, and leadership. Intended for undergraduate and postgraduate courses in global public health, it will also be a welcome addition to the libraries of practitioners and policy-makers at all levels in the public/population/global health continuum. KEY CONTENT AREAS INCLUDE: The historical context of public health from early medicine to present day Exemplary educational initiatives: WHO education guidelines; curriculum commentaries from China, South Africa, and Cuba; a proposed Global Framework for Public Health Services and Functions; and case studies from South America (PAHO/ WHO), India (IPHF), and South Africa (PHASA) The changing roles and educational expectations of public and global health professionals in the early decades of the 21st century The complex

interdependence of natural, socioeconomic, and political systems at local, national, regional, and global levels The causes of interstate conflicts and longer-term challenges Leading change in a new era, transforming mind-sets, and improving and sustaining the health and well-being of the planet and its people An epilogue on global health, governance, and education with contributions from a think tank of 35 practitioners from 27 nations Supplemental materials, including text aims and objectives and a guide to research and learning resources developed by experts in the United States, Brazil, and the Netherlands, are available as digital downloads ALSO HIGHLIGHTED: 65 profiles of leading global health (and health-related) organizations 15 profiles of highly recognized schools and institutes of public health

**Being Nuclear** Gabrielle Hecht, 2014-08-29 The hidden history of African uranium and what it means—for a state, an object, an industry, a workplace—to be “nuclear.” Uranium from Africa has long been a major source of fuel for nuclear power and atomic weapons, including the bomb dropped on Hiroshima. In 2003, after the infamous “yellow cake from Niger,” Africa suddenly became notorious as a source of uranium, a component of nuclear weapons. But did that admit Niger, or any of Africa's other

uranium-producing countries, to the select society of nuclear states? Does uranium itself count as a nuclear thing? In this book, Gabrielle Hecht lucidly probes the question of what it means for something—a state, an object, an industry, a workplace—to be “nuclear.” Hecht shows that questions about being nuclear—a state that she calls “nuclearity”—lie at the heart of today's global nuclear order and the relationships between “developing nations” (often former colonies) and “nuclear powers” (often former colonizers). Hecht enters African nuclear worlds, focusing on miners and the occupational hazard of radiation exposure. Could a mine be a nuclear workplace if (as in some South African mines) its radiation levels went undetected and unmeasured? With this book, Hecht is the first to put Africa in the nuclear world, and the nuclear world in Africa. By doing so, she remakes our understanding of the nuclear age.

*How to be a Global Citizen* DK, 2021-09-21 Be the change in your community! This illustrated guide takes you through challenges the world is facing and how you and your kids can help overcome them. Aspiring activists and young community leaders need information and tools to be responsible citizens and changemakers in their communities. This activism book is packed

with content that will both educate and challenge young children aged 11+ years to make a difference. How to be a Global Citizen covers topics such as politics and voting, how to be responsible with online communication, preventing unfair discrimination, and protecting our environment. You'll find:

- Creative illustrations and clear text simplify challenging topics
- Advice for parents and teachers on explaining tricky social and environmental issues to children
- Steps to contribute to society at an individual level

Features on inspirational young role models leading the charge on different causes around the world Inspire youth with tales of their peers Young people are leading movements around the world, influencing their communities, and illuminating issues that have plagued our societies for far too long. Each chapter of How to be a Global Citizen provides information and ideas on how children can have important conversations amongst friends, family, and the wider community to affect change. Children are inspired by the stories of young leaders such as LGBTQ+ rights activist, Jazz Jennings, and environmentalist, Greta Thunberg. And each of their stories serves to be an example of what it means to be a responsible citizen, how to make the world a better place, and how to care for our societies and environment. *Climate Change and Human Well-Being Inka*

Weissbecker,2011-08-04 Climate change is increasing the severity of disasters and adverse weather conditions worldwide, with particularly devastating effects on developing countries and on individuals with lower resources. Climate change is likely to impact mental health and psychosocial well-being via multiple pathways, leading to new challenges. Direct effects such as gradual environmental changes, higher temperatures, and natural disasters, are likely to lead to more indirect consequences such as social and economic stressors, population displacement, and conflict. Climate change, largely the product of industrialized nations, is projected to magnify existing inequalities and to impact the most vulnerable, including those with low resources, individuals living in developing countries and specific populations such as women, children and those with pre-existing disabilities. This book outlines areas of impact on human well being, consider specific populations, and

shed light on mitigating the impact of climate change.

