OECD Economic Surveys: Finland 2020 OECD,2020-12-10 The COVID-19 pandemic has plunged Finland into a deep recession, albeit less severe than in most other OECD countries. Finland managed to bring the first wave of the coronavirus under control quickly through a combination of voluntary mobility reductions and timely containment measures and is on track to do the same for the second wave. Nevertheless, many people have been laid off and the budgetary costs of supporting household- and business incomes have been considerable.

The Economics of International Environmental Agreements Amitrajeet A Batabyal,2017-12-04 This title was first published in 2000: Conflicts between developed and developing countries over global environmental problems, and the fact that the co-operation required to solve environmental collective action problems is typically elusive in the world of international relations, suggests a research agenda regarding how one might hop to bring about co-operation in an inherently non-co-operative international setting. In particular, what can economic theory tell us about the design of international environmental agreements (IEAs) that will protect the world's fragile environmental resources? This book collects work on IEAs which demonstrates the value of rigorous microeconomic and econometric modelling in comprehending the many and varied facets of the design and implementation in IEAs.

Finland International Monetary Fund. European Dept.,2020-01-16 This Selected Issues paper investigates impact of promoting labor supply through tax and benefit reform in Finland. A comprehensive reform of the tax-benefit system could support the government's objective of increasing employment. The equity-efficiency trade-off of the proposed reform scenarios improves social welfare when using Finland-specific preferences. The Finnish tax and benefit

system has served the country well, having supported high income levels alongside low inequality. The model is characterized by strong institutions, high taxes and public service provision, a highly skilled labor force and a generous social safety net. The microsimulation analysis shows that, despite strong redistribution and high-income levels, Finland could improve its tax and benefit system. Even for revenue-neutral reforms, economic gains in terms of labor supply and earnings could be substantial. The reform proposals consider Finland's strong preferences for equity, while seeking to correct potential inconsistencies in how the tax burden is distributed.

**Specifying and Securing a Social Minimum in the Battle Against Poverty** Toomas Kotkas,Ingrid Leijten,Frans Pennings,2019-12-26 This book addresses a topic that is currently high on the agenda in many fora: how to specify and secure a social minimum. The term 'social minimum' has different meanings, depending on the context. These contexts are examined in this book from different perspectives, including law, sociology, philosophy, politics and economics. In the first part, the social minimum is discussed from a conceptual and theoretical point of view. The second part shows the various ways in which the social minimum can be specified and measured. There is a need for new indicators that take into account, for instance, aspects of adequate social participation. As this part shows, the choice of indicators is closely intertwined with political choices. The third part approaches the social minimum from the perspective of legal obligations, addressing the nature of different obligations imposed on individuals and states. The fourth part deals with the question of social minimum in the context of courts, adjudication and justiciability. The role of international treaties and national constitutions – the interpretation of the rights they enshrine and the way these are dealt with by expert committees and courts – is discussed with a view to understanding how the guarantee of a social minimum can be promoted within individual countries. Besides being of interest for academics in fields ranging from legal theory and human rights to the social sciences, the book also serves as an important source for students as well as practitioners interested in the social minimum, and anyone who wants to gain an insight into the current debates on this extremely important issue.

*OECD Economic Surveys: Finland 2004* OECD,2004-10-04 In this 2004 review of the Finnish economy, OECD finds that Finland's recent strong performance is threatened by population ageing and falling productivity and prices in the ICT sector. This edition's special feature suggests fiscal measures to counter budgetary pressures of the ageing population.

Mainstreaming Ageing Asghar Zaidi, 2017-09-29 The Madrid International Plan of Action on Ageing (MIPAA), adopted at the Second World Assembly on Ageing, is the first international agreement that specifically recognises the potential of older people to contribute to the development of their societies. In monitoring its implementation two key approaches are evident: a qualitative bottom-up participatory approach and an approach that uses quantitative indicators to monitor sustainable progress and policies. With the European Centre for Social Welfare Policy and Research, playing a pivotal role in the monitoring of the implementation process, one of its key tasks has been to develop a list of 'indicators of achievement'. This book contains extended and revised versions of policy briefs and background papers that support the implementation monitoring process. The analyses included in these chapters make concrete suggestions towards quantitative indicators, with the aim of assisting national governments in mainstreaming ageing in their policies. The contributors provide an overview of the current situation with respect to population ageing and its consequences and also provide projections for the future. The book also includes the final list of quantitative indicators that arose out of consultations with international experts, related to the four main topics addressed: demography, income and wealth, labour market participation, and social protection and financial sustainability.

**Finland and Europe** Juhani Paasivirta, 1962-02-01 Finland and Europe was first published in 1982. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. In 1808 the Grand Duchy of Finland, part of the Swedish kingdom since the thirteenth century, was invaded and in 1809 annexed by Russia -- events which took place within the context of the Napoleonic wars but whose significance was obscure to most Finns and to the outside world as well. During the nineteenth century Finnish national identity grew and Finland began to play a role in European politics. This book traces the course of Finnish involvement in European affairs from the time when it became an autonomous Grand Duchy within the Russian Empire down to the First World War. Juhani Paasivirta's analysis is centered upon eleven international crises, including the Russian annexation of Finland, the fall of Napoleon, two revolutions in Poland, the revolutions of 1848, the Franco-Prussian War and the Paris Commune, the Russo-Turkish and Russo-Japanese wars, and the outbreak of the First World War. Paasivirta writes from two vantage points: he records the reactions to these events in Finland, across a broad social and economic spectrum, and the attitudes towards the 'Finnish situation' in Sweden, England, France, and Germany. Finland's relationship with Russia, and her necessarily realistic regard for the security of the Russian Empire were important matters faced by Finnish leaders; Paasivirta shows how this delicate relation collapsed, making way for a course that led to Finnish independence in 1917.

*Finland in the European Union* Tapio Raunio, Teija Tiilikainen, 2004-08-02 With a focus on governmental institutions, this book explores the ways in which EU membership has altered the balance of power among key political actors. The authors discuss cultural adaptation to integration, as well as examining the

views of the elite and voters. The transformation in national identity, sovereignty and neutrality are also examined.
