Comparison of Tire/road Coefficient of Friction Testing Methods Greg William Gould, 1995 Three different tire/road coefficient of friction measuring methods are investigated and compared for their use in the field of vehicular accident reconstruction. Locked-wheel skid tests, considered to be the most accurate method, were performed with an instrumented test vehicle to establish base values that could be compared to values measured using a tow cable method and a portable drag sled method. A set of high performance radial tires and a set of standard production radial tires were each tested on two different surfaces to broaden the range of friction values measured. In a series of tow cable tests, the test vehicle was pulled, with wheels locked, over each surface at low speeds. The tow cable coefficient of

friction decreased with increasing sliding speed. Portable drag sleds were constructed from a tire in each tire set. Weights were added to each drag sled to study the effect of increasing load on the coefficient of friction. Tests were performed with drag sleds weighing 26 pounds, 51 pounds, and 76 pounds. The drag sled coefficient of friction was independent of sliding speed. The investigation showed a correlation did not exist between the coefficient of friction values determined by the drag sled and tow cable methods when compared to the values determined by the locked-wheel skid test method. Depending on the tire/surface combination tested, the tow cable tests overestimated the skid test coefficient of friction by 28 to 81.4 percent. Similarly, the drag sleds overestimated the skid test coefficient of friction by 31.4 percent to as much as 114.5 percent

Grit Angela Duckworth, 2016-05-03 In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It

was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. “Duckworth’s ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among Grit’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).

The British Are Coming (Young Readers Edition) Rick Atkinson, 2022-11-29 How did the United States become the country it is today? What led to its creation? Adapted from Pulitzer Prize-winner Rick Atkinson's deeply researched and stunningly vivid *The British Are Coming*, the young readers edition explores these questions and so much more as it delves into the American Revolution. A collection of key battles from the beginning of the war, including Lexington and Concord and the Battle of Bunker Hill, sets the scene, telling a story of liberation fraught with contradiction and intrigue. History buffs and newcomers alike will be drawn into this fascinating, photo-illustrated account.

Far From True Linwood Barclay, 2016-03-08 New York Times and #1 international bestselling author Linwood Barclay delivers the second spine-chilling thriller set in the troubled town of Promise Falls, following the electrifying cliffhanger ending of *Broken Promise*... After the screen of a run-down drive-in movie theater collapses and kills four people, the daughter of one of the victims asks private investigator Cal Weaver to look into a recent break-in at her father's house. Cal discovers a hidden basement room where it's clear that salacious activities have taken place—as well as evidence of missing DVDs. But his investigation soon becomes more complicated when he realizes it may not be discs the thief was actually interested in.... Meanwhile, Detective Barry Duckworth is still trying to solve two murders—one of which is three years old—he believes are connected, since each featured a

similar distinctive wound. As the lies begin to unravel, Cal is headed straight into the heart of a dark secret as his search uncovers more startling truths about Promise Falls. And when yet another murder happens, Cal and Barry are both driven to pursue their investigations, no matter where they lead. Evil deeds long thought buried are about to haunt the residents of this town—as the sins of the past and present collide with terrifying results.

A-10s Over Kosovo Phil M. Haun,Christopher E. Haave,Air University Press,2011 First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, marked a real turning point . . . and proved that a war can be won by airpower alone. Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower-the members of the 40th Expeditionary Operations Group. Their descriptions-a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot-provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian

president, Slobodan Milosevic, to capitulate.
