Port Moresby: Taim bipo Stuart Hawthorne, 2011-11-22 This book is about Port Moresby – the capital of Papua New Guinea – but it is not about the city of today. Rather, it is about taim bipo (a Pidgin English term meaning ‘previously’ or ‘as it was’), about how life was lived in Port Moresby in the two decades before 1975 when PNG was still under Australian control. These were years of peace and progress—when it was still a ‘lovely and gentle city’ – far removed from the somewhat turbulent times that followed PNG’s independence. With over 400 illustrations, this volume is a fascinating slice through time, capturing page after page of this unique period of history that Australia and PNG share. Anyone who has ever lived in Port Moresby or has the slightest affection for how the town used to be will find it impossible to put this book down.

Adaptive Hypermedia and Adaptive Web-Based Systems Wolfgang Nejdl, Judy Kay, Pearl Pu, Eelco Herder, 2008-07-30 Adaptive Hypermedia has emerged as an important area of both academic and deployed research. It encompasses a broad range of research that will enable personalized, adaptive hypermedia systems to play an even more effective role in people’s lives. The Web has enabled the widespread use of many personalized systems, such as recommenders, personalized filters and retrieval systems, e-learning systems and various forms of collaborative systems. Such systems have been widely deployed in diverse domains such as e-Commerce, e-Health, e-Government, digital libraries, personalized travel planning as well as tourist and cultural heritage services. They are particularly promising for users with special needs. The exciting possibilities of such deployed adaptive hypermedia systems rely on research progress in a broad range of areas such as: user profiling and modeling; acquisition, updating and management of user models; group modeling and community-based profiling; recommender systems and recommendation strategies; data mining for personalization; the Semantic Web; adaptive multimedia content authoring and delivery; ubiquitous computing environments and Smart Spaces; personalization for the plethora of mobile devices, such as PDAs, mobile phones and other hand-held devices; and pragmatics such as privacy, trust and security. Empirical studies of adaptive hypermedia and Web systems are also critical to informing future directions. The Adaptive Hypermedia conferences have become the major forums for the scientific exchange and presentation of research results on adaptive hypermedia and adaptive Web-based systems.

Opinion Polls Nick Moon, 1999-06-12 Challenging received opinion and breaking new ground in Kipling scholarship, these essays on Kipling's attitudes to the First World War, to the culture of

Edwardian England, to homosexuality and to Jewishness, bring historical, literary critical and postcolonial approaches to this perennially controversial writer. The Introduction situates the book in the context of Kipling's changing reputation and of recent Kipling scholarship. After the perspectives of Chesterton (1905), Orwell (1942) and Jarrell (1960), newer contributions address Kipling's approach to the Boer war, his involvement with World War One, his Englishness and the politics of literary quotation. Different aspects of Kipling's relation to India are explored, including the 'Mutiny', Eastern religions, his Indian travel writings and his knowledge of 'the vernacular'. This collection, whose contributors include Hugh Brogan, Dan Jacobson, Daniel Karlin and Bryan Cheyette, is essential reading for academics and students of Kipling, Victorian and Edwardian English literature and cultural history.

*Event Classification in Liquid Scintillator Using PMT Hit Patterns* Jack Dunger, 2019-11-13 The search for neutrinoless double beta decay is one of the highest priority areas in particle physics today; it could provide insights to the nature of neutrino masses (currently not explained by the Standard Model) as well as how the universe survived its early stages. One promising experimental approach involves the use of large volumes of isotope-loaded liquid scintillator, but new techniques for background identification and suppression must be developed in order to reach the required sensitivity levels and clearly distinguish the signal. The results from this thesis constitute a significant advance in this area, laying the groundwork for several highly effective and novel approaches based on a detailed evaluation of state-of-the-art detector characteristics. This well written thesis includes a particularly clear and comprehensive description of the theoretical motivations as well as impressively demonstrating the effective use of diverse statistical techniques. The professionally constructed signal extraction framework contains clever algorithmic solutions to efficient error propagation in multi-dimensional space. In general, the techniques developed in this work will have a notable impact on the

field.

