**Data Science for Neuroimaging** Ariel Rokem, Tal Yarkoni, 2023-11-07 Data science methods and tools—including programming, data management, visualization, and machine learning—and their application to neuroimaging research As neuroimaging turns toward data-intensive discovery, researchers in the field must learn to access, manage, and analyze datasets at unprecedented scales. Concerns about reproducibility and increased rigor in reporting of scientific results also demand higher standards of computational practice. This book offers neuroimaging researchers an introduction to data science, presenting methods, tools, and approaches that facilitate automated, reproducible, and scalable analysis and understanding of data. Through guided, hands-on explorations of openly available neuroimaging datasets, the book explains such elements of data science as programming, data management, visualization, and machine learning, and describes their application to neuroimaging. Readers will come away with broadly relevant data science skills that they can easily translate to their own questions. • Fills the need for an authoritative resource on data science for neuroimaging researchers • Strong emphasis on programming • Provides extensive code examples written in the Python programming language • Draws on openly available neuroimaging datasets for examples • Written entirely in the Jupyter notebook format, so the code examples can be executed, modified, and re-executed as part of the learning process

**Deep Learners and Deep Learner Descriptors for Medical Applications** Loris Nanni, Sheryl Brahnam, Rick Brattin, Stefano Ghidoni, Lakhmi C. Jain, 2020-05-15 This book introduces readers to the current trends in using deep learners and deep learner descriptors for medical applications. It reviews the recent literature and presents a variety of medical image and sound applications to illustrate the five major ways deep learners can be utilized: 1) by training a deep learner from scratch (chapters provide tips for handling imbalances and other problems with the medical data); 2) by implementing transfer learning from a pre-trained deep learner and extracting deep features for different CNN layers that can be fed into simpler classifiers, such as the support vector machine; 3) by fine-tuning one or more pre-trained deep learners on an unrelated dataset so that they are able to identify novel medical datasets; 4) by fusing different deep learner architectures; and 5) by combining the above methods to generate a variety of more elaborate ensembles. This book is a value resource for anyone involved in engineering deep learners for medical applications as well as to those interested in learning more about the current techniques in this exciting field. A number of chapters provide source code that can be used to investigate topics further or to kick-start new projects.

**Smaller Satellites: Bigger Business?** Michael J Rycroft, Norma Crosby, 2014-03-14 Y. Fujimori, Symposium Programme Committee Chair, and Faculty Member, International Space University e-mail: fujimori@isu.isunet.edu M. Rycroft, Faculty Member, International Space University e-mail: rycroft@isu.isunet.edu N. Crosby, International Space University e-mail: norma@bock-crosby.fsbusines.co.uk For the sixth annual ISU Symposium the theme was Smaller Satellites: Bigger Business? Concepts, Applications and Markets for Micro/Nanosatellites in a New Information World. Thus, the Symposium addressed the crucial question: are small satellites the saviour of space programmes around the world It did this from the unique perspective of the International Space today? University - the interdisciplinary, international and intercultural perspective. This Symposium brought together a variety of people working on small satellites - engineers, scientists, planners, providers, operators, policy makers and business executives, together with representatives from regulatory bodies, from national and international organizations, and from the finance sector, and also entrepreneurs. Discussion and debate were encouraged, based on the papers presented and those published here.

