A quick but comprehensive intro chapter on finding the right bike for every need (and why so many cyclists are sure they need one of each!), which includes detailed information on what to look for in a new or used bike, when to pay a little more for components, and where you can economize creatively. Filled with practical, wheels-on-the-ground tips, this book will make you a better rider, take you places you never thought you’d go, and make sure you never get stranded by the roadside without the tools or know-how to fix your ride. Detailed directions describe rides leaving Havana to the west and east. Subsequent rides are clustered in the three best regions of Cuba for cycling: Pinar del Rio, Central Cuba, and the Oriente. Organized cleverly by regions outside Havana that are just made for cycling, this guide will include 36 rides that make the most of every mile. In addition to directions, maps, and a scenic itinerary for each ride, there will also be

crucial information for the bicycling traveler, including where to get supplies and equipment, how to safely park your bike, safety tips, and more.

**The Lancashire Cycleway** Jon Sparks, 2017-02-23 The 265 mile (425km) Lancashire Cycleway showcases the idyllic scenery of England's historic Red Rose County. Comprising of two distinct loops that intersect at Whalley in the Ribble Valley, the Northern Loop contrasts the quiet lanes and peaceful countryside of northwestern Lancashire with the thrill of the open moors of the Forest of Bowland AONB; the Southern weaves its way between the villages and towns in the south of the county, an area rich in social history. Easily accessible from the region's rail network, the route - which is all on-road - can be cycled either as a tour or a series of day rides. This guidebook presents the Lancashire Cycleway in 11 stages of 16.5 - 30.9 miles (26.6 - 49.7km), plus two short connections to link the loops to the major regional stations at Lancaster and Wigan, as well as 17 varied day rides for those wishing to explore the county further. Detailed route description and 1:100,000 mapping is presented alongside a wealth of information on local points of interest and facilities, and the magnificent colour photography offers a small taste of what the routes have to offer. The guide also includes useful advice for those new to cycling or cycle touring.

**Training and Racing with a Power Meter, 2nd Ed.** Hunter Allen, Andrew Coggan, 2012-11-27 Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new

edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

**Bicycling with Butterflies** Sara Dykman,2021-04-13 “What a wonderful idea for an adventure! Absolutely inspired, timely, and important.” –Alistair Humphreys, National Geographic Adventurer of the Year and author of The Doorstep Mile and Around the World by Bike Outdoor educator and field researcher Sara Dykman made history when she became the first person to bicycle alongside monarch butterflies on their storied annual migration—a round-trip adventure that included three countries and more than 10,000 miles. Equally remarkable, she did it solo, on a bike cobbled together from used parts. Her panniers were recycled buckets. In Bicycling with Butterflies, Dykman recounts her incredible journey and the dramatic ups and downs of the nearly nine-month odyssey. We’re beside her as she navigates unmapped roads in foreign countries, checks roadside milkweed for monarch eggs, and shares her passion with eager schoolchildren, skeptical bar patrons, and unimpressed border officials. We also meet some of the ardent monarch stewards who supported her efforts, from citizen scientists and researchers to farmers and high-rise city dwellers. With both humor and humility, Dykman offers a compelling story, confirming the urgency of saving the threatened monarch migration—and the other threatened systems of nature that affect the survival of us all.