Recommendations discuss ways of strengthening community resilience, building on local capacities, responding to humanitarian crises, as well as conducting research and evaluation projects in diverse settings.

**Global Child Welfare and Well-being Susan C. Mapp, 2011**

Using the Convention on the Rights of the Child as a framework, issues such as child trafficking, child soldiers and child maltreatment are examined in nations around the world, as well as efforts to solve these problems.

*Measuring What Counts* Joseph E. Stiglitz, 2019-11-19 A bold agenda for a better way to assess societal well-being, by three of the world's leading economists and statisticians If we want to put people first, we have to know what matters to them, what improves their well-being, and how we can supply more of whatever that is. —Joseph E. Stiglitz In 2009, a group of economists led by Nobel laureate Joseph E. Stiglitz, French economist Jean-Paul Fitoussi, and Nobel laureate Amartya Sen issued a report challenging gross domestic product (GDP) as a measure of progress and well-being. Published as *Mismeasuring Our Lives* by The New Press, the book sparked a global conversation about GDP and a major movement

among scholars, policy makers, and activists to change the way we measure our economies. Now, in *Measuring What Counts*, Stiglitz, Fitoussi, and Martine Durand—summarizing the deliberations of a panel of experts on the measurement of economic performance and social progress hosted at the OECD, the international organization incorporating the most economically advanced countries—propose a new, beyond GDP agenda. This book provides an accessible overview of the last decade's global movement, sparked by the original critique of GDP, and proposes a new dashboard of metrics to assess a society's health, including measures of inequality and economic vulnerability, whether growth is environmentally sustainable, and how people feel about their lives. Essential reading for our time, it also serves as a guide for policy makers and others on how to use these new tools to fundamentally change the way we measure our lives—and to plot a radically new path forward.

### **How Was Life? Global Well-being since 1820**

OECD,2014-10-02 This book presents the first systematic evidence on long-term trends in global well-being since 1820 for 25 major countries and 8 regions in the world covering more than 80% of the world's population.

*The Practices of Global Citizenship* Hans Schattle, 2008 What is global citizenship, exactly? Are we all global citizens? In *The Practices of Global Citizenship*, Hans Schattle provides a striking account of how global citizenship is taking on much greater significance in everyday life. This lively book includes many fascinating conversations with global citizens all around the world. Their personal stories and reflections illustrate how global citizenship relates to important concepts such as awareness, responsibility, participation, cross-cultural empathy, international mobility, and achievement. Now more than ever, global citizenship is being put into practice by schools, universities, corporations, community organizations, and government institutions. This book is a must-read for everyone who participates in global events--all of us.

*Reporting Global while being Local* Saumava Mitra, Chris Paterson, 2021-05-11 International news has long been studied and understood as produced by outsiders – foreign correspondents working in exotic, international locales. This book challenges this established view by putting the spotlight on the insiders working in their own countries producing news for international audiences. Western male foreign correspondents who report from areas

affected by crises and conflicts for an ‘audience back home’ have long stood in as visible metaphors of international news production. But the understanding of who produces international news is starting to shift as scholars come to take into account the often-invisible role played by locally based, non-Western news-workers who have always been part and parcel of international news production. The roles and responsibilities of these professional, specialised locals within the global flow of news have only increased as falling news industry revenues have meant reductions in non-local staff in foreign news bureaus. Available research shows that the involvement of local journalists and fixers, as well as NGOs, as sources of news and information in international news production is marked by economic, socio-cultural and practice-related tensions. To shed light on these growing yet relatively less investigated changes happening in international news-making, this book brings together the latest of studies conducted on this form of journalistic labour around the world. This book will contribute to both the breadth and depth of our future understanding of local news-work that benefits distant audiences, and also help cement the place of such journalistic work as a vital topic of analysis in its own right. The chapters in this book were originally published as a

special issue of Journalism Studies.

