Sustainable Supply Chains Tonya Boone,Vaidyanathan Jayaraman,Ram Ganeshan,2012-06-07 A sustainable enterprise is one that contributes to sustainable development by simultaneously delivering economic, social and environmental benefits or what has been termed the triple bottom line. While pursuing profit, socially responsible companies should be sensitive to the environment and uphold the rights of all the firm's stakeholders. This edited volume explores leading-edge ideas – both by academics and forward-thinking companies – to (re)design and market products, source, manufacture, and eventually distribute and recover or dispose of them in an environmentally, ecologically, and socially responsible way. This edited volume is made up of fifteen chapters loosely grouped into clusters. After an introduction, chapter 2 shows the greenhouse emissions at various levels, from countries all the way to individual products. Chapters 3-7 each focus on an industrial sector and address issues specific to that industry, with chapter 7 presenting a case study on LEED certification of Miller Hall, home of the Mason School of Business where two of the authors (Tonya and Ram) work. Chapters 8-10 address product take back in the supply chain. Chapter 8 introduces e-waste and surveys what firms are doing to combat it. Chapter 9 provides an overview of existing take-back legislation and academic papers that have studied various research questions associated with them. Chapter 10 is a tutorial that addresses the problem of product disposition on a closed-loop supply chain: what should a firm do with a product return? Chapters 11-15 address measurement, monitoring, decision-making, and reporting regarding environmental issues in a firm. Chapter 11 provides an academic survey of eco-labeling and the consumer's willingness to pay for them. Chapter 12 discusses how firms can measure the total carbon footprint in their supply chains and some of the strategies they can use to mitigate carbon emissions. Using the price of call options, chapter 13 illustrates how managers can quantify the savings attributed to sustainability-related investment. Chapter 14 develops a non-linear optimization model that addresses the complex trade-offs involved in making joint operational and environmental decisions. Finally, chapter 15 develops a Data Envelopment Analysis-based method for supplier evaluation incorporating environmental and business factors.

A Hard World Thomas Hauser,2016-09-01 In 2015, Booklist observed, “the arrival of Hauser’s annual boxing review is akin to Christmas morning for fight fans. Nobody knows a sport any better than Hauser knows boxing.” Each year, readers, writers, and critics alike look forward to Thomas Hauser’s annual collection of articles about the contemporary boxing scene. He’s one of the last real champions of boxing and one of the very best who has ever written about the sport. *A Hard World* continues this tradition of excellence with dressing-room reports from big fights like Canelo Alvarez vs. Miguel Cotto, a behind-the-scenes look at Floyd Mayweather vs. Manny Pacquiao, and a

foray into the world of mixed martial arts for a compelling portrait of Ronda Rousey. Most importantly, this new collection contains Hauser's groundbreaking two-part investigative report on the relationship between the United States Anti-Doping Agency and boxing, a report that shook the industry and raised fundamental questions regarding the integrity of USADA's drug-testing procedures as applied to boxing.

Colours Of The Mountain Da Chen, 2011-02-28 A unique modern memoir of growing up in rural China, Colours of the Mountain is a powerful and moving story of supreme determination and extraordinary faith against the most impossible odds. Da Chen was born in 1962 in a town over 50 hours' train journey from Beijing. Persecuted because of his family's landlord status, Da was an easy target for the farmer-teachers and bullying peasant boys. Whilst his older brother and sisters were forced to work in the fields, Da tired of the chaotic schooling of the Cultural Revolution and found solace with a band of good-time thugs. Following the death of Mao, an academic meritocracy was reintroduced. Da determined to escape Ch'ing Mountain, where he ran around barefoot and there was no electricity and no future. Together with his brother Jin, who had been working the land since boyhood, he began to study day and night. His determination is staggering and inspiring. In 1978, at the age of sixteen, Da Chen took a bus and a train for the first time in his life and travelled to Beijing, to the best English language institute in China. A

book about friendships, prejudice, familial love and academic striving, and of one man's escape from hunger, poverty and ignorance, *Colours of the Mountain* is an inspiring and eloquently recounted memoir.

Sustainable Development in the Process Industries J. Harmsen, Joseph B. Powell, 2011-11-30 The complete, hands-on guide to sustainable development Today's process industries must develop natural resources within an eco-friendly framework that balances current demand with future need. Realizing this goal necessitates global vigilance of three key areas—people, planet, and prosperity—known as the Triple Bottom Line or, simply, the Triple P. Sustainable Development in the Process Industries details how worldwide implementation of sustainable processes in present-day industries can positively influence the Triple P going forward by lowering poverty, reducing pollution, and conserving resources. This in-depth guide includes: Real-world case studies and examples Individual chapters written by industry experts Application in industries such as petroleum and fuel, food, recycling, mineral processing, and water processing Focus on the micro (molecules, unit operations, processes) to the macro (industrial sites, value chains, regions, the world) Providing lessons with practical application rather than pure theory, Sustainable Development in the Process Industries offers sound solutions to social, ecological, and economic challenges imperative to assuring our planet's well-being for generations.
