*Special Education Design and Development Tools for School Rehabilitation Professionals* Singh, Ajay,Viner, Mark,Yeh, Chia Jung,2019-12-13 Educators who work with students with disabilities have the unique challenge of providing comprehensive and quality educational experiences for students who have a wide range of abilities and levels of focus. Pedagogies and educational strategies can be applied across a student population, though they tend to have varied success. Developing adaptive teaching methods that provide quality experiences for students with varied disabilities are necessary to promote success for as many of these students as possible. *Special Education Design and Development Tools for School Rehabilitation Professionals* is a comprehensive research publication that examines special education practices and provides in-depth evaluations of pedagogical practices for improved educational experiences for students with disabilities. Highlighting a range of topics such as bilingual education, psychometrics, and physical education, this book is ideal for special education teachers, instructors, rehabilitation professionals, academicians, school administrators, instructional designers, curriculum developers, principals, educational software developers, researchers, and students.

**The Astronomical Calculations and Ramadan** Zulfiqar Ali Shah,2009-01-01 This book shatters the myth that naked-eye sighting of the new moon and completing thirty days in the case of weather-related or other obscurities are the only two valid methods of determining the month of Ramadan. The author explains that certainty, not actual sighting, is the real objective of the Shariah and that the Qur'an does not mandate physical sighting. A careful analysis shows that those hadiths that seemingly require sighting actually require certainty. The assertion that all Muslim scholars prohibit the use of astronomical calculations, both in affirming or negating the month of Ramadan, is not correct. As calculation is now more accurate than naked-eye sighting, due to certain astronomical and scientific advancements, the use of calculation is the closest to the real objective of the Shari'ah and to the spirit of the hadiths.
