FinTech Development for Financial Inclusiveness Anshari, Muhammad, Almunawar, Mohamad Nabil, Masri, Masairol, 2021-11-26 Financial technology (FinTech) and its related products are considered a major disruptive innovation in financial services, substantially elevating financial solutions and new business models. Resulting from the fusion of finance and smart mobile technology, this innovative technology requires additional investigation into its adoption, challenges, opportunities, and future directions so that we may understand and develop the technology to its full potential. *FinTech Development for Financial Inclusiveness* moves beyond the theoretical areas of FinTech to comprehensively explore the recent FinTech initiative scenarios with respect to processes, strategies, challenges, lessons learned, and outcomes within economic development as well as trade and investment. Covering a range of topics such as decentralized finance and global electronic commerce, it is ideal for industry professionals, business owners, consultants, practitioners, instructors, researchers, academicians, and students.

Research Anthology on Concepts, Applications, and Challenges of FinTech Management Association, Information Resources, 2021-02-05 FinTech, an abbreviated term for financial technology, is a digital revolution changing the way banking and financial services are being used both by individuals and businesses. As these changes continue to take place, the financial industry is focused on technological innovation and feeding into this digital revolution to better serve consumers who are looking for easier ways to invest, transfer money, use banking services, and more. FinTech is increasing accessibility to financial services, automating these services, expanding financial options, and enabling online payments and banking. While the benefits are being continually seen and this technology is becoming more widely accepted, there are still challenges facing the technology that include security concerns. To understand FinTech and its role in society, both the benefits and challenges must be reviewed and discussed for a holistic view on the digital innovations changing the face of the financial industry. The *Research Anthology on Concepts, Applications, and Challenges of FinTech* covers the latest technologies in FinTech with a comprehensive view of the impact on the industry, where these technologies are implemented, how they are improving financial services, and the security applications and challenges being faced. The chapters cover the options FinTech has unlocked, such as mobile banking and virtual transactions, while also focusing on the workings of the technology itself and security applications, such as blockchain and cryptocurrency. This book is a valuable reference tool for accountants, bankers, financial planners, financial analysts, business managers, economists, computer scientists, academicians, researchers, financial professionals, and students.

Digital Psychology's Impact on Business and Society Anshari, Muhammad, Razzaq, Abdur, Fithriyah, Mia, Kamal, Akmal Nasri, 2022-12-19 Individuals, businesses, organizations, and countries all benefit from having access to data. People who generate data do it voluntarily, forming their habits, patterns, and behaviors in the process. Their psychological characteristics will be better understood as a result of the data that they generate, allowing them to make intelligent decisions. Organizations are motivated by the desire to collect and analyze as much data as possible from the general public or future customers in order to better understand their psychological features and influence them to purchase their products or services. As a result, there has been a great deal of debate concerning the use of data from the perspectives of individuals, organizations, the public, and the government. *Digital Psychology's Impact on Business and Society* considers the phenomena of digital psychology and society in general and evaluates individual strategies and those of businesses, organizations, and even nations. Covering topics such as big data, marketing, social media, and

social computing, this reference work is ideal for policymakers, psychologists, business owners, managers, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.

Financial Technology and Disruptive Innovation in ASEAN Anshari, Muhammad, Almunawar, Mohammad Nabil, Masri, Masairol, 2019-07-05 The emergence of financial technology (FinTech)-related products is causing major disruptions in financial services that enable financial solutions and innovative business models resulting in the fusion of finance and smart mobile technology. As ASEAN is undergoing a paradigm shift from government-to-government (G2G) to community-to-community (C2C) relationships with the emphasis on integration and collaboration, the adoption of FinTech and its possible future directions needs to be studied further. Financial Technology and Disruptive Innovation in ASEAN provides an assortment of innovative research that explores the recent FinTech initiative in ASEAN with respect to its process, strategies, challenges, and outcomes and highlights new business models, products, and services that affect financial markets and institutions and the provision of financial services. While highlighting topics including blockchain technology, cloud computing, and mobile banking, this book is ideally designed for business executives, managers, entrepreneurs, financial and banking practitioners, policymakers, academicians, students, professionals, and researchers.

