Let There Be Facebook Travis Harmon, Jonathan Shockley, 2011-11-08 The recent discovery of the ancient Ethernets has forever altered the way humanity views its past. Among the many amazing findings is a rich trove of Facebook dispatches that date back to the beginning of time itself. Now a selection of these lost Facebook updates is at last available for the world to see! Noted historians Brylon K. Tilgh, Ph.D., and Dr. Tony Cougarmouth have carefully selected the best status updates, profile pages, and late-night

exchanges found on the ancient Facebook, including: GOD and ABRAHAM'S exchange over Isaac's life(God was a real practical joker!) HENRY VIII'S many relationship status updates and the POPE'S responses Live updates from GANDHI'S hunger strike J. EDGAR HOOVER'S interests and hobbies (Fashion, Surveillance, Destroying Lives) The original WOODSTOCK event page and much more.

Status Update Alice E. Marwick,2013-11-26 Presents an analysis of social media, discussing how a technology which was once heralded as democratic, has evolved into one which promotes elitism and inequality and provides companies with the means of invading privacy in search of profits.

Handbook on Session Initiation Protocol Radhika Ranjan Roy,2018-09-03 Session Initiation Protocol (SIP), standardized by the Internet Engineering Task Force (IETF), has emulated the simplicity of the protocol architecture of hypertext transfer protocol (HTTP) and is being popularized for VoIP over the Internet because of the ease with which it can be meshed with web services. However, it is difficult to know exactly how many requests for comments (RFCs) have been published over the last two decades in regards to SIP or how those RFCs are interrelated. Handbook on Session Initiation Protocol: Networked Multimedia Communications for IP Telephony solves that problem. It is the first book to put together all SIP-related RFCs, with their mandatory and optional texts, in a chronological and systematic way so that it can be used as a single super-SIP RFC with an almost one-to-one integrity from beginning to end, allowing you to see the big picture of SIP for the basic SIP functionalities. It is a book that network designers, software developers, product manufacturers, implementers, interoperability testers, professionals,

professors, and researchers will find to be very useful. The text of each RFC from the IETF has been reviewed by all members of a given working group made up of world-renowned experts, and a rough consensus made on which parts of the drafts need to be mandatory and optional, including whether an RFC needs to be Standards Track, Informational, or Experimental. Texts, ABNF syntaxes, figures, tables, and references are included in their original form. All RFCs, along with their authors, are provided as references. The book is organized into twenty chapters based on the major functionalities, features, and capabilities of SIP.
