Christmas Days Derek McCormack,2005-10-01 What do the doors of Advent calendars conceal? Chocolates, sometimes, or toys. Sometimes there are illustrations of chocolates and toys. And holly. And snow. Things that make Christmas Christmas in Canada. Embark on a new Yuletide tradition with this Advent calendar in words and images, wonderfully illustrated by Seth, and with sharp prose by Derek McCormack that captures the Canadian Christmas.

**The Structure and Function of Nervous Tissue V2** Geoffrey Bourne,2012-12-02 The Structure and Function of Nervous Tissue, Volume IV: Physiology II and Biochemistry II focuses on the structure and function of nervous tissue. It investigates the plasticity of synapses, their degeneration and regeneration, neuronal inclusions, RNA of nervous tissue, and molecular organization of neural information processing. Furthermore, it covers topics on gamma-aminobutyric acid (GABA) in the nervous system, the blood-brain barrier, and the extracellular space (ECS) in the vertebrate central nervous system (CNS). Organized into 10 chapters, this volume begins with an overview of synapses, with emphasis on changes in both the efficacy of individual synapses and the numbers of synapses made by axons upon neurons. It then discusses the orthograde terminal degeneration of synapses and the use of light and electron microscopy in studying synapse degeneration and regeneration. It also explains the synthesis, storage, and release of acetylcholine from nerve terminals; inclusions associated with viral infections; metabolism of RNA in nervous tissue; chemical correlates of information processing; metabolism of GABA in mammalian CNS; electrical activity of the normal brain; and chemistry of the cerebrospinal fluid. The book concludes with a chapter on the mechanism by which vertebrate central nervous tissue alters the magnitude of the ECS. This book will be of interest to anatomists, embryologists, biochemists, pathologists, clinicians, and molecular biologists. This will be invaluable as well to graduate students in a variety of disciplines and those specializing in particular aspects of nervous tissue study.

**The Flying Bandit** Robert Knuckle,Ed Arnold,1996 When Janice Whiteman met her husband Robert at the airport she was stunned when he was tackled in front of her by plainclothes police and arrested for armed robbery. Since the day they met, Robert had been leading a double life; husband and father at home, spectacularly successful armed robber on the road. In a spree lasting thirty-three months, in cities, large and small from Vancouver to Halifax, he committed fifty-nine robberies, sometimes two in one day, for a combined take of over two million dollars. This is the extraordinary true story of the most daring criminal in the nation's history: Canada's Flying Bandit.--

**Fareham Revisited** Michael Stephenson,2015-07-30 Fareham Revisited started out as a poem, which Michael Stephenson was inspired to write when he was reflecting on how much his home town had changed since the 1950s and 1960s. The poem and its sentiments struck a chord with so many people that he decided to write a book about Fareham that would evoke more of these memories. The book was privately published in 2004. This new revised and expanded edition will delight anyone who remembers the town in its heyday - and will also intrigue newcomers. Part-memoir and part-history, Fareham Revisited perfectly captures the allure of the shops and cafés along the 'Golden Mile', the alleyways or 'drokes', the old cottages, the market with its livestock, the coal barges at the Quay and the well-known characters, including dairy boss Tom Parker who drove around Fareham in a four-horse-power carriage, though his milkmen still used the horse-and-cart. For bus and railway enthusiasts this, too, is the perfect book, as the author casts an expert eye on the bus companies that plied their trade in Fareham, with their distinctive livery, and remembers the last days of steam trains, of which he had a privileged view, as the house in which his family lived was next to the railway line.

**Oldest Chicago, Second Edition** David Anthony Witter,2020-07-19 Chicago has thrived for almost two hundred years, growing from a backwoods swamp, to a rail and manufacturing hub, to a light of the new Millennium. While many great structures have been lost or demolished, much of this history still lives on. Within the pages of Oldest Chicago, get to know the history of the Windy City's most iconic buildings and the stories that bring their walls to life. Included are some of the businesses and buildings from the city's inception through the turn of the twentieth century that are examples of Chicago's living history like The First United Methodist Church (1831); The Old Water Tower (1859); and Wrigley Field (1916). Amazingly, many others are still run by the same family members whose dedication has made them not only enduring businesses but living landmarks. These include The Jaeger Funeral Home (1858); Anderson's Books (1875); and The Italian Village Restaurant (1927) among many others. Local historian David Anthony Witter brings his love of the city to this veritable guidebook of the city's buildings, neighborhoods, restaurants, businesses and bars. Learn the personal stories of the faces behind the places that continue to give the City of Big Shoulders its historical, ethnic, and entrepreneurial identity.less

**Autonomic and Enteric Ganglia** A.G. Karczmar,K. Koketsu,S. Nishi,2013-11-11 In the early 1960s, Dr. Alexander G. Karczmar, Professor of Pharmacology and Experimental Therapeutics at the Stritch School of Medicine of the Medical Center at Loyola University of Chicago, was confronted with a certain technical problem concerning his studies of synaptic transmission by means of microelectrode methods. He thought that the problem might be resolved if he could interest a microelectrode expert such as Dr. Kyoze Koketsu in his studies. Dr. Koketsu was a past member of the Faculty of the Kurume University School of Medicine who as a Research Fellow at the Australian National University had helped Sir John Eccles, subse quently a Nobel Prize winner, in developing microelectrode procedures. After further considering the matter, Dr. Karczmar was pleasantly sur prised to discover that by coincidence Dr. Koketsu was his neighbor, serving at that time as a Research Professor at the Neuropsychiatry Institute of the University of Illinois, College of Medicine of Chicago. This was the beginning of a long relationship, as Dr. Koketsu joined Dr. Karczmar at Loyola as Professor of Pharmacology and Therapeutics and Director of the Neurophysiology Laboratory at the Stritch School of Medicine. It was not long before Dr. Syogoro Nishi-Dr. Koketsu's former colleague on the Faculty of Medicine at Kurume University, and at that time a Research Fellow in Neurophysiology at the Rockefeller Institute in New York joined Drs. Koketsu and Karczmar at Loyola. Although in due time Drs.