Islamic Philanthropy Abdul Ghafar Ismail, Rose Abdullah, Muhammad Hasbi Zaenal, 2022-09-22 In Islam, philanthropy is a spectrum of activity, and these activities differ in their purpose and in the principles on which they operate. To fully understand philanthropy, it is vital to examine not only its purpose but its motive and outcomes. This book identifies three types of philanthropy within this spectrum: Philanthropy as relief (zakat), which seeks to alleviate human suffering; philanthropy as an improvement (waqf), which seeks to maximize individual human potential and is energized by a principle that seeks to progress individuals and their society; and philanthropy as reform (sadaqah), which seeks to solve social problems. Philanthropy as civic engagement seeks to build better community structures and services and is directed by civic responsibility. This book explores philanthropy in Islam that covers the three primary spectra of activity: zakat, waqf, and sadaqah. Combining contributions from the Conference on Philanthropy for Humanitarian Aid under the joint organization of Sultan Sharif Ali Islamic University and the International Research Centre of Islamic Economics and Finance, International Islamic University College in collaboration with the Islamic Research and Training Institute, this book will be of interest to students, policymakers, practitioners, and researchers in the areas of Islamic finance and Islamic economics.

Stability, Growth and Sustainability Aris Ananta,Chang Yau Hoon,Mahani Hamdan,2023-01-18 As in many other oil and gas dependent countries, Brunei Darussalam—a country with a small population but the second highest income per capita in Southeast Asia—has been diversifying its economy in three sectors: from oil and gas to other sectors of export/economic growth; from the dominance of public sector employment to a more balanced public and private sectors employment; and from heavy dependence on

foreign labours to development of local talents. This book examines the current socio-economic development in the journey toward a diversified social economy, as targeted in Brunei Vision 2035. By examining the unique context of Brunei, this book fills in the gap on studies focusing on socio-economic diversification. It highlights the importance of the environment, digital technology and human capital in the diversification process. The book culminates with analyses on business, economy, employment and welfare in Brunei toward 2035, with a new face: a digitalized, sustainable and self-reliant society with a highly developed human capital and a flourishing private sector. This is a very useful analysis of the challenges facing Brunei Darussalam as the country prepares itself for the 21st century. We are in an unprecedented period of human connectivity facilitated by an increasingly digitalised and high-tech world. The transition which the people, policy and business sectors have to undergo, and survive, is a fascinating learning journey for a small state. This book has succinctly highlighted the experiences we should pick up and apply where relevant for our respective countries going forward. -- Ambassador Ong Keng Yong, Executive Deputy Chairman, S. Rajaratnam School of International Studies, Nanyang Technological University, Singapore; and the 11th Secretary-General of ASEAN This forward-looking study of the Brunei economy is timely and topical. Appropriately, the authors identify 'diversification' as the country's key economic challenge, in preparation for the exhaustion of oil reserves and as the world progressively decarbonises. To this end they set out a comprehensive reform agenda focused on education, the labour market, social policy, the development of non-oil industries, environmental objectives and much else. This is a very useful and informative guide not only for the Brunei government and society, but also for neighbouring ASEAN member states. -- Professor Emeritus Hal Hill, Australian National University This collection fills a considerable gap in our knowledge of the socio-economic circumstances and developmental trajectories of Brunei Darussalam. In particular, it serves as a major and much needed contribution to our understanding of the challenges of economic diversification in an oil- and gas-dependent sultanate. -- Professor Emeritus Victor T. King, University of Leeds This book aims to identify and discuss the various issues about, challenges faced by, and opportunities from Brunei's diversification of her oil-dependent economy in response to the changing economic landscape at the national, regional and global levels. The various chapters provide a comprehensive analysis of the different sectors of Brunei's economy, and the authors' clear discussion of their arguments and justifications that are substantiated with relevant data and graphical illustrations, and a wide range of primary and secondary materials. I would like to congratulate the authors for this excellent book and recommend it to those who are interested in knowing and understanding Brunei's economy. -- Associate Professor Teofilo C. Daquila, National University of Singapore

Cognitive Radio Technology Applications for Wireless and Mobile Ad Hoc Networks Meghanathan, Natarajan, 2013-06-30 Radio interference is a problem that has plagued air communication since its inception. Advances in cognitive radio science help to mitigate these concerns. Cognitive Radio Technology Applications for Wireless and Mobile Ad Hoc Networks provides an in-depth exploration

of cognitive radio and its applications in mobile and/or wireless network settings. The book combines a discussion of existing literature with current and future research to create an integrated approach that is useful both as a textbook for students of computer science and as a reference book for researchers and practitioners engaged in solving the complex problems and future challenges of cognitive radio technologies.

