Completing Christ's Afflictions Bruce T. Clark,2015-02-25 What is the relationship between the preeminent, cosmos-reconciling 'Christ' of Col 1:15-20 and the imprisoned 'Paul' of 1:24-29, who enigmatically 'completes' the former's afflictions as he declares to 'every person' the mystery, long concealed but only now revealed by Israel's God to his holy ones? After finding solid exegetical ground through an unprecedented and exhaustive study of the rare verb antanapleroo (in 1.24), Bruce Clark tackles this most intriguing, if challenging question. He argues that Col 1, in accord with 2 Cor 5:18-6:4, presents Paul as the utterly unique diakonos ('minister') of the universal ekklesia and, therefore, as one whose afflictions uniquely complete Christ's own, so that together,

revealing the righteousness of God, they initiate the divine reconciliation of 'all things.'

  2004 Petar Sarcevic,Paul Volken,Andrea Bonomi,2009-04-27 With articles by Jürgen Basedow, Jan von Hein, Dorothee Janzen, Hans-Jürgen Puttfarken, François Dessemontet, Tito Ballarino, Benedetta Ubertazzi, Willibald Posch, Roberto Baratta and Luigi Fumagalli, national reports from Spain, Poland and Israel, news from The Hague as well as texts, materials and recent developments.

  Yearbook of Private International Law Petar Sarcevic,Paul Volken,Andrea Bonomi,2005-07-13 The Yearbook of Private International Law series, an annual publication now published by Sellier. European Law Publishers in cooperation with the Swiss Institute of Comparative Law, provides analysis and information on private international law (PIL) developments world-wide. This sixth volume looks rather Euro-centric, due to the impressive and continuous rhythm at which the creation of a European system of PIL is progressing at the European Community level. Contributions include discussion of the proposal for a Rome II regulation on conflict of laws in torts, as well as an analysis of the Avello decision, which could create a new framework for the development of PIL in Europe. Additional articles focus on the national conflict systems of some European states. An important comparative study discusses the treatment of foreign tax laws and judgments in four major European countriesâ??United Kingdom, Germany, France, and Italy. The actual and controversial issue of registered partnership is discussed from the perspective of Spanish law. Additionally, an English translation of the latest national PIL codificationâ??the recent Belgian Codeâ??is included.

  The International Status of the Suez Canal Joseph A. Obieta,Richard A. Baxter,2012-12-06 At the turn of the century, a definitive history of the Suez Canal by Charles-Roux, L'Isthme et le Canal de Suez, listed in its bibliogra phy 1499 items on this major interoceanic waterway. A conservative estimate would probably set at double, treble, or quadruple this number the notes and studies on the Suez Canal which have been published since 1901. A word of explanation about a further work on the Canal may therefore be called for. Throughout its history the Suez Canal has been the focus of con troversy and conflict, arising out of attempts to control this crucial point on the sea passage linking Europe with the east coast of Africa, India, the Far East and Australasia. Much of this troubled history yields more readily to political than to legal analysis. The most important single legal question about the Canal concerns the dimen sions of the right of free passage. That question has become of grave concern to the entire world community only with the war between the Arab States and Israel and the short-lived conflict of 1956-57 between France, Great Britain, and Israel on the one hand and Egypt on the other.

  <u>Tutti in cucina</u> Natalia Cattelani,2014-05-16 Che siate genitori con orari da incubo, nonni della domenica, studenti fuori sede, zii vacanzieri, single senza pentole o tate plurime non ha importanza. E non importa neanche che siate quel tipo di persona che trema all'idea di preparare un piatto con più di tre ingredienti, teme il forno

e guarda con soggezione un impasto. Se siete di buon appetito, e pensate che il cibo sia un modo per stare insieme e dimostrare affetto agli altri e a se stessi, allora questo manuale di cucina è per voi.

  Death in Florence Marco Vichi,2013-08-15 Florence, October 1966. The rain is never-ending. When a young boy vanishes on his way home from school the police fear the worst, and Inspector Bordelli begins an increasingly desperate investigation. Then the flood hits. During the night of 4th November the swollen River Arno, already lapping the arches of the Ponte Vecchio, breaks its banks and overwhelms the city. Streets become rushing torrents, the force of the water sweeping away cars and trees, doors, shutters and anything else in its wake. In the aftermath of this unimaginable tragedy the mystery of the child's disappearance seems destined to go unsolved. But obstinate as ever, Bordelli is not prepared to give up.

  La méthode de la référence à l'ordre juridique compétent en droit international privé ,1987-04-14 Sovereign Equality of States in International Law, R.P. Anand R.P. Anand, Professor at the Jawaharlal University of New Delhi, points out in the introduction of his course that the principle of sovereign equality of States refers to two twin principles which are accepted as unimpeachable norms of modern international law which cannot be questioned: the principles of equality and of sovereignty of States. Taking this as his starting point, the author first discusses the sovereignty of States in an interdependent world. He then examines the principle of equality of States in an unequal world from a historical perspective. Finally, Professor Anand tackles the questions of equality of States in a hierarchical world order, and mini-States and equality of rights. La Méthode de la Référence à l'Ordre juridique compétent en Droit international privé, Paolo Picone Paolo Picone, Professor at the University of Naples, notes in the introduction to his course that contemporary international law, such as it evolved during the 19th century, developed different methods of coordination. One method has nevertheless been neglected, which consist in choosing not the applicable law, but the competent legal system. After discussing the crisis in private international law, the author examines the method of coordination of legal systems based on the applicable law, followed by one that is based on reference to the @@@competent legal system. @@@He describes the functioning of the latter method in the case of the creation of legal situations in the @@@for, and in the case of recognition of foreign legal situations in the for. Professor Picone finishes his course by investigating the use of this method in solving the problem of preliminary matters in private international law, the method's area of application and its future prospects.

  The Montessori Movement in Interwar Europe Christine Quarfood,2022-11-05 This book explores how the Montessori movement developed a cultural critique and gained momentum during the interwar years of political turbulence. Drawing on archival sources, press material and Montessori's literary output, the book provides a multifaceted analysis of this significant educational movement. The first two chapters presents the scientific background, how Montessori's innovative method offered new solutions to age-old problems of teacher-pupil interaction. The following chapters focus on the social and psycho-pedagogical aspects of Montessorism, and how the movement's culture-critical message about the child's liberation was received and reinterpreted in the wider European public

debate. The last four chapters shed new light on the politicisation of Italian Montessorism during the problematic Montessori-Mussolini alliance, 1924-1934.

A History of International Law in Italy Giulio Bartolini,2020-04-02 This volume critically reassesses the history and impact of international law in Italy. It examines how Italy's engagement with international law has been influenced and cross-fertilized by global dynamics, in terms of theories, methodologies, or professional networks. It asks to what extent historical and political turning points influenced this engagement, especially where scholars were part of broader academic and public debates or even active participants in the role of legal advisers or politicians. It explores how international law was used or misused by relevant actors in such contexts. Bringing together scholars specialized in international law and legal history, this volume first provides a historical examination of the theoretical legal analysis produced in the Italian context, exploring its main features, and dissident voices. The second section assesses the impact on international law studies of key historical and political events involving Italy, both international and domestically; and, conversely, how such events influenced perceptions of international law. Finally, a concluding section places the preceding analysis within a broader, contemporary perspective. This volume weighs in on in the growing debate on the need to explore international law from comparative and local viewpoints. It shows how regional, national, and local contexts have contributed to shaping international legal rules, institutions, and doctrines; and how these in turn influenced local solutions.