**Taxing Consumption in the Digital Age** Katharina Artinger, 2020-10-16 Die Digitalisierung hat enorme Auswirkungen auf die Grundidee der Mehrwertsteuer: den Austausch von Leistungen für Konsumzwecke. Die Dissertation konzentriert sich auf den Austausch von scheinbar kostenlosen Online-Dienstleistungen und die Zustimmung der Kunden zur Verwertung ihrer persönlichen Daten. Diese können der Mehrwertsteuer unterliegen, wobei die Bemessungsgrundlage auf Grundlage der Anbieterkosten berechnet werden muss. Die Ergebnisse basieren auf einer Analyse der EU-Mehrwertsteuer als Verbrauchsteuer im Vergleich zu anderen theoretischen Konsummodellen. Auch andere digitale Geschäftsmodelle, wie die Sharing Economy oder Bitcoins, können unter die Idee der EU-Mehrwertsteuer als Verbrauchsteuer subsumiert werden. **Emerging Dairy Processing Technologies** Nivedita Datta, Peggy M. Tomasula, 2015-07-01 Fluid milk processing is energy intensive, with high financial and energy costs found all along the production line and supply chain. Worldwide, the dairy industry has set a goal of reducing GHG emissions and other environmental impacts associated with milk processing. Although the major GHG emissions associated with milk production occur on the farm, most energy usage associated with milk processing occurs at the milk processing plant and afterwards, during refrigerated storage (a key requirement for the transportation, retail and consumption of most milk products). Sustainable alternatives and designs for the dairy processing plants of the future are now being actively sought by the global dairy industry, as it seeks to improve efficiency, reduce costs, and comply with its corporate social responsibilities. *Emerging Dairy Processing Technologies: Opportunities for the Dairy Industry* presents the state of the art research and technologies that have been proposed as sustainable replacements for high temperature-short time (HTST) and ultra-high temperature (UHT) pasteurization, with potentially lower energy usage and greenhouse gas emissions. These technologies include pulsed electric fields, high hydrostatic pressure, high pressure homogenization, ohmic and microwave heating, microfiltration, pulsed light, UV light processing, and carbon dioxide processing. The use of bacteriocins, which have the potential to improve the efficiency of the processing technologies, is discussed, and information on organic and pasture milk, which consumers perceive as sustainable alternatives to conventional milk, is also provided. This book brings together all the available information on alternative milk processing techniques and their impact on the physical and functional properties of milk, written by researchers who have developed a body of work in each of the technologies. This book is aimed at dairy scientists and technologists who may be working in dairy companies or academia. It will also be highly relevant to food processing experts working with dairy ingredients, as well as university departments, research centres and graduate students.

**Bioactive Marine Natural Products** Dewan S. Bhakuni, D.S. Rawat, 2006-06-30 Bioactive Marine Natural Products is the first book available that covers all aspects of bioactive marine natural products. It fills the void in the literature for bioactive marine natural products. The book covers various aspects of marine natural products and it is hoped that all the major classes of bioactive compounds are included. Different classes of marine organisms and the separation and isolation techniques are discussed. The chemistry and biology of marine toxins, peptides, alkaloids, nucleosides and prostanoids are discussed in detail. Biological, toxicological and clinical evaluations are also dealt with to ensure that the book may be adopted at any stage by any practicing organic chemist or biologist, working in academia or in R and D divisions of pharmaceutical companies. Each chapter in the book includes an abstract to highlight the major points discussed in the text and concluding remarks are given. References to books, monographs, review articles and original papers are provided at the end of each chapter.

**Prevention and Treatment of Pressure Ulcers** National Pressure Ulcer Advisory Panel (U.S.), 2014-09-30 This Clinical Practice Guideline presents recommendations and summarizes the supporting evidence for pressure ulcer prevention and treatment. The first edition was developed as a four year collaboration between the National Pressure Ulcer Advisory Panel (NPUAP) and the European Pressure Ulcer Advisory Panel (EPUAP). In this second edition of the guideline, the Pan Pacific Pressure Injury Alliance (PPPIA) has joined the NPUAP and EPUAP. This edition of the guideline has been developed over a two year period to provide an updated review of the research literature, extend the scope of the guideline and produce recommendations that reflect the most recent evidence. It provides a detailed analysis and discussion of available research, critical evaluation of the assumptions and knowledge in the field, recommendations for clinical practice, a description of the methodology used to develop the guideline and acknowledgements of the 113 experts formally involved in the development process.

**Pattern Recognition and Machine Learning** Christopher M. Bishop, 2016-08-23 This is the first textbook on pattern recognition to present the

Bayesian viewpoint. The book presents approximate inference algorithms that permit fast approximate answers in situations where exact answers are not feasible. It uses graphical models to describe probability distributions when no other books apply graphical models to machine learning. No previous knowledge of pattern recognition or machine learning concepts is assumed. Familiarity with multivariate calculus and basic linear algebra is required, and some experience in the use of probabilities would be helpful though not essential as the book includes a self-contained introduction to basic probability theory.

