*The Health Benefits of Dog Walking for Pets and People* Rebecca Ann Johnson, Alan M. Beck, Sandra K. McCune, 2011-04-15 Obesity is at epidemic levels worldwide. In the U.S. alone, it is estimated that by 2018 the cost of treating weight-related illnesses will double to almost \$350 billion a year. A 2010 report by the U.S. Surgeon General estimates that two-thirds of American adults and almost one in three children are now overweight or obese. Similar statistics emphasize the staggering problem in other industrialized countries. This volume originated in a special 2009 symposium funded in part by a grant from the Eunice Kennedy Shriver National Institute of Child Health and Development (NICHD) and sponsorship from Mars-Waltham® on how human-animal interaction may help fight obesity across the lifespan. It provides systematic presentation of the scientific evidence for this powerful expression of the benefits of the human-animal bond. The volume will be especially valuable as a sourcebook of evidence-based studies for public health professionals treating overweight humans and veterinarians treating obese dogs.

Retriever Troubleshooting Amy Dahl, John Dahl, 2012-07-03 Nationally-recognized retriever trainers John and Amy Dahl (The 10-Minute Retriever) tackle advanced training methods and problem-solving using a dog's innate strengths to compensate for its weaknesses. They discuss how dogs learn at an advanced level while encouraging readers to tailor their training so the dog keeps

progressing. Training topics include: how advanced training applies to hunting and to competition; blind retrieves; achieving range and multiple blinds; handling; hazards and formidable obstacles; more disciplined lining; marking; and the use of an e-collar in advanced field work. Problem-solving topics include: the challenges of training high-drive dogs; controlling excitement level and related problems (creeping, breaking, vocalizing, crushing birds, freezing); mouth problems (too rough, eating birds, dropping birds, unwillingness to handle cripples); pace issues (keeping training moving and the dog challenged); inhibitions; problems related to pressure; lack of response at a distance; line manners; and hunting problems (poor perseverance, unwillingness to enter cover). The authors also discuss good general practices and individuality in training, along with specific real-life dog training stories that help readers see how the experts deal with unique problems.

**From Property to Family** Andrei S. Markovits, Katherine Crosby, 2015-03-26 In the wake of the considerable cultural changes and social shifts that the United States and all advanced industrial democracies have experienced since the late 1960s and early 1970s, social discourse around the disempowered has changed in demonstrable ways. In *From Property to Family: American Dog Rescue and the Discourse of Compassion*, Andrei Markovits and Katherine Crosby describe a “discourse of compassion” that actually alters the way we treat persons and ideas once scorned by the social mainstream. This “culture turn” has also affected our treatment of animals inaugurating an accompanying “animal turn”. In the case of dogs, this shift has increasingly transformed the discursive category of the animal from human companion to human family member. One of the new institutions created by this attitudinal and behavioral change towards dogs has been the breed specific canine rescue organization, examples of which have arisen all over the United States beginning in the early 1980s and massively proliferating in the 1990s and subsequent years. While the growing scholarship on the changed dimension of the human-animal relationship attests to its social, political, moral and intellectual salience to our contemporary world, the work presented in Markovits and Crosby’s book constitutes the first academic research on the particularly important institution of breed specific dog rescue.