*Us Before Me* P. Illingworth, 2016-04-30 Patricia Illingworth's short, powerful and passionate book argues that social capital should be an essential ethical concept guiding our actions, and explains how one might go about implementing this idea in a positive way.

**Getting In Is Not Enough** Colette Morrow, Terri Ann Fredrick, 2012-12 This anthology examines women's paid work in terms of both access to the economic system and the broader agenda of achieving feminist social change worldwide. Generations of feminists have linked women's empowerment, autonomy, and oppression to issues involving work. Most conflated women's economic and political clout with gender equity, arguing that increasing women's access to and leadership in the public workplace is crucial to the success of the feminist project. But recent debates about women's continued inability to gain equality in the workplace raise the need for new approaches to teaching about gender and employment. *Getting In Is Not Enough* responds to the challenge. Drawn from almost two decades of the *Feminist Formations* journal, the essays in this book critically examine assumptions about access and the ways in which women affect

and are affected by work in three major spheres: economic, social, and political. *Getting In Is Not Enough* focuses on how access-based feminism, a term developed by Colette Morrow and Terri Ann Fredrick, has both failed and succeeded in achieving equity and justice for women and looks at how transnational feminism has addressed these concerns using a global, fundamentally transformative approach. The contributors consider a wide range of issues, from an examination of the male/female wage gap that starts when girls are teenagers, to policewomen in Persian Gulf countries, to Latinas' politics, to Aboriginal health care workers, to secretarial work, and to feminist activism in Cuban hip hop.

Global Handbook of Quality of Life Wolfgang Glatzer, Laura Camfield, Valerie Møller, Mariano Rojas, 2015-01-22 This handbook provides a comprehensive historical account of the field of Quality of Life. It brings together theoretical insights and empirical findings and presents the main items of global quality of life and wellbeing research. Worldwide in its scope of topics, the handbook examines discussions of demographic and health development, the spread of democracy, global economic accounting, multi-item measurement of perceived satisfaction and expert-assessed quality of life and the well-being of children, women and poor people. It looks at well-

being in specific regions, including North and Sub-Saharan Africa, Asia, South America and Eastern and Western Europe. In addition to contributions by leading and younger authors, the handbook includes contributions from International Organizations about their own work with respect to social reporting.

*Introduction: Worlding Cities, Or the Art of Being Global* A Ong, 2011

**The Pursuit of Human Well-Being** Richard J. Estes, M. Joseph Sirgy, 2017-01-09 This handbook informs the reader about how much progress we, the human race, have made in enhancing the quality of life on this planet. Many skeptics focus on how the quality of life has deteriorated over the course of human history, particularly given World War II and its aftermath. This handbook provides a positive perspective on the history of well-being. Quality of life, as documented by scientists worldwide, has significantly improved. Nevertheless, one sees more improvements in well-being in some regions of the world than in others. Why? This handbook documents the progress of well-being in the various world regions as well as the differences in those regions. The broad questions that the handbook addresses include: What does well-being mean? How do different philosophical and religious

traditions interpret the concept of well-being within their own context? Has well-being remained the same over different historical epochs and for different regions and subregions of the world? In which areas of human development have we been most successful in advancing individual and collective well-being? In which sectors has the attainment of well-being proven most difficult? How does well-being differ within and between different populations groups that, for a variety of socially created reasons, have been the most disadvantaged (e.g., children, the aged, women, the poor, racial, ethnic, and sexual minorities)?

**The Global Findex Database 2017** Asli Demirguc-Kunt, Leora Klapper, Dorothe Singer, Saniya Ansar, 2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The

Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalfindex](http://www.worldbank.org/globalfindex).
