A Beneficial Ownership Implementation Toolkit Organization for Economic Cooperation and Development,Inter American Development Bank,2019-05-21 In 2016, the G20 called on the FATF and the Global Forum to propose ways to improve the implementation of the international standards on transparency, including on the availability of beneficial ownership information, and its international exchange. The Global Forum developed a framework of proposed actions to answer that call, including a plan to facilitate effective implementation through examples of good implementation and technical assistance. This toolkit is in furtherance of the Global Forum’s commitment to support countries’ effective implementation. It is intended to help jurisdictions to develop an understanding of the beneficial ownership concepts contained in the international standards of transparency and exchange of information, and for use in conjunction with technical assistance seminars. It will support policy and implementation discussions in conjunction with capacity building workshops and technical assistance activities carried out by the Global Forum Secretariat as well as other supporting international organizations.

License to Drill Cari L. Votava,Jeanne M. Hauch,Francesco Clementucci,2018-08-07 Natural resources have the transformational potential to support economic and political stability as well as contribute to national prosperity and economic development. However, in countries dependent upon natural resource sectors, poor management of these sectors often contributes to corruption, illicit financial flows (IFFs) and thus, poverty. Adequate transparency and accountability in regulatory management of these sectors is a challenge for resource rich countries. Poor licensing decisions in natural resource management can open a pandora’s box of corruption risks. This manual provides methods and options based on good practices to improve transparency, accountability, and integrity in the regulatory licensing process and integrity due diligence. The manual borrows models from the Basel Core Principle ‘fit and proper’ concept, and provides options for conducting effective (a) beneficial ownership; (b) criminal/legal; and (c) conflicts of interest checks, with a goal of integrating these into the regulatory licensing process. The manual also identifies common legal framework defects that can facilitate corruption risks, and offers options based on principles of regulatory integrity to reduce these risks. The good practices identified can help countries allocate limited financial resources in conducting thorough background checks in a cost-effective manner, as well as meet EITI’s requirements for public disclosure of beneficial owners and politically exposed persons. These strategies for reducing opportunities for corruption in extractive sectors can help reduce IFFs that can sap resources from the economy and inhibit a country’s ability to achieve the Sustainable Development Goals.
