their detail, *The Art of Birds* captures the beauty of birds as most people never see them. They also depict the charm of smaller species including the ruddy turnstone, boat-tailed grackle, and the least bittern. Many of the photographs display brilliant plumage up close. Others show aspects of bird life related to courting, feeding, and flying. Accompanying the images are descriptions of the species by early naturalists and ornithologists, from William Bartram to John James Audubon to Arthur Cleveland Bent. The excerpts from their narratives and journals reveal bird populations and environments that we can only imagine today, providing an homage to Old Florida through the perspectives of some of its most astute and eloquent chroniclers.