**Oxford Handbook of Personality Assessment** James N. Butcher, 2009-07-14 As one of psychology's oldest fields, personality assessment is one of the most extensively studied subsets of contemporary psychology. This work synthesizes new and existing literature with clinical practice to provide a comprehensive volume on contemporary personality assessment.

Selected Topics in Inorganic Chemistry Wahid U Malik | GD Tuli | RD Madan, 1998 Selected Topics in Inorganic Chemistry is a comprehensive textbook discussing theoretical aspects of Inorganic

Chemistry. Uniqueness of the book lies in treatment of all fundamental concepts, such as, Structure of Atom, Chemical Bonding, Inner Transition Elements and Coordination Chemistry, with a modern approach. Illustration of text with relevant line diagrams and tabular presentation of data makes understanding of concepts lucid and simple. The book is designed for B.Sc. (Honours) and M.Sc. students.

**Squirrels in the Wall** Henry Hitz, 2019-10-29 *Squirrels in the Wall*—a novel told in stories by a collection of interspecies voices—presents a unique and darkly hilarious blend of human and animal perspectives in a single setting on a Wisconsin lake. The stories provide a kaleidoscope of heartbreak among both human and animal characters as they confront abuse and death. “They call me Herziger, but my real name is Woof,” one of the stories opens. “They call me a dachshund, but in reality, I am just a dog. I live with my mother among a pack of wild humans in a big house on a lake.” In the second story, “Squirrels in the Wall,” Herzie’s “human,” Barney Blatz, experiences a fire in that house when he is just four. The stories follow Barney from infancy to death, tracing the epic, ongoing conflict between him and Father—a bumbling tyrant guilty of shocking abuse but also capable of poignant redemption. On this rollicking journey, we meet a suicidal toad, a cat, two mice, a bee, Grandfather’s ghost, and a turtle who possesses Barney in a climactic tale of environmental activism gone awry. Other stories reflect the points of view of Barney’s mother, sister, and older brother; together, they construct a collage of spectacular family dysfunction—and of healing love.

*High-Frequency Oscillator Design for Integrated Transceivers* Johan van der Tang, Dieter Kasperkovitz, Arthur H. M. van Roermund, 2003-09-30 *High-Frequency Oscillator Design for Integrated Transceivers* covers the analysis and design of all high-frequency oscillators required to realize integrated transceivers for wireless and wired applications. This includes the design of oscillator types as single-phase LC oscillators, I/Q LC oscillators, multi-phase LC oscillators, and ring oscillators in various IC technologies such as bipolar, BiCMOS, CMOS, and SOI (silicon on insulator). Starting from an in depth review of basic oscillator theory, the authors discuss key oscillator specifications, numerous oscillator circuit topologies, and introduce the concepts of design figures of merit (FOMs) and benchmark FOMs, which assist the oscillator designer during the overall design cycle. Taking advantage of behavioral modeling, the elementary properties of LC oscillators and ring oscillators are analyzed first. A detailed analysis of oscillator properties at circuit level follows taking parasitic elements and other practical aspects of integrated oscillator design into account. Special attention is given to advantages and limitations of linear time invariant (LTI) phase noise modeling, leading to the

concept of optimum coupling in I/Q LC oscillators and a simulation method for fast and efficient phase noise optimization in oscillators. In addition, all modern linear time variant (LTV) phase noise theories are covered. As not only phase noise is of high importance to the designer, but optimization of other oscillator properties as well, additional subjects such as various tuning methods of LC oscillators are analyzed, too. Design examples of integrated LC and ring oscillators in the frequency range of 100 MHz up to 11 GHz are thoroughly discussed throughout the book. The clear and structured discussion of basic oscillator properties make High-Frequency Oscillator Design for Integrated Transceivers an excellent starting point for the inexperienced oscillator designer. The detailed analysis of many oscillator types and circuit topologies, the discussion of numerous practical design issues together with fast optimization methods, and more than 200 carefully selected literature references on oscillator literature, LC oscillator and ring oscillator designs make this book a very valuable resource for the experienced IC designer as well.

