A World on the Wing: The Global Odyssey of Migratory Birds Scott Weidensaul, 2021-03-30 New York Times Bestseller Finalist for the Los Angeles Times Book Prize A Library Journal Best Science and Technology Book of the Year An exhilarating exploration of the science and wonder of global bird migration. In the past two decades, our understanding of the navigational and physiological feats that enable birds to cross immense oceans, fly above the highest mountains, or remain in unbroken flight for months at a stretch has exploded. What we've learned of these key migrations—how billions of birds circumnavigate the globe, flying tens of thousands of miles between hemispheres on an annual basis—is nothing short of extraordinary. Bird migration entails almost unfathomable endurance, like a sparrow-sized sandpiper that will fly nonstop from Canada to Venezuela—the equivalent of running 126 consecutive marathons without food, water, or rest—avoiding dehydration by drinking moisture from its own muscles and organs, while orienting itself using the earth's magnetic field through a form of quantum entanglement that made Einstein queasy. Crossing the Pacific Ocean in nine days of nonstop flight, as some birds do, leaves little time for sleep, but migrants can put half their brains to sleep for a few seconds at a time, alternating sides—and their reaction time actually improves. These and other revelations convey both the wonder of bird migration and its global sweep, from the mudflats of the Yellow Sea in China to the remote mountains of northeastern India to the dusty hills of southern Cyprus. This breathtaking work of nature writing from Pulitzer Prize finalist Scott Weidensaul also introduces readers to those scientists, researchers, and bird lovers trying to preserve global migratory patterns in the face of climate change and other environmental challenges. Drawing on his own extensive fieldwork, in *A World on the Wing* Weidensaul unveils with dazzling prose the miracle of nature taking place over our heads.

Tales from Concrete Jungles David Lindo,2015-06-18 Born and raised in London, David Lindo's passionate interest in the natural world, especially birds, began at an early age. His thriving curiosity opened a door for him into an unexplored world of urban birding. Years later he decided to champion the delights of birding in cities and reinvented himself as the Urban Birder. Using this illustrious alias David Lindo has brought urban birding back into the public consciousness, promoting its virtues at every opportunity and writing about it in the birding press. He urges people to look up when walking around in cities, or to stop and close your eyes in a busy street just to listen to the birds that may be singing. In his second book, David visits some of the world's most unnatural environments, revealing the astonishingly diverse range of wildlife that can be found when you take the time to look. Much more than a compendium of birding sites, each tale follows the Urban Birder in his enthralling pursuit of city birding. Accompanied by dedicated local conservationists and renowned birders, David gives a deeper insight into the true nature of each city. Featuring 70 locations to explore, Tales from Concrete Jungles is the perfect book to dip in to when on the move, or to hide away with on a rainy afternoon. Join David in his celebration of nature, pick up travel inspiration, and immerse yourself in his captivating quest for urban birding.

Living on the Wind Scott Weidensaul,1957-08 Bird migration is the world's only true unifying natural phenomenon, stitching the continents together in a way that even the great weather systems fail to do. Scott Weidensaul follows awesome kettles of hawks over the Mexican coastal plains, bar-tailed godwits that hitchhike on gale winds 7,000 miles nonstop across the Pacific from Alaska to New Zealand, and myriad songbirds whose numbers have dwindled so dramatically in recent decades. Migration paths form an elaborate global web that shows serious signs of fraying, and Weidensaul delves into the tragedies of habitat degradation and deforestation with an urgency that brings to life the vast problems these miraculous migrants now face. Living on the Wind is a magisterial work of nature writing.
