Real Kids Susan Engel,2009-07-01 Decades of work in psychology labs have vastly enhanced our knowledge about how children perceive, think, and reason. But it has also encouraged a distorted view of children, argues psychologist Susan Engel in this provocative and passionate book--a view that has affected every parent who has tried to debate with a six-year-old. By focusing on the thinking processes prized by adults, too many expert opinions have rendered children as little adults. What has been lost is what is truly unique and mysterious--the childlike quality of a child's mind. Engel draws on keen observations and descriptive research to take us into the nearly forgotten, untidy, phantasmagorical world of children's inner lives. She reminds us that children fuse thought and emotion, play and reality; they swing wildly between different ways of interpreting and acting in the world. But just as a gawky child may grow into a beauty, illogical and sometimes maddening childishness can foreshadow great adult ability. Engel argues that the scientist in a crib view encourages parents and teachers to expect more logical reasoning and emotional self-control from children than they possess. She provides a concise and valuable overview of what modern developmental psychologists have learned about children's developing powers of perception and capacity for reasoning, but also suggests new ways of studying children that better capture the truth about their young minds.

Gender and Gentrification Winifred Curran,2017-08-10 This book explores how gentrification often reinforces traditional gender roles and spatial constructions during the process of reshaping the labour, housing, commercial and policy landscapes of the city. It focuses in particular on the impact of gentrification on women and racialized men, exploring how gentrification increases the cost of living, serves to narrow housing choices, make social reproduction more expensive, and limits the scope of the democratic process. This has resulted in the displacement of many of the phenomena once considered to be the emancipatory hallmarks of gentrification, such as gayborhoods. The book explores the role of gentrification in the larger social processes through which gender is continually reconstituted. In so doing, it makes clear that the negative effects of gentrification are far more wide-ranging than popularly understood, and makes recommendations for renewed activism and policy that places gender at its core. This is valuable reading for students, researchers, and activists interested in social and economic geography, city planning, gender studies, urban studies, sociology, and cultural studies.

The Culturalization of Citizenship Jan Willem Duyvendak,Peter Geschiere,Evelien Tonkens,2016-06-30 The notion of citizenship has gradually evolved from being simply a legal status or practice to a deep sentiment. Belonging, or feeling at home, has become a requirement. This groundbreaking book analyzes how 'feeling rules' are developed and applied to migrants, who are increasingly expected to express feelings of attachment, belonging, connectedness and loyalty to their new country. More than this, however, it demonstrates how this culturalization of citizenship is a global trend with local variations, which develop in relation to each other. The authors pay particular attention to the intersection between sexuality, race and ethnicity, spurred on by their awareness of the dialectical construction of homosexuality, held up as representative of liberal Western values by both those in the West and by African leaders, who use such claims as proof that homosexuality is un-African.
