*Shifting Gears* Al Young,2005 Imagine a shy country girl, who had never traveled out of the United States,embarking on a yearlong bicycle trip around the world, leaving behind all the comforts of home to travel with 249 strangers. In *Shifting Gears*, she explains the turmoil she endured before leaving, the daily hardships encountered incamping and biking in Third World countries, the brutally long miles of daily riding, the language barriers, the personal dynamics of living with the same strangers 24 hours a day and dealing with a myriad of new personalities. Even a serious accident in France didn't slow Al down, and she returned to finish the trip she had spent four long years working to finance. She overcame lifelong insecurities to become a leader of fellow cyclists and went home with a desire to live her life differently than previously planned. Her idea of returning to Driggs, Idaho, refreshed and ready to teach another 10 years backfired, and she retired early to pursue dreams she never before felt able to accomplish. For Al, life began at 50 and she is slowly ticking off those dreams, one by one, as she realizes them. She now knows the fear of the unknown won't stand in her way and that there are fascinating people all over the world waiting to be part of her adventures.

**Buying a Bike** Rob Van der Plas,1999 Today, there are more bikes to choose from than ever before, and the choice is yours. With the help of this book, you'll make easy work of it. Clearly illustrated and concisely written, *Buying*

a Bike explains the differences to watch out for and how to make sure you get the bike that best suits your needs. Separate chapters on selecting the right bike and other equipment, determining the correct size, getting comfortable on the bike, buying secondhand bikes, using the gears, routine maintenance, and basic repairs.

*Velo - 2nd Gear* Sven Ehmann, Robert Klanten, 2013 Choosing a particular bicycle conveys an attitude and a way of life. For a young generation, bicycles have now replaced cars as the vehicles that best express its identity and this book shows why. Riding a bike is easy. Once someone can do it, they will never forget how. Riding a bike can be addictive--in the best cases for life. Understanding the subtleties of contemporary bicycle culture can be challenging. Like it or not, choosing to ride a particular bike--whether an old-fashioned city bicycle, a high-tech machine, a mountain bike, a touring bike, a fixie, or a beach cruiser--means being associated with a certain lifestyle. *Velo--2nd Gear* explores these diverse bicycle scenes and reveals their histories, relationships, and insightful details. Alongside its presentation of especially attractive and unusual bicycles, the book documents how riders' accessories and styles vary just as widely as the bikes' tires and other equipment. It explains how each scene cultivates its own distinct codes through the choice of certain jerseys, caps, or bags or by visiting specific events or key establishments. The examples in *Velo--2nd Gear* span the globe. Tours in traditional costumes and on historical paths in Belgium or Italy are not only appealing as athletic challenges, but also as adventures for cosmopolitan travelers. In urban centers at night, bicycle messengers hold races on city streets. Specialized bike boutiques focus on details such as customized paint jobs. Frame builders in Oregon, Paris, or southern Germany create highly coveted bikes tailored to individuals or in very limited editions with long waiting lists. *Velo--2nd Gear* makes abundantly clear that contemporary bicycle culture is more alive and well than ever before. The book celebrates its healthy, environmentally-friendly, discerning, and slightly obsessive scenes and their protagonists. It shows why, for a young generation, bicycles have now replaced cars as the vehicles that best express its identity.

The No-Drop Zone Patrick Brady, 2011 The No-Drop Zone contains all the information necessary for new cyclists to gain the knowledge and skills to take them from buying their first bicycle to starting their first race. Cyclists learn how to handle the bike, perform minor maintenance, select clothing and accessories, join clubs, and find events. The book also covers every aspect of riding in a group, emphasizing such specific skills as how to avoid bumping into other riders when riding in close quarters and fixing a flat quickly enough to rejoin the group. Author Patrick Brady explores the particular pleasures that come from group riding, a unique experience at once social (talking with friends while riding), exciting (descending in a group), and exhilarating (finishing a long hill). Brady also details the enormous fitness benefits of riding in a group. The No-Drop Zone has all the knowledge a cyclist needs to move to that next level of skill.

**Frostbike** Tom Babin, 2014 The bicycle is fast becoming a ubiquitous form of transportation in cities all over the world, making our urban spaces more efficient, more livable and healthier. But many of those bicycles disappear into basements and garages when the warm months end, parked there by owners fearful of the cold, snow and ice that winter brings. But does it have to be

that way? Canadian writer and journalist Tom Babin started questioning this dogma after being stuck in winter commuter traffic one dreary and cold December morning and dreaming about the happiness that bicycle commuting had brought him all summer long. So he did something about it. He pulled on some thermal underwear, dragged his bike down from the rafters of his garage and set out on a mission to answer a simple but beguiling question: is it possible to happily ride a bike in winter? That question took him places he never expected. Over years of trial and error, research and more than his share of snow and ice, he discovered an unknown history of biking for snow and ice, and a new generation designed to make riding in winter safe and fun. He unearthed the world's most bike-friendly winter city and some new approaches to winter cycling from places all over the world. He also looked inward, to discover how the modern world shapes our attitudes toward winter. And perhaps most importantly, he discovered the unique kind of bliss that can only come by pedalling through softly falling snow on a quiet winter night.

Shifting Gears at 50 Philip Buonpastore, 2012-01-24 From the publishers of *Motorcycle Consumer News*, *Shifting Gears at 50* is a one-of-a-kind motorcycling manual for returning and late-entry riders, essentially anyone 40 years old and up who's looking to hit the road on two wheels. Author Philip Buonpastore, a motorcycle journalist and retired US Air Force photographer, helps readers gear up to get back on a motorcycle (or get on one for the first time). In Part 1, *Becoming a Motorcyclist*, Buonpastore discusses the basics of buying the right bike, gear, and equipment and getting the bike up to speed. The book continues with a good overview of learning to ride, the importance of taking a road course, venturing out on the first ride, and extending rides to long-distance jaunts. Throughout Part 1 are sidebars by riding- safety instructor and expert Walt Fulton, offering sound advice on safety precautions and execution for every leg of the new and returning rider's journey. The author emphasizes what older riders should be aware of and which factors can affect their rides. Adding lots of great firsthand advice are humorous and helpful stories collected by the author and related by returning riders at various ages, from their late 30s to 60s. In

Part 2, Buonpastore shares five of his favorite travelogues covering his long-distance tours around the US, from the American South to the west coasts. This section is illustrated by over 100 of the author's breathtaking photographs of the various locations he toured on his bike. The foreword to the book is provided by best-selling motorcycle author David Hough (author of I-5 Press's *Proficient Motorcycling and Mastering the Ride*). Hough writes, If you're getting into today's motorcycling at an age your doctor would describe as 'middle aged' or 'senior,' do you yourself a clever favor and read Phil's book.