The Good Politician Nick Clarke, Will Jennings, Jonathan Moss, Gerry Stoker, 2018-04-26 Surveys show a lack of trust in political actors and institutions across much of the democratic world. Populist politicians and parties attempt to capitalise on this political disaffection. Commentators worry about our current 'age of anti-politics'. Focusing on the United Kingdom, using responses to public opinion surveys alongside diaries and letters collected by Mass Observation, this book takes a long view of anti-politics going back to the 1940s. This historical perspective reveals how anti-politics has grown in scope and intensity over the last half-century. Such growth is explained by citizens' changing images of 'the good politician' and changing modes of political interaction between politicians and citizens. Current efforts to reform and improve democracy will benefit greatly from the new evidence and conceptual framework set out in this important study.

Public Opinion and the End of Appeasement in Britain and France Daniel Hucker, 2016-04-15 The

1930s policy of appeasement is still fiercely debated by historians, critics and contemporary political commentators, more than 70 years after the signing of the 1938 Munich Agreement. What is less well-understood, however, is the role of public opinion on the formation of British and French policy in the period between Munich and the outbreak of the Second World War; not necessarily what public opinion was but how it was perceived to be by those in power and how this contributed to the policymaking process. It therefore fills a considerable gap in an otherwise vast literature, seeking to ascertain the extent to which public opinion can be said to have influenced the direction of foreign policy in a crucial juncture of British and French diplomatic history. Employing an innovative and unique methodological framework, the author distinguishes between two categories of representation: firstly, 'reactive' representations of opinion, the immediate and spontaneous reactions of the public to circumstances and events as they occur; and secondly, 'residual' representations, which can be defined as the remnants of previous memories and experiences, the more general tendencies of opinion considered characteristic of previous years, even previous decades. It is argued that the French government of Édouard Daladier was consistently more attuned to the evolution of 'reactive' representations than the British government of Neville Chamberlain and, consequently, it was the French rather than the British who first pursued a firmer policy towards the European dictatorships. This comparative approach reveals a hitherto hidden facet of the diplomatic prelude to the Second World War; that British policy towards France and French policy towards Britain were influenced by their respective perceptions of public opinion in the other country. A sophisticated analysis of a crucial period in international history, this book will be essential reading for scholars of the origins of World War II, the political scenes of late 1930s Britain and France, and the study of public opinion and its effects on policy.

**The Structure of Complementation** Antonio Carlos Quicoli, 1982-01-01 The study of complementation has received considerable attention in generative studies. Following Rosenbaum's (1967) pioneering study of the English complement system, there are extensive studies by Lakoff (1965), Ross (1967), Perlmutter (1971) and a large number of publications. More recent detailed studies are Emonds (1970) and Bresnan (1972). These studies have increased enormously the body of factual knowledge about the complement system of English, and about the phenomenon of complementation in general. As a consequence there are a number of empirical hypotheses about the structure of human languages which must now be tested against facts of different languages. Of these hypotheses, perhaps the most interesting is that the grammars of all languages make use of the principle of the transformational cycle. Testing this hypothesis constitutes one of the main concerns of the present book. Furthermore, these studies have also raised numerous interesting empirical issues of great importance for linguistic theory, most of which are still awaiting fresh evidence from different languages in order to be settled. This study is directed towards resolving some of these issues by adducing relevant data, primarily from Portuguese.

**Bipo: Bestsellers in 2023** The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Let's delve into the realm of bestselling books, exploring the engaging narratives that have enthralled audiences this year. **The Must-Read :** Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. **Bipo :** Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. **Bipo :** Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world

of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. *The Secret History* is an exceptional and thrilling novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
