**In Search of the Big Bang** John Gribbin,1998 In this radically revised and updated edition incorporating the latest scientific findings, acclaimed science writer and cosmologist John Gribbin explores the origins of the Universe and considers its ultimate fate.

*Alone in the Light* Brian Kenneth Swain,2011-05-25 In Chechnya, a terrible mistake costs a brilliant young engineer his family. In Istanbul, an oil tanker on its maiden voyage sinks for no apparent reason. In Moscow, an astonishing new weapon threatens to upset the balance of world power. And in Sochi, a cutting-edge energy facility opens for business. Movlady Saidov is a young man struggling to navigate a tightrope between rage and love, embroiled in a complex web of conspiracy only partly of his own making. His story is fiction, but the technology, the politics, and the tension are as real as the headlines of yesterdays newspaper. This is Swains most compelling thriller yet, drawing together the seemingly unrelated worlds of cryogenic fuel technology and directed energy weaponry and placing them at the center of a high-stakes game of global geopolitics. It will keep you guessing. It will keep you thinking. It will keep you engrossed until the final climactic moments.

**Solid State Nuclear Track Detectors** H. François,N.

Kurtz,J. P. Massue,2013-09-03 Solid State Nuclear Track Detectors is a collection of papers that covers various aspects of solid state nuclear track detectors. The book presents 130 articles that cover the concerns in the mechanisms, operations, and applications of solid state nuclear track detectors. The materials in the text are thematically grouped into three parts. The book first discusses the fundamental mechanisms, which include determination of the screening parameter from measurements of differential energy loss and atomic displacement effects from heavy ion induced coulomb explosion. Next, the selection presents articles that deal with the methodology of detectors, such as experimental track widths of low energy heavy ions in nuclear emulsion and structure of light nuclei tracks. The remaining papers cover the fields of applications, such as nuclear fusion; prospection of radioactive and fissionable minerals; dosimetry; and autoradiography. The book will be of great use to researchers and practitioners of disciplines related to nuclear science.