«Remov'd from human eyes»: **Madness and Poetry 1676-1774** Natali, Ilaria,2016-08-30 The years 1676 and 1774 marked two turning points in the social and legal treatment of madness in England. In 1676, London's Bethlehem Hospital expanded in grand new premises, and in 1774 the Madhouses Act attempted to limit confinement of the insane. This study explores almost a century of the English history of madness through the texts of five poets who were considered mentally troubled according to contemporary standards: James Carkesse, Anne Finch, William Collins, Christopher Smart and William Cowper were hospitalized, sequestered or exiled from society. Their works cope with representations of insanity, medical definitions or practices, imputed illness, and the judging eye of the 'sane other', shedding new light on the dis/continuities in the notion of madness of this period.

Annual Review of Cybertherapy and Telemedicine B. K. Wiederhold,Giuseppe Riva,Sun-i Kim,2010 This book offers support and encouragement to all those interested in the development of cybertherapy systems. It provides evidence to build confidence in their effectiveness for detecting, monitoring and evaluating a number of important conditions and identifies and addresses the main barriers to their further development. It is divided into four main sections: critical reviews, evaluation studies, original research and clinical observations, tackling this complex subject by means of a clearly sequenced structure. --

Lead Poisoning: The Pencil Art of Geof Darrow Geof Darrow,2017-07-25 Geof Darrow's slick, precise inks and stunning detail have amazed comics fans for decades, from his early work with Moebius; to Hardboiled, his first collaboration with Frank Miller; to the overwhelming excess of his current series, Shaolin Cowboy. Now Darrow provides incredible insight into his process by sharing the pencil drawings behind his meticulous inks in a huge hardcover collection. Featuring the pencils behind well-known covers and never-before-seen drawings alike, Lead Poisoning is a behind-the-scenes look that reveals perfectionism at its best, showing how clean and perfect the initial drawings can be, as well as the bizarre alterations that appear to happen on the fly.

Christo and Jeanne-Claude Christo,Wolfgang Volz,Jeanne-Claude,David Bourdon,1996 Christo and Jeanne-Claude's Umbrella Project in 1991 was the most ambitious and expensive project they have ever undertaken. 1340 blue six metre umbrellas were assembled and erected throughout a narrow valley in rural Japan. 7000 yellow umbrellas were similarly prepared across the Pacific in a dry expanse of Californian land. After months of gruelling process, the two countries united as the forest of umbrellas were opened simultaneously on both continents.

Turkish Competition Law Gönenç Gürkaynak,2021-11-24 Gönenç Gürkaynak illuminates the entirety of Turkish competition law in the first such treatise of its kind, spanning across the historical roots of legislation, policy, and institutions, to substantive aspects, enforcement, and procedure. All components of the law are individually discussed, with extensive references to essential case law that are further enriched by the author's vast experience in the field. The book provides a comprehensive and in-depth analysis of the competition law regime in Turkey, against the backdrop of the country's international commitments, as well as recent amendments to the law. The book is an essential guide for practitioners and academics alike, and for all interested in the future of Turkish competition law in a globalized economy. For its comparative analysis and insights, it is of value to the entire competition community.

Helmut Newton Helmut Newton,2004 The collection 'Sex & Landscapes' brings together a rich selection from Helmut Newton's little-known landscape and travel photographs, as well as unseen 'tougher' sex pictures, described by Philippe Garner of de Pury & Luxembourg as Helmut's world of dark, brooding seas, baroque statuary, crashing waves, a long desert highway under threatening skies, a Berlin park at dusk, enigmatic apartment buildings at night, the Rhine seen from the air, the shadows of airplanes, all this interwoven with hard and voyeuristic sexual imagery, plus a touch of his high style and glamour. The book's publication coincides with the exhibition of 'Sex and Landscapes', which will open on June 3 at the inauguration of the Helmut Newton Foundation in Berlin.
