The Big Decision Daniel Friedland,Zach

Friedland,2013-07-27 What if you had a Framework to make better decisions at home and at work? And what if you could inspire and empower your children, students, clients, or anyone else you mentor with confidence to make better life decisions in an uncertain world? Written by a father and son, Daniel Friedland, MD and Zach Friedland, *The Big Decision* is a story about a teen boy who is faced with making a big decision - and about a gift his father gives him to help him make better decisions as he emerges into adulthood. In the first part of the book, Zach shares his story about how Ryan, an up and coming star running back for his middle school football team, is faced with a big decision. When he asks his parents for help, rather than telling him what to do, his father teaches him a framework to make his big decision for himself. In the second half of the book, written as a guide for parents, teachers, counselors, coaches and leaders, Dr. Daniel Friedland, one of the leading experts on how doctors

are trained to make medical decisions, shares how you can use this 4-Step Framework to make better life decisions. He also shares the science behind how your brain works and how you can better work your brain to do so. Be inspired and empowered to make your big decisions. Think about with whom you'd want to read and discuss this book. Reading and sharing its lessons may well be one of the best decisions you'll ever make!

Judgment Calls Thomas H. Davenport, Brook

Manville, 2012-03-13 Your guide to making better decisions

Despite the dizzying amount of data at our disposal today—and an increasing reliance on analytics to make the majority of our decisions—many of our most critical choices still come down to human judgment. This fact is fundamental to organizations whose leaders must often make crucial decisions: to do this they need the best available insights. In *Judgment Calls*, authors Tom Davenport and Brook Manville share twelve stories of organizations that have successfully tapped their data assets, diverse perspectives, and deep knowledge to build an organizational decision-making capability—a competence they say can make the difference between success and failure. This book introduces a model that taps the collective judgment of an organization so that the right decisions are made, and the entire organization profits. Through the stories in *Judgment Calls*, the authors—both of them seasoned management thinkers and advisers—make the case for the wisdom of organizations and suggest ways to use it to best advantage. Each chapter tells a unique story of one dilemma and its ultimate resolution, bringing into high relief one key to the power of collective judgment. Individually, these stories inspire and instruct; together, they form a model for building an organizational capacity for broadly based, knowledge-intensive decision making. You’ve read *The Wisdom of Crowds* and *Competing on Analytics*. Now read *Judgment Calls*. You, and your organization, will make better decisions.

Big Decisions Lee Crumbaugh, 2024-02-20 We don't know how to make good decision when it really counts, or, more accurately, if we even recognize that a big decision is needed, we are ill-equipped to make it in a way most beneficial to our personal or organizational interests. In this deep exploration of why we make poor decisions - because of hundreds of mental biases, traps and errors that plague our thinking and because we don't know nor use decision-making best practices - Lee Crumbaugh tells scores of stories that reveal the disastrous consequences of people and organizations making bad decisions and why they made them (as well as some stories showing the terrific results that can flow from great decisions). Crumbaugh shows why we aren't wired for great decision making and why making the perfect decision is impossible. Exploring the results of thousands of research studies, Crumbaugh offers a set of decision tools and a framework for producing a great decision when it really matters. You will learn how to recognize and overcome the most common biases and traps that result in poor decisions.

How to Make Great Decisions Mike Schmitz, 2019-11 Should I buy dark chocolate or milk chocolate? Which college should I attend? Should I be married or single? True decision-making is more than just thinking about something . . . decisions involve taking action. YouTube star, Fr. Mike Schmitz, gives you the tools to decide what to do with your life today, tomorrow, and in the future with clarity and confidence. Making Great Decisions in Business and Life David R. Henderson, Charles L. Hooper, 2006 The phrase work smarter, not harder has been repeatedly ridiculed in the Dilbert comic strip

and elsewhere, not because it is a bad idea, but because it is thrown like a brick lifesaver to drowning employees. To tell someone to work smarter is like telling someone to be happier, healthier, and richer. It's not much help to merely repeat the objective; what people need is a plan for achieving the objective. In *Making Great Decisions*, we show our readers how to achieve their objectives. We write to help those in business and those in the business of life--i.e., everyone--to work smarter. Our ideas are both simple and powerful. We offer a better way to look at problems so that the solutions are easier to find. We help supplement our readers' clear thinking by summarizing some of the most powerful techniques we have discovered. Have you ever driven through corn country? From a distance, all you see are corn stalks and more corn stalks in a jumbled mess. Then suddenly, when you get closer, your perspective changes, and you can see down the rows and realize that the corn was planted perfectly in straight lines. Your perception of the crop changes from a messy jumble to a clear picture simply because you're in the right spot. This book puts readers in that ideal spot. So many problems seem like hopeless jumbles but then, when you start using the techniques we discuss here, they start to look as straightforward as the straightest line in an Iowa cornfield. What motivated us to write this book is that, over the years, both of us have regularly come across people in organizations--often bright people with MBAs or other graduate degrees--who don't think they have time, energy, or skills to make good decisions. They have many clues but don't know how to put them together. They regularly face situations that they could analyze with some of the tools they learned in their courses, but they don't realize that. We don't hold ourselves apart from this group, and stories of our successes and failures are sprinkled throughout *Making Great Decisions in Business and Life*.

Farsighted Steven Johnson, 2018-09-04 The hardest choices are also the most consequential. So why do we know so little

about how to get them right? Big, life-altering decisions matter so much more than the decisions we make every day, and they're also the most difficult: where to live, whom to marry, what to believe, whether to start a company, how to end a war. There's no one-size-fits-all approach for addressing these kinds of conundrums. Steven Johnson's classic *Where Good Ideas Come From* inspired creative people all over the world with new ways of thinking about innovation. In *Farsighted*, he uncovers powerful tools for honing the important skill of complex decision-making. While you can't model a once-in-a-lifetime choice, you can model the deliberative tactics of expert decision-makers. These experts aren't just the master strategists running major companies or negotiating high-level diplomacy. They're the novelists who draw out the complexity of their characters' inner lives, the city officials who secure long-term water supplies, and the scientists who reckon with future challenges most of us haven't even imagined. The smartest decision-makers don't go with their guts. Their success relies on having a future-oriented approach and the ability to consider all their options in a creative, productive way. Through compelling stories that reveal surprising insights, Johnson explains how we can most effectively approach the choices that can chart the course of a life, an organization, or a civilization. *Farsighted* will help you imagine your possible futures and appreciate the subtle intelligence of the choices that shaped our broader social history.

The Five Life Decisions Robert T. Michael, 2016-08-05 Choices matter. And in your teens and twenties, some of the biggest life decisions come about when you feel the least prepared to tackle them. Economist Robert T. Michael won't tell you what to choose. Instead, he'll show you how to make smarter choices. Michael focuses on five critical decisions we all face about college, career, partners, health, and parenting. He uses these to demonstrate how the science of scarcity and

choice—concepts used to guide major business decisions and shape national legislation—can offer a solid foundation for our own lives. Employing comparative advantage can have a big payoff when picking a job. Knowing how to work the marketplace can minimize uncertainty when choosing a partner. And understanding externalities—the ripple of results from our actions—can clarify the if and when of having children. Michael also brings in data from the National Longitudinal Survey of Youth, a scientific sample of 18 million millennials in the United States that tracks more than a decade of young adult choices and consequences. As the survey’s longtime principal investigator and project director, Michael shows that the aggregate decisions can help us understand what might lie ahead along many possible paths—offering readers insights about how their own choices may turn out. There’s no singular formula for always making the right choice. But the adaptable framework and rich data at the heart of *The Five Life Decisions* will help you feel confident in whatever you decide.
