This lavishly illustrated filmography details 32 sizzling fun-in-the-sun teenage epics from Gidget to the Beach Party movies with Frankie and Annette to The Sweet Ride plus a few offshoots in the snow!) Entries include credits, plot synopses, memorable lines, reviews and awards, and commentary from such as Aron Kincaid of The Girls on the Beach, Susan Hart of The Ghost in the Invisible Bikini, Peter Brown of Ride the Wild Surf, Chris Noel of Beach Ball, and Ed Garner of Beach Blanket Bingo. Biographies of actors and leading actresses who made their marks in the genre are included.

Faith in Bikinis Anthony Joseph Stanonis,2014 This is a study of six beach resort communities on the U.S. South's Atlantic and Gulf coasts: Galveston, Biloxi, Panama City, St. Augustine, Myrtle Beach, and Virginia Beach. As these cities became leisure destinations in the late nineteenth and early twentieth centuries, Anthony Stanonis argues, they were forced to balance the competing demands of modernizing consumer culture and Southern traditionalism. They also participated in an especially delicate dance regarding race--one involving everything from cultural anxieties around tanning to a practical desire to tamp down the sort of racial conflict that might discourage tourism. Stanonis suggests that these negotiations were not always successful. Residents of the beach towns who did not profit from tourism and resented catering to outsiders' values, for example, sometimes struck back through acts of violence. Stanonis traces the rise of the infrastructure of tourism, the tensions of preserving the environment, and the

development of a profitable industry in a clear and objective fashion. More importantly, he explores the complexities of race, ethnicity, sexuality, and the tensions between a resort's illegal underground and its 'family entertainment.' The text contains a breadth of archival sources--including the author's own personal collection. The sources blend the perspectives of boosters and developers with those of residents and tourists. Stanonis skillfully weaves the stories of actual people throughout the historical narrative he constructs, which makes the manuscript both more enjoyable and more relevant--

The World's Beaches Orrin H. Pilkey, William J. Neal, James Andrew Graham Cooper, Joseph T. Kelley, 2011-07-26 Take this book to the beach; it will open up a whole new world. Illustrated throughout with color photographs, maps, and graphics, it explores one of the planet's most dynamic environments—from tourist beaches to Arctic beaches strewn with ice chunks to steaming hot tropical shores. *The World's Beaches* tells how beaches work, explains why they vary so much, and shows how dramatic changes can occur on them in a matter of hours. It discusses tides, waves, and wind; the patterns of dunes, washover fans, and wrack lines; and the shape of berms, bars, shell lags, cusps, ripples, and blisters. What is the world's longest beach? Why do some beaches sing when you walk on them? Why do some have dark rings on their surface and tiny holes scattered far and wide? This fascinating, comprehensive guide also considers the future of beaches, and explains how extensively people have affected them—from coastal engineering to pollution, oil spills, and rising sea levels.

The Lure of the Beach Robert C. Ritchie, 2021-05-11 A human and global take on a beloved vacation spot. The crash of surf, smell of salted air, wet whorls of sand underfoot. These are the sensations of the beach, that environment that has drawn humans to its life-sustaining shores for millennia. And while the gull's cry and the cove's splendor have remained constant throughout time, our relationship with the beach has been as fluid as the runnels left behind by the tide's turning. *The Lure of the Beach* is a chronicle of humanity's history with the coast, taking us from the seaside pleasure palaces of Roman elites and the aquatic rituals of medieval pilgrims, to the venues of modern resort towns and beyond. Robert C. Ritchie traces the contours of the material and social economies of the beach throughout time, covering changes in the social status of beach goers, the technology of transport, and the development of fashion (from nudity to Victorianism and back again), as well as the geographic spread of modern beach-going from England to France, across the Mediterranean, and from nineteenth-century America to the world. And as climate change and rising sea levels erode the familiar faces of our coasts, we are poised for a contemporary reckoning with our relationship—and responsibilities—to our beaches and their ecosystems. *The Lure of the Beach* demonstrates that whether as a commodified pastoral destination, a site of ecological resplendency, or a flashpoint between private ownership and public access, the history of the beach is a human one that deserves to be told now more than ever before.

Climate Change at the City Scale Anton Cartwright, Susan Parnell, Gregg Oelofse, Sarah Ward, 2012-06-14 Climate change impacts are scale and context specific, and cities are likely to bear some of the greatest costs. In recent years cities have begun to craft their own climate change responses against the backdrop of the reluctance displayed by nation-states in committing to emissions reductions and managing the consequences of climate change. *Climate Change at the City Scale* presents a fresh contribution to climate change literature, which has largely neglected the role of cities in spite of their increasingly important role in the global economy. The book focuses on the impacts of climate change in the rapidly evolving city of Cape Town, and captures the experiences of the Cape Town Climate Change Think Tank, a hybrid knowledge partnership which has produced research on a range of urban governance, impacts, mitigation and adaptation challenges by the City. Cape Town has long been acknowledged as an innovator in the area of urban environmental management, notwithstanding its limited resources to manage the demand for a more resilient and equitable future. By documenting the work and experiences of the City's efforts to define its own climate future, the book provides a provocative case study of the way in which the science-policy interface can be managed to inform urban transformation.

Sand Rush Elsa Devienne,2024 An original approach to the iconic landscape of California--the beaches of Los Angeles--this book recovers untold stories of presidential jaunts, wild spring break celebrations, underground gay beaches, and engineering feats that enlarged the shores overnight. From the creation of a mini-Venice on the LA sands in 1905 to Baywatch's David Hasselhoff and Pamela Anderson captivating billions of television viewers worldwide in the 1990s, the book offers a comprehensive look at a landscape that is at once natural and artificial, but now under threat from climate change and rising sea levels.

The American Surfer Kristin Lawler, 2010-10-18 The image of surfing is everywhere in American popular culture – films, novels, television shows, magazines, newspaper articles, music, and especially advertisements. In this book, Kristin Lawler examines the surfer, one of the most significant and enduring archetypes in American popular culture, from its roots in ancient Hawaii, to Waikiki beach at the dawn of the twentieth century, continuing through Depression-era California, cresting during the early sixties, persistently present over the next three decades, and now, more globally popular than ever. Throughout, Lawler sets the image of the surfer against the backdrop of the negative reactions to it by those groups responsible for enforcing the Puritan discipline – pro-work, anti-spontaneity – on which capital depends and thereby offers a fresh take on contemporary discussions of the relationship between commercial culture and counterculture, and between counterculture and capitalism.