Handbook of Research on Disruptive Innovation and Digital Transformation in Asia Ordóñez de Pablos, Patricia, Zhang, Xi, Almunawar, Mohammad Nabil, 2021-05-28 With new technologies constantly being created, implemented, and sold, it is a robust opportunity for companies to hop on board with the latest digital trends. With the business world undergoing rapid changes and advancements in current times, the transformation process has been rapid and the disruptions significant. This has created a culture of innovation and a plethora of available business opportunities, especially when focused on Central Asia, Southeast Asia, and East Asia. Along with these innovative technologies and new opportunities in the business world comes challenges and trends within the Asian region that require more attention and advanced research to fully understand this digital transformation era and the resulting impacts, challenges, and solutions. The Handbook of Research on Disruptive Innovation and Digital Transformation in Asia addresses key topics for understanding business opportunities in Asia, covering a variety of challenges and nations in the Asian region from technological disruption and innovation to connectivity and economic corridors in Asia, Islamic finance and tourism, and more. Due to its innovative topics and approaches, geographical focus, and methodologies, the chapters provide readers with a unique value in bringing new perspectives to understanding emerging businesses and challenges in Asia. This book is ideal for professors in academia, deans, students, politicians, policymakers, corporate heads of firms, senior general managers, managing directors, information technology directors and managers, and researchers.

Recent Developments in Individual and Organizational Adoption of ICTs Yildiz, Orkun, 2020-08-28 In recent years, information and communication technologies (ICTs) have gained significant importance and become vital to the operations of both organizations and individuals. However, there are numerous factors that have affected the adoption of ICTs including access and accessibility barriers, political participation, and social empowerment. This has attracted the attention of researchers who are interested in understanding the socioeconomic influences of ICT adoption and how these technologies impact the infrastructure of modern organizational activities. Recent Developments in Individual and Organizational Adoption of ICTs is a collection of innovative research on the methods of organizational and infrastructural advancement through the application of information and communication technologies. While highlighting topics including internet banking, supply chain management, and e-government services, this book is ideally designed for managers, researchers, policymakers, politicians, business practitioners, educators, decision scientists, strategists, and students seeking current research on the socioeconomic impact of ICT adoption.

Security and Privacy for Next-Generation Wireless Networks Sheng Zhong, Hong Zhong, Xinyi Huang, Panlong Yang, Jin Shi, Lei Xie, Kun Wang, 2018-11-22 This timely book provides broad coverage of security and privacy issues in the macro and micro perspective. In macroperspective, the system and algorithm fundamentals of next-generation wireless networks are discussed. In micro-perspective, this book focuses on the key secure and privacy techniques in different emerging networks from the

interconnection view of human and cyber-physical world. This book includes 7 chapters from prominent international researchers working in this subject area. This book serves as a useful reference for researchers, graduate students, and practitioners seeking solutions to wireless security and privacy related issues. Recent advances in wireless communication technologies have enabled the large-scale deployment of next-generation wireless networks, and many other wireless applications are emerging. The next generation of mobile networks continues to transform the way people communicate and access information. As a matter of fact, next-generation emerging networks are exploiting their numerous applications in both military and civil fields. For most applications, it is important to guarantee high security of the deployed network in order to defend against attacks from adversaries, as well as the privacy intrusion. The key target in the development of next-generation wireless networks is to promote the integration of the human, cyber, and physical worlds. Previous work in Cyber Physical Systems (CPS) considered the connection between the cyber world and the physical world. In the recent studies, human involvement brings new channels and initiatives in this interconnection. In this integration process, security and privacy are critical issues to many wireless network applications, and it is a paramount concern for the growth of next-generation wireless networks. This is due to the open nature of wireless communication and the involvement of humans. New opportunities for tackling these security and privacy issues in next-generation wireless networks will be achieved by leveraging the properties of interaction among human, computers and things.

50 Years of Integer Programming 1958-2008 Michael Jünger, Thomas M. Liebling, Denis Naddef, George L. Nemhauser, William R. Pulleyblank, Gerhard Reinelt, Giovanni Rinaldi, Laurence A. Wolsey, 2009-11-06 In 1958, Ralph E. Gomory transformed the field of integer programming when he published a paper that described a cutting-plane algorithm for pure integer programs and announced that the method could be refined to give a finite algorithm for integer programming. In 2008, to commemorate the anniversary of this seminal paper, a special workshop celebrating fifty years of integer programming was held in Aussois, France, as part of the 12th Combinatorial Optimization Workshop. It contains reprints of key historical articles and written versions of survey lectures on six of

the hottest topics in the field by distinguished members of the integer programming community. Useful for anyone in mathematics, computer science and operations research, this book exposes mathematical optimization, specifically integer programming and combinatorial optimization, to a broad audience.
