In this choose-your-own-path version of *Romeo and Juliet*, you choose where the story goes every time you read! What if Romeo never met Juliet? What if Juliet got really buff instead of moping around the castle all day? What if they teamed up to take over Verona with robot suits? Whatever your adventure, you're guaranteed to find lots of romance, lots of epic fight scenes, and plenty of questionable decision-making by very emotional teens. All of the endings—there are over a hundred—feature beautiful illustrations by some of the greatest artists working today,

including New York Times bestsellers Kate Beaton, ND Stevenson, Randall Munroe, and Jon Klassen. Packed with exciting choices, fun puzzles, secret surprises, terrible puns, and more than a billion possible storylines, Romeo and/or Juliet offers a new experience every time you read it. **Indigenous Data Sovereignty and Policy** Maggie Walter, Tahu Kukutai, Stephanie Russo Carroll, Desi Rodriguez-Lonebear, 2020-10-29 This book examines how Indigenous Peoples around the world are demanding greater data sovereignty, and challenging the ways in which governments have historically used Indigenous data to develop policies and programs. In the digital age, governments are increasingly dependent on data and data analytics to inform their policies and decision-making. However, Indigenous Peoples have often been the unwilling targets of policy interventions and have had little say over the collection, use and application of data about them, their lands and cultures. At the heart of Indigenous Peoples' demands for change are the enduring aspirations of self-determination over their institutions, resources, knowledge and information systems. With contributors from Australia, Aotearoa New Zealand, North and South

America and Europe, this book offers a rich account of the potential for Indigenous data sovereignty to support human flourishing and to protect against the ever-growing threats of data-related risks and harms.
