The Birds of Ireland Jim Wilson, Mark Carmody, 2013-09-04 An important tool of a birdwatcher is a good identification guide. Most cover the birds of Europe and few deal exclusively with Ireland. This first photographic identification guide to the birds of Ireland has over 1,600 photos of more than 260 species, in an easy, quick-reference format. With eight to fifteen images per species, the key identification features of each bird are shown, with concise descriptions and pointers to indicate important features. This guide is produced in association with BirdWatch Ireland, Ireland's leading bird-conservation organisation. The purchase of this guide contributes funds to BirdWatch Ireland's conservation and education initiatives to help protect and promote Ireland's wild birds and habitats. similar to: Ireland's Garden Birds by Jim Wilson and Oran O'Sullivan.

Estuary Birds of Britain and Ireland A.J Prater, 2010-11-30 Estuaries are rightly of great interest and concern to the birdwatcher. Most teem with thousands of waders, geese, ducks, gulls and other species that use them at times throughout the year; they are also among the last of the wild places left in Britain and Europe. The Birds of Estuaries Enquiry (sponsored by the Nature Conservancy Council and organised by the BTO, RSPB and the Wildfowl Trust) spanned six years, and Tony Prater's report now provides a detailed insight into the birds which use and, in many cases, depend on this special habitat. Of great interest to birdwatchers, the book also will be essential reading for professional conservationists and all involved in the planning and use of estuaries. It assesses the importance of each estuary and the distribution and numbers of all species generally present, and by

setting this in an international framework demonstrates the remarkable importance of the estuaries around these islands. Threats to the fabric of the landscape and its wildlife abound, and estuaries are not exempt. Barrage schemes, industrial and agricultural reclamations and many other pressures exist and are the subject of chapters which survey the situation, now and in the future. The text is graced by John Busby's accomplished and evocative drawings and there are numerous maps and diagrams as well as photographs of typical estuaries. Jacket illustration by John Busby.

Birds New to Britain and Ireland J.T.R. Sharrock,P. J. Grant,2010-11-30 The 83 species featured in this book, in date sequence of discovery, had not been recorded in Britain or Ireland before 1946. The original accounts of the sightings published in issues of British Birds* between 1947 and 1982 are now reprinted and supplemented with comment by Dr Sharrock on subsequent occurrences and current status. In addition, Peter Grant provides identification notes drawing attention to points not covered in the original accounts. There is also a world distribution map for each species and a line illustration to head each of the accounts. At the end of the book a section of plates reproduces 81 'first-sighting' photographs covering 32 of the species in the book.
