Chapter no. 1: Introduction to business Business is the action of making one's living or bringing in cash by creating or purchasing and selling items (for example, merchandise and enterprises). It is any movement or undertaking went into for benefit. It doesn't mean it is an organization, an enterprise, association, or have any such proper association. However, it can go from a road merchant to General Motors. Having a business name doesn't separate the business substance from the owner, which suggests that the owner of the business is careful and subject to commitments realized by the organization for obligations brought about by the company. If the market gets commitments, the loan bosses can pursue the proprietor's close to home belongings. A business structure doesn't take into consideration corporate duty rates. The owner is by and by burdened on all payments from the business. The term is likewise frequently utilized casually (yet not by legal counselors or

by open authorities) to allude to an organization. An organization, then again, is a different lawful element and accommodates reduced risk, just as corporate assessment rates. An organization structure is increasingly entangled and costly to set up; however, it offers more insurance and advantages for the proprietor. Types of business possession change by locale; however, a few healthy substances exist: Sole ownership: A single ownership, otherwise called an exclusive broker, is claimed by one individual and works for their advantage. The proprietor works the business alone and may procure representatives. A single owner has a high risk for all commitments acquired by the company, regardless of whether from operating expenses or decisions against the company. All benefits of the company have a place with a sole owner, including, for instance, a PC framework, any stock, fabricating gear, or retail installations, just as any genuine property possessed by the sole owner. Organization: An association is a business claimed by at least two individuals. In many types of associations, each accomplice has a great risk for the obligations acquired by the company. The three most pervasive sorts of revenue driven associations are global organizations, restricted organizations, and constrained risk associations.

**Options Made Easy: How to Make Profits Trading in Puts and Calls** W. D. Gann, 2008 To make a success trading in stocks every man should learn everything he can about the stock market and the ways to operate in the market in order to make the greatest success. He should learn to take the smallest risk possible and then try to make the greatest profits possible. The more a man studies and learns the greater success he will have. We quote Proverbs 1: 5- The wise man will Increase learning. Again, Proverbs 2: 11- Discretion shall preserve these; understanding shall keep thee. Proverbs 3: 9- Give instructions to a wise man and he will become wiser. Teach a just man and he will increase in learning. The Book of the Lambs says that the fear of the market is the beginning of knowledge. Many people do not realize that without preparation and knowledge the stock market is dangerous and that it is easier to make losses than it is to make profits. However, the risks in stock speculation or investment are no greater than in any other line of business if you understand and apply the proper rules to speculative trading, and the profits compared to risks are greater than in any other business.
