Spinning Tops M. Audin, 1999-11-13 Since the time of Lagrange and Euler, it has been well known that an understanding of algebraic curves can illuminate the picture of rigid bodies provided by classical mechanics. A modern view of the role played by algebraic geometry has been established by many mathematicians. This book presents some of these techniques, which fall within the orbit of finite dimensional integrable systems. The main body of the text presents a rich assortment of methods and ideas from algebraic geometry prompted by classical mechanics, whilst in appendices the general, abstract theory is described. The methods are given a topological application to the study of Liouville tori and their bifurcations. The book is based on courses for graduate students given by the author at Strasbourg University but the wealth of original ideas will make it also appeal to researchers.

The Spinning Tops of Light Bénédicte Civet-Lobstein, 2012-10-15 The Spinning Tops are disembodied beings who coexist with us on Earth in an invisible, parallel dimension. They send us messages of love and peace, and they help relieve our anxieties. They support us on our way to perfect harmony and, ultimately, to God. Lucie is the medium who delivers these loving messages. She withholds nothing her mind is a blank page. The Spinning Tops shine through her like crystal, and she delivers their messages faithfully. In these loving messages, the Spinning Tops explain how adversity and misfortune are repercussions of accumulated human negativity that counteracts God's plan. God is perfect order, harmonious unity. Unknowingly, our minds wield forces that are disturbing the vibratory zones around the Earth, putting our planet out of balance, causing more and more natural disasters. For all of us, saving the planet means first finding the courage to walk the path of wisdom, joy, happiness, and love of others. This is the eleventh commandment, and it is our

responsibility to the future. By not following the personal path you were given before birth, you disturb the terrestrial forces. By following your very own preprogrammed destiny, you are helping the Earth to come back into alignment.

Street Lore Edward J. Brophy, 2009-01-21 Street Lore is a book based on children games that were played in the streets of New York around the 50's. During this period the children didn't have the games like kids have today nor did they have the money. So, the children of this time would create their own toys from what they had lying around in the streets. An example would be the wooden boxes from the greengrocers on every corner. This would be their main source of building material. In addition to their homemade toys they had games. The game changed with the seasons and the aging process. Some were as traditional as tag, hide and seek, and marbles, while others were local and spontaneous: hot beans and butter, Highest to the moon/lowest to the earth. The neighborhood was poor and the environment was rough but the kids were too busy playing to have ever noticed. This book is based on the belief that these memories are part of a lore that should not be lost. It is a part of American history; a small part granted, but enough to stimulate a wider perception of an era that its own way of doing things it did.
